FOREWARD

Please find enclosed the Biennial Report of the Department of Public Instruction of the State of North Dakota for the 1979-81 Biennium as required by Sections 54-06-04 and 15-21-14 of the North Dakota Century Code. The report includes a description of activities, a listing of goals, an evaluation of accomplishments, and a projection of future trends for the two major divisions of the Department: administration and instruction.

The report also presents miscellaneous information in regard to publications and the required statistical reports. An organizational chart for the Department is included to assist the reader.

NARRATIVE REPORT

DIVISION OF ADMINISTRATION

DEPARTMENT OF PUBLIC INSTRUCTION

1979-1981

Superintendent's Office

I. Activity Description

The Superintendent of Public Instruction is given the authority for the general supervision of the elementary and secondary schools of the State.

The Office of Superintendent is also responsible for supervising the activities of the Department staff which includes performing accounting functions, administrating the foundation program, sponsoring the North Central Association and performing as a legislative liaison.

II. Goals

A. Supervise the activities of the Department of Public Instruction staff.

B. Provide internal support service to the personnel providing administrative and consultative functions for the state's school system.

III. Evaluation

Sections 82 and 83 of Article III of the Constitution of North Dakota contain the constitutional bases relative to the superintendent of public instruction. Section 82 provides for a superintendent of public instruction to be elected every four years while Section 83 states that the powers and duties of the superintendent shall be prescribed by law. Additionally, Article VIII of the Constitution provides that the legislative assembly shall establish and maintain a system of public school which is open to all children and free from sectarian control, that the system is uniform and free, that certain branches of knowledge shall be taught, that other steps shall be taken to prevent illiteracy, and that no monies raised for or appropriated to the public schools shall be used to support any sectarian school.

Chapter 15-21 of the North Dakota Century School Code provides for the office of the state superintendent, the appointment of a deputy, assistant, and other staff members to assist in "...carrying on the work of the department." Section 15-21-04 of the NDCC notes that the superintendent shall have the "...general supervision of the common and secondary schools of the state...". Other sections of Chapter 15-21 provide for the retention of records, relationships with county superintendents, the state board of public school education, accreditation standards, curriculum, certification, receipt of federal funds, relationships with the board of higher education, and the biennial report, itself.

During the last quarter of the 1979-81 biennium (January 1 - June 30, 1981) through January 1, 1982, six short-term goals were defined for the Department of Public Instruction. Most of these goals have been accomplished while some have been initiated and are nearing completion.

The Department was reorganized into divisions - management and administration, special education, and instruction. The divisional assistant superintendents report directly to the deputy superintendent and immediately supervise the unit directors within their respective divisions. Career education and adult education have been combined into one unit under the supervision of an assistant director. The units of school food services and commodities have been combined under one directorship. Legal and administrative assistants have been reclassified from other types of functions. Finally, the

Department continues to centralize its internal budgeting and accounting functions.

A goal of reducing in and out-of-state travel by 50 percent has been achieved. Out-of-state travel must now be justified in three ways - direct applicability to job assignment, potential benefit of meeting, and possibility of gaining the information through a less expensive mode. In-state travel has been reduced through coordination and by assigning visitations to county superintendents and field coordinators.

As staff members have resigned, many of the functions have been reassigned. Other functions have been reassessed and either modified or eliminated. The goal of staff reduction at 5 percent per year is being met.

Requirements for certification within the areas of early childhood, special education, and Indian education were analyzed via the Teachers' Professional Practices Commission and adjusted to more realistic requirements. These adjustments will now permit more ease in hiring and the continuance of programming which was threatened by a lack of personnel.

Over the past three years, three accreditation panels have been reviewing the procedures and the standards and criteria for accreditation. These panels represented elementary, junior high/middle schools, and high schools. During November of 1981, eight regional meetings were held to provide a full, field review of the revised drafts. The final revisions will reflect this field input and the revised accreditation procedures and standards should be ready for implementation during the 1982-83 school year.

Using the advice of a curriculum/editorial committee along with selected staff members, a textbook specifically designed for seventh and eighth graders about North Dakota is now being written. The Department has an author under contract and has finalized the publishing details. This textbook should be available in early 1983.

The following new functions were assumed:

1. Public Law 95-166 was passed in October, 1977. This law provided entitlement of funds for Nutrition Education.
2. The foundations program was revised to include partial support for public kindergartens during the second year of the biennium.
3. Gifted and talented coordination and grants to schools were initiated during the 1977-78 school year.
4. An additional staff member in health, physical education, and recreation was employed in response to these areas of programming.
5. An additional staff member for music and fine arts coordination was employed to respond to inservice and leadership needs in these curricular areas.

IV. Future Trends

An overall long-range goal of the Department is that of encouraging an appropriate and individualistic response to the needs of all children. Technical assistance will be provided by consultants and present staff members. Volunteer schools will be involved in the modeling of strategies and techniques which will enhance the meeting of students' needs. Implementation of this programming will begin in August of 1982.

Various interim legislative studies are being conducted. Most of these relate to the financing of education and the maintenance of accreditation standards. Specifically, the following areas are being studied: cost of education, statutory definition of cost, block grants for transporting redefinition of funding formulac, merit pay for teachers, and the financial burden of accreditation. Many staff members of the Department are directing internal task forces to address these issues. Reports are made to the interim study committee every two months.

The above cited legislative studies have the full cooperation and assistance of the Department. Additionally, while the Legislative Assembly is in session, the staff of the Department offers any available services. Thus, the second long-range goal is increased cooperation with the Legislature in whatever aspects of studies and information are requested.

Other goals will be identified as various needs arise. Each unit reporting herein has identified future trends and goals.

Division of Administration
Food Distribution Program

I. Activity Description

The Food Distribution Program is responsible for requisitioning, warehousing, offering and distributing commodities for each program (i.e. school's, charitable institutions; needy Indian families on reservations; summer camps; senior citizens; disaster relief; supplemental feeding program for pregnant women, infants and children; and migrant education) in accordance with the needs and regulations prescribed.

We must be able to assure the USDA that regulations and directives are understood and adhered to by the participating agencies.

II. Goals

A. To accept, warehouse, and distribute United States Department of Agriculture (USDA) donated foods to all qualified and eligible participating recipient agencies in accordance with USDA/State regulations and policies.

III. Evaluation

In fiscal year 1979, 9,786,561 pounds of USDA donated foods at a dollar value of $6,357,610 were distributed to the various programs. In fiscal year 1980, distribution increased to 10,775,528 pounds at a value of $13,018,924. The figures for this biennium indicate that distribution of USDA foods was 12,062,089 pounds above the projected total and $7,663,924 more than the projected total. This difference may be interpreted to mean we achieved our goal by 242 percent.

IV. Future Trends

USDA donated food entitlements have been reduced by Federal action for the coming years. However, the State of North Dakota will continue to serve the same number of recipients. Greater emphasis will be placed on use of the dairy bonus items which continue in large supply.

Economic factors have caused a large increase in participation of needy families on Indian reservations and this trend is expected to continue for some time.

Food distribution to schools will become more important as cash reimbursement for school food programs is reduced.

Finance and Reorganization

I. Activity Description

The Finance and Reorganization Division provides assistance to local school districts and counties, and cooperates with other state and federal agencies in the areas of financial accounting of public funds supporting education. It also gives assistance to local school districts and counties in the area of school district annexation and in developing reorganization plans.

II. Goals

A. To assist unaccredited high school districts in providing greater educational opportunities for their students by sending them to another district, or by joining another district and together making better educational opportunities available to all students.

B. To implement a double entry modified accrual accounting system to be used in school districts in North Dakota based on Handbook II Revised.

III. Evaluation

The goals of the Division of Finance and Reorganization to assist school districts in providing greater educational opportunities for their students and implementing a double entry modified accrual accounting system have moved forward as planned.

The objectives of developing a manual, training materials and reporting forms has been accomplished. Twenty-five school districts, eight multi-district vocational units and the multi-district special education units are currently on the system. The State Finance Advisory Committee adopted the accounting manual.

Financial data and reports were given to the Legislative Education Committee and to the 1981 Legislative Assembly.

The state foundation aid payments for students and transportation were distributed as per Section 15-40.1 of the North Dakota Century Code.

Assistance was given to 60 school districts in the area of annexation, reorganization, cooperative programs, increase levies and budgeting.

In-service was provided to school district clerks in cooperation with the North Dakota School Boards Association in four regional meetings around the state.

IV. Future Trends

The 1981 Legislature mandated conversion to the double entry modified accrual accounting system. Training for school districts will be scheduled for January, February, March, and April, 1982, for implementation of the accounting system by July 1, 1982.

Pupil Transportation/School Construction

I. Activity Description

The responsibilities for pupil transportation are to develop standards for school buses and the operation of the buses and to provide materials and assistance for the operation of the pupil transportation system.

The responsibilities for school construction are to determine that school buildings are constructed according to standards and to provide assistance with regard to planning and constructing buildings. Associated with this is the administration of the State School Construction Fund which provides loans to assist with the financing of school construction projects.

II. Goals

A. To review preliminary plans for school construction projects, to make recommendations for improvements in the plans and to approve final plans for the projects.

B. To assist school districts in processing requests for loans from the State School Construction Fund and to administer the loans.

C. To develop school building standards for North Dakota schools and to provide this information to persons working with school building plans.

D. To advise the Superintendent of Public Instruction regarding the adoption of rules and regulations for pupil transportation.

E. To provide the materials to assist schools in the operation of school buses and the administration of the transportation system.

F. To provide in-service training for school bus drivers.

III. Evaluation

Review and approval of plans for school building projects were completed for 49 projects during the past biennium. The summary of the types of projects is as follows:

6 Buildings

21 Additions to buildings

14 Rehabilitation projects

5 Conversions to coal boilers

3 Miscellaneous projects

Seven contracts for loans from the State School Construction Fund were processed.

The school building manual was not revised and printed again during this biennium.

We estimate that 7,000 individuals wrote the exam-review for school bus drivers. Approximately 6,000 bus driver handbooks were distributed for use by bus drivers and supervisors.

One or more in-service workshops were held in each county with a total of 136 workshops being conducted and 4,009 drivers attending these workshops. In addition, 257 drivers participated in the basic or advanced bus driver training courses.

IV. Future Trends

No substantial changes are anticipated in the school construction or pupil transportation areas in the immediate future.

Quite a large number of school buildings need to be improved to reduce energy consumption. Other projects are necessary to provide better facilities for the school program.

Present plans are to revise the school building manual on a chapter basis and to change the format to a loose leaf system so changes can be made more readily as they are needed.

Division of Administration
School Food Services

I. Activity Description

Chapter 15-54 of the North Dakota Century Code provides for the administration of Child Feeding programs for public school children.

Responsibilities of the division include providing supervisory assistance and nutrition education and participating in the decision making process on the state and national levels.

The programs monitored by the division include the National School Lunch Program, School Breakfast Program, Special Milk Program, and Nonfood Assistance.

II. Goals

A. To make food of maximum nutritive benefit available to school children.

B. To extend, expand and strengthen the school food services as a measure to safeguard the health and well-being of children.

C. To encourage the domestic consumption of agriculture and other foods.

D. To effect the conduct of financial management audits of Child Nutrition Programs in public schools every two years.

E. To use the State Staffing Standard guidelines in developing and increasing the staff to better administer the Child Nutrition Programs.

III. Evaluation

During the 1979-81 biennium the number of student lunches increased from 98.6 percent to 98.7 percent. In this same period, participation in the lunch program increased from 66.75 percent to 68.7 percent.

School Breakfast expansion resulted in an increase from 28 to 31 schools participating in the School Breakfast Program.

Efforts by the State Agency staff resulted in at least half of the school districts in the state receiving on-site assistance with recordkeeping and menu planning.

Prior to the 1979-81 biennium, implementation of the Nutrition Education and Training (NET) Program was just beginning. In the 1979-81 biennium, 39,530 children, 1,030 teachers and 449 school food service personnel were reached through Nutrition Education and Training Program efforts.

IV. Future Trends

Anticipated federal cuts will result in decreased flow-through of funds and decreased regulation, this in turn will have an effect on the State Agency. Therefore, maintenance of fiscal effort by the State will be necessary to assure continued federal funds at an acceptable level.

The State may need to help schools continue feeding programs through a variety of means if federal policies continue to decrease support payments to schools.

NARRATIVE REPORT

DIVISION OF INSTRUCTION

DEPARTMENT OF PUBLIC INSTRUCTION

1979-1981

Division of Instruction
North Dakota Fact Finding Commission

I. Activity Description

The Fact Finding Commission has been established in Section 15-38.1-03 of the North Dakota Century Code to investigate situations which have resulted in inpasse between school boards and teacher groups in resolution of their contract terms.

II. Goals

A. To investigate impasse situations between school boards and teacher groups.

III. Evaluation

There is no way of knowing why the number of hearings varies from year to year, but in 1979-80 there were 11 hearings, while in 1980-81 there were only five hearings.

The present legal basis and procedure do not provide for an acceptable means of resolving an impasse. There is still a question as to when and if a school board can issue new contracts to teachers.

Of the five cases for fiscal year 1980-81, two schools accepted the recommendations as given. Two schools were able to resolve their impasses by using the recommendations for continued negotiations, recommendations were not accepted verbatim. One school could not resolve the impasse 20 days after receiving the report, and the information was published in the local newspaper.

IV. Future Trends

Going into fiscal year 1981-82 there are several schools which have indicated their negotiations are at impasse and other schools indicate that impasse is likely.

In view of the question regarding whether a school board can issue new contracts to teachers, it is suggested that a continued study in this regard be conducted and that recommendations be given to the next session of the legislature.

Elementary and Secondary Grants
Teachers' Professional Practices Commission

I. Activity Description

Section 15-36-01 and Section 15-38-17 of the North Dakota Century Code provides for a Teachers' Professional Practices Commission which has the responsibility of making recommendations concerning the requirements for teacher certification to the State Superintendent of Public Instruction. This Commission also has the responsibility of investigating complaints that may be made to it as outlined in Section 15-38-18 and Section 15-38-19.

II. Goals

A. To develop and revise, consistent with state law, professional codes or standards relating to ethics, conduct and professional performance and practices of persons engaged in teaching in the public schools of the state.

B. To accept and investigate complaints against any member of the teaching profession engaged in teaching in the public schools in regard to violation of regulations promulgated in accordance with Section 15-38-18 or otherwise pertaining to his personal or professional conduct or performance.

III. Evaluation

The Teachers' Professional Practices Commission found it necessary to meet each month of the 1979-80 fiscal year and eight months of the 1980-81 fiscal year. During that time 19 requests for inquiries on teachers were received as per North Dakota Century Code Section 15-38-19. The school districts did not follow through in eight instances.

Of the remaining cases the commission held informal hearings, gathered factual information and data and issued a letter of reprimand in one case and dismissed two. The other eight were presented to the State Superintendent of Public Instruction with the information and recommendations for suspension or revocation. The State Superintendent held hearings under North Dakota Century Code 28-32 and revoked two teaching certificates and suspended six for a period of one year each.

Other informal hearings were held throughout the biennium gathering information on proposals for teacher certification regulation amendments. These hearings culminated in recommendations being made to the State Superintendent who held public hearings under North Dakota Century Code 28-32 in October of 1979 and November of 1980. The proposals were duly adopted and amendments added to the regulations of Chapter 67-01.

IV. Future Trends

The Commission acts on complaints as they are received or reported to it, therefore, we cannot predict how many cases we will have to investigate in the future.

Recommendations regarding teacher certification requirements may be given as new philosophies are developed.

Elementary and Secondary Grants
Foundation Program

I. Activity Description

The foundation program appropriation is for the state's share of the funding necessary to implement legislation enacted by the 1977 session of the legislature. In adopting a foundation program, the legislature has committed itself to sharing the cost of elementary education by appropriating sufficient funds to meet payments specified by law after subtracting the amount available locally from a twenty mill levy and from a county twenty-one mill levy.

II. Goals

A. To support public elementary and secondary education at 70 percent of the educational cost per pupil.

III. Evaluation

The 1979 Legislative Assembly appropriated 209.4 million dollars for the foundation program in support of elementary-secondary education and student transportation. The legislature approved pupil payments of $903 for 1979-80 and $970 for 1980-81. In addition, $1,000,000 was provided for kindergarten aid. Transportation payments were set at 20 cents per mile for school buses having a capacity of 16 or fewer pupils and 40 cents per mile for school buses having a capacity of 17 or more pupils plus 15 cents per day for each pupil who was transported in the large buses. The analysis of foundation program payments is as follows:

	Legislative Appropriations	Analysis of Expenditures	Variance
Pupil Payments	$256,380,000	$249,206,151	$ 7,173,849
Transportation Payments	21,910,000	21,614,264	295,736
Kindergarten	1,000,000	999,964	36
Total	$279,290,000	$271,820,379	$33,469,621
Less 21 Mill County Levy	(32,600,000)	(34,608,627)	2,008,627
Less 20 Mill Dist. Levy	(30,800,000)	(32,664,078)	1,864,078
874 Deduction	(1,100,000)	(1,214,542)	114,542
½ Oil & Gas Bonus	(5,300,000)	(31,522,049)	26,222,049
Federal Revenue Sharing	(12,400,000)	(12,400,000)	-0-
Vietnam Bonus	(4,400,000)	-0-	(4,400,000)
State General Fund	$192,690,000	$159,411.083	$33,278,917
Deficiency Payment		$ 12,000,000	

The $4,400,000 of Vietnam bonus money was not distributed because it was not needed.

IV. Future Trends

The costs for educating pupils and providing student transportation are expected to increase in direct relationship to cost indicies. Abnormal changes in the cost of utilities and transportation supplies are likely to bring about cost increases which exceed averages.

Division of Instruction
Compensatory Education

I. Activity Description

The Division of Compensatory Education is responsible for providing all necessary services to local and state institutions which qualify for federal funds in the programs of State Administration, Local Education Association (LEA) Grants for Educationally Deprived, State Institutions for Handicapped, State Institutions for Neglected/Delinquent, Migrant Education Program and Follow Through Technical Assistance. Assistance is offered for making application for funds and insuring compliance with the rules and regulations of the Department of Health, Education and Welfare.

II. Goals

A. To assist in making application for funds.

B. To annually monitor and give technical assistance on-site to local education agencies.

C. To provide staff development as required in establishing remedial activities in the areas of reading, language arts, and mathematics.

III. Evaluation

In-service training for administrators, teachers and parents was provided in 12 sessions. The presentors at the workshops were Department of Public Instruction and Northwest Regional Educational Laboratory personnel. The number of persons attending was 650 in fiscal year 1980 and 786 in fiscal year 1981.

Monitoring of Title I, ESEA projects were done in accordance with the Monitoring and Enforcement Plan. There were 160 visits in fiscal year 1980 and 185 visits in fiscal year 1981.

In fiscal year 1980, 267 LEA projects were approved which served 14,270 students. In fiscal year 1981, 259 LEA projects were approved. The data for number of students served is not yet available.

The neglected/delinquent program awarded three grants serving 353 people in fiscal year 1980 and two grants serving 205 people in fiscal year 1981.

In fiscal year 1980, three projects were approved to serve 324 handicapped students. This function has been transferred to the Special Education Division for fiscal year 1981.

The Migrant Education Program had eight approved projects serving 1,238 students in fiscal year 1980 and nine approved projects serving 1,167 students in fiscal year 1981.

IV. Future Trends

Title I, ESEA type programs will continue to operate as categorical programs to provide assistance to educationally deprived children under the Education Consolidation and Improvement Act (ECIA) of 1981.

The amount of money authorized makes it appear that the level of funding will remain near the level to the state during this current school term. Funds appropriated for the program will be available for expenditure during the 1982-83 school term. Grants to school districts will be determined under the payment provisions of the existing Title I statute. Funds expended in the 1981-82 school term will be carried over and may be spent next year under the rules of ECIA.

ECIA requires that programs be designed and implemented after consultation with parents and teachers of educationally disadvantaged children. Even though parent advisory councils are not mandated next year, the school district will have the option of continuing to use the parent advisory council to meet the consultation with parents requirement.

Division of Instruction
Special Education

I. Activity Description

The Division of Special Education is responsible for insuring that school districts and other public agencies provide special education programs for identified handicapped children. These laws, the North Dakota Century Code (Chapter 15-59) and P.L. 94-142 (Education for All Handicapped Children Act), require each state to provide a free, appropriate special education program to each handicapped child, ages three to eighteen, by September 1, 1978. Also, the Special Education Division is responsible for seeing that school districts carry out the identifying and locating of handicapped students and providing appropriate special education programs and related services for all handicapped students. The Department of Public Instruction establishes regulations, monitors all school district programs and seeks state financial support for the excess cost of implementing special education at local levels for all exceptional children including handicapped and gifted.

II. Goals

A. To monitor school district special education programs and collect other data which will evidence compliance with state and federal statutes.

B. To provide leadership in the organization of multi-district and regional programs for severely handicapped students, hearing impaired students and visually impaired students.

C. To establish standards and to annually approve program reimbursements to multi-district special education units, individual school districts and multi-county special education programs.

D. To coordinate manpower planning for preparation of special education personnel in in-state and out-of-state training facilities.

III. Evaluation

During the 1979-81 biennium, the Special Education Division monitored 22 sites, representing 165 school districts. The monitoring findings reflect that more complete and appropriate services were provided handicapped children during the biennium than had been provided previously. This is confirmed by the annual reports from local education agencies. The number of individual child service units provided handicapped children increased from 17,078 in 1979 to 24,940 in 1981 serving a total of 9,038 handicapped children. Numbers of special education personnel serving handicapped children increased from 799 in 1979 to 941 in 1981. The reported increase in services included, but was not limited to, specific low incidence handicapped children as designated in the biennium goals: visually impaired, hearing impaired, and severely handicapped.

Monitoring reports identified areas of incomplete programming reflecting a state-wide service gap for secondary age students with specific learning disabilities and for emotionally disturbed children on the elementary and secondary levels.

Six interagency agreements to provide special education services to handicapped children were in place during the 1979-81 biennium. Agreements were signed between the Department of Public Instruction and:

A. the Director of Institutions Office, to assure appropriate special education for children in state institutions,

B. Vocational Education and Vocational Rehabilitation to delineate individual agency's responsibilities to provide services to handicapped children,

C. the Health Department to assure provision of service to handicapped children ages 0-2 enrolled in infant stimulation programs,

D. the Bureau of Indian Affairs to cooperatively provide special education services to handicapped children attending school on the state's reservations, and

E. the Social Service Board

   1. to provide Early and Periodic Screening, Diagnosis and Treatment, (EPSDT) and

   2. to ensure through its SSI-Disabled Children Program maximum benefits and services to handicapped children

The Division of Special Education continued to review and disseminate state and federal regulations to special education programs in the state. Significant new regulations established during the biennium were:

A. Supplement to Guide I, detailing the reorganization of the multi-district units,

B. credential requirements for school psychologists,

C. reimbursement of extended school year programming for handicapped students,

D. student transportation,

E. specific learning disabilities guidelines, and

F. use of the partial foundation payment for students enrolled in preschool handicapped programs

During the biennium the Special Education Division added the responsibility of the administration of the P.L. 89-313 portion of the Title I program, which provides funding for students receiving their special education in state institutions and in the Health Department's approved Infant Stimulation Programs.

In-service training was planned and delivered to assist school districts and special education units as they implemented the regulations for the operation of special education programs. Procedures addressed in the in-service included regulations in specific learning disabilities, individualized education plan development, multi-district organizational policies, programming for preschool handicapped children, program planning for the gifted and talented, vocational education special needs, and preliminary needs in state-wide programming for the emotionally disturbed. As a result of the in-service, specifically in specific learning disabilities (SLD) regulations and state-wide programming for the emotionally disturbed, requests for technical assistance were made to the Department of Public Instruction by local personnel. A subsequent needs assessment was carried out to pinpoint specific technical assistance required in the SLD area and plans were proposed for a similar activity in the area of the emotionally disturbed. Technical assistance was not provided, however, due to Department of Public Instruction staff vacancies which required additional ongoing responsibilities for the current staff. To rectify this gap, an additional position was requested and approved by the 1981 legislature.

The state legislature's 1979-81 biennium appropriated $12,739,351 for special education. It was estimated to cover 35 percent of the total cost of providing special education and related services to handicapped children in the state of North Dakota. During the first year of the biennium $6,437,995 was expended to support public school special education programs. In addition to reimbursing a portion of program costs, special education was for the first time reponsible for the cost incurred in the statutory requirement of North Dakota Century Code Section 15-59-07 (state's responsibility for costs incurred above the two and one-half times the state average per pupil cost for elementary or secondary education to students attending the

Anne Carlsen School, the Adolescent Center of the State Hospital, and contracts for students to attend out-of-state public and private schools, and to fund transportation for students enrolled in state operated schools, in state private and out-of-state schools.) Since little budgetary history was available to assist in projecting costs for this statutory responsibility, the total costs to the state were underestimated. Thus, the Special Education Division requested and received a deficit appropriation of $322,497 for the second year of the biennium. The deficit appropriation allowed the state office to maintain the previous year's level of reimbursement to public schools special education programs. A total of $13,061,848 was expended during the 1979-81 biennium for special education.

Federal monies continue to be received for special education programming. The necessary activities to receive the funding have been completed: a state plan for fiscal year 1980 and a three year plan for 1980-83 were completed and have been approved by the Office of Special Education.

IV. Future Trends

There have been federal court cases in Pennsylvania which have established school district responsibility for summer school programs for some severely handicapped students. North Dakota serves some severely handicapped students in summer and may well enter this activity to a greater extent in the future.

Because only a few districts provide adequate special education in the secondary schools or for severely emotionally disturbed students, these will be areas of program growth in the years immediately ahead.

Federal law, P.L. 94-142, has mandated that preschool handicapped children (ages 3-5) be served if state law is not in conflict. North Dakota law does not mandate programs for ages 3-5 but some school districts have assumed this responsibility. In the North Dakota State Plan for P.L. 94-142, the response to the question of when North Dakota would be providing full services (3-5) and (0-2) was suggested as 1985 and 1990 respectively.

Division of Instruction
Elementary Education

I. Activity Description

The Elementary Unit assumes major functions concerning the supervision of elementary education in the State of North Dakota. The functions relate to the accreditation of elementary schools on the basis of standards and criteria, consultation with the various school districts with the intent of improving the quality of programs in elementary education, and providing indepth technical assistance to approximately 20 elementary or secondary schools per year, as they attempt to assess and improve the quality of their reading/language arts programs. The above functions direct the broad activity of the Elementary Unit which emphasizes coordination between and among agencies and groups relative to programming in elementary education.

II. Goals

A. To encourage all elementary schools to increase services which they provide to their students through the process of accreditation.

B. To provide consultative services to all state and local departments and agencies which directly or indirectly provide services to all elementary school age children in the state so the needs of elementary children may be more adequately met.

C. To have Right to Read implement a systematic program to increase the effectiveness of administrators, teachers, and other related personnel in developing reading programs which will provide for increased student reading competencies.

III. Evaluation

During the 1979-1980 biennium, the Elementary Education Unit reviewed the reports of approximately 470 schools for the purpose of accreditation. A related activity was the revision and printing of all necessary accreditation forms and reports. Also related to the accreditation process was the visitation of 35 schools during the 1979-80 school term and 39 visits during the 1980-81 school term.

A second major accomplishment was the approval of all public and the majority of the non-public schools for the 1979-80 and 1980-81 school terms. This is solely a Department function for public schools and a joint activity of the Department and the respective county superintendent for non-public schools.

A major Department service function has been serving as a clearinghouse for schools involved in a school improvement program. The services include: securing materials and resource people; providing information to interested administrators; providing in-service and financial support.

The Elementary Office has reviewed and processed numerous applications for the Elementary Principal's Credential and requests for the elementary and kindergarten endorsements. These activities are carried out in cooperation with the assistance of the Director of Certification. Copies of all communications are kept on file in the Elementary Office.

The revision of the elementary accreditation standards was a major undertaking during the biennium. The process included conducting two series of eight regional meetings with administrators, teachers, school board members and parents for the purpose of soliciting input and providing feedback. The revision of the accreditation process was also addressed in several state meetings.

The broad responsibilities of the Elementary Unit necessitates contact with various professional organizations. Representatives of the Elementary Unit attended various state and regional conferences sponsored by the NDAESP, NDPTA, NDASA, NDEA, and NDCSA when possible. The Director of Elementary Education attended all official Executive Board meetings of the NDAESP. The Elementary Unit also represented the Department on various advisory committees.

The provision of state aid for public kindergarten for the 1980-81 school term by the 1979 State Legislature greatly increased interest in early childhood education during the 1979-81 biennium. Related activities by the Elementary Unit included the provision of resource materials to the schools, providing information on laws and regulations and reviewing the qualifications of teachers. The Elementary Unit served as a resource to the 1979 Legislature during the approval of the legislation.

A major responsibility of the Elementary Office is to provide general consultation to all school districts in all matters of elementary education. Although an attempt was made to make most contacts through telephone and written communications, it was necessary to make 20 on-site visitations during the 1979-80 school term and 26 during the 1980-81 school term.

Curriculum development has now become the responsibility of the respective discipline consultant. However, much of the responsibility for supervising and coordinating the elementary curriculum services remains with the Elementary Unit. A staff member from the Elementary Unit was involved in all curriculum development activities.

A goal of the Department for this biennium was to expand the interaction between the Department and the county superintendents. This was accomplished by having the Director of the Elementary Unit serve as the Executive Secretary of the County Superintendents' Association. The Elementary Unit conducts several in-service sessions for the county superintendents during the biennium.

A major student service of the Elementary Unit has been supporting the activities of the Young Citizens League (YCL). Activities included coordinating the annual conventions during the 1979-81 biennium. A related activity was directing the State Spelling Bee which is conducted during the annual YCL Convention. The Elementary Unit handled all of the contacts with the office handling the spelling bee at the national level.

The provision of information is also a major function of the Elementary Unit. The Unit served as a major resource to the state legislature on elementary related legislation during the 1979 Legislative Session. The Unit also gathered data which was utilized by program directors of various federal programs.

The Basic Skills goal to develop a comprehensive state plan was accomplished. Technical assistance was provided to approximately 60 schools through on-site visits. Additional assistance was given by telephone and letters.

In-service training was given to elementary and secondary staffs of approximately 25 schools. Other in-service sessions were given at conferences and meetings around the state.

Information on various forms has been disseminated to teachers, administrators and parents in North Dakota and to other state departments. Approximately 3,000 copies of the booklet "Your Child and Reading" have been published and disseminated. Another publication, "A Guide for Teaching Reading in the Content Areas," was published and disseminated. College and university teachers have brought this "Golden Guide" and used it as a textbook for classes. This guide has been revised and 1,000 copies are currently being printed. They will be disseminated to all secondary schools in the state.

Flow-through funds have been provided to 33 schools and/or colleges in the form of grants. The funds have been used to provide more effective basic skills programming.

Seventy-six reading credentials have been approved. Approximately 50 others have applied for the reading credential.

Seventy-five Basic Skills Reading teachers have applied for the reading credential. Many have received the credential. Approximately 33 meet the academic requirements and thus meet the accreditation standards. Many others are working on the requirements.

The work of the Language Arts Curriculum Committee has been placed on hold right now. When it was functioning there was active involvement with that committee.

Funding for Basic Skills has been included in the Federal Block Grant; therefore, the future of Basic Skills in North Dakota is uncertain at the present time. The current federal Basic Skills funding will expire on January 31, 1982.

Some difficulties encountered include coordinating plans and activities with pre-elementary and adult education programs; those programs have their own plans.

"A Handbook on Teaching Basic Skills" is in the process of being typed. It should be printed and disseminated by January 31, 1982.

The Basic Skills Office will continue to provide technical assistance and in-service training when requested by schools as funds are available. Materials will be disseminated upon request.

Applications for reading credentials will continue to be processed. Transcripts of Basic Skills teachers will be reviewed to determine whether they meet the requirements listed in the Accreditation Standards.

The Elementary Unit placed greater emphasis on functioning as a service agency to local educational agencies, citizens, special interest groups, students groups and other departments and agencies. The activities were in response to greater demand for such services by the representative groups. It is anticipated that even greater services of that type will be expected during this biennium as more representative groups become involved in the educational process. It is evident to the Elementary Unit that the governance and implementation of educational programs will require greater service by the Elementary Unit.

IV. Future Trends

Emphasis will be placed on early childhood education, accreditation, and school improvement during the 1981-83 biennium. However, those programs presently supported will receive continued support within the limit of the resources.

A considerable reduction in federal funds will limit support for curriculum development and especially in-service. The reduction of the Elementary Unit's professional staff to two positions and secretarial staff to two positions will also place a major restriction on the scope of the services. A reduction in travel funds will further reduce services, especially on-site visitations.

The Elementary Unit plans to compensate for some of the loss in resources by working through groups or agencies. The county superintendents will become more involved in approval and accreditation. The State Committee for Elementary Evaluation will be expected to assume a greater responsibility in providing in-service and services to schools wishing assistance in the school improvement process. A committee for establishing guidelines for voluntary accreditation of private preschool programs will be reactivated. Professional groups such as the NDAESP and the NDCSA will be asked to assist in disseminating information on the accreditation process.

Division of Instruction
Secondary Education

I. Activity Description

The Division of Secondary Education provides for the supervision, under the direction of the Superintendent of Public Instruction, the instruction, discipline and other conditions affecting the efficiency of high schools receiving financial aid from the state or tuition from state funds in accordance with North Dakota Century Code Section 15-41-04.

This division reviews the annual reports of all high schools for the purposes of monitoring statutory compliance by December 31 of each year and to assign a classification level of accreditation for each school by March 31 of each year.

II. Goals

A. To provide for the review of all annual reports from all high schools in the determination of their accreditation levels.

B. To provide consultative services to schools that are directed toward the improvement of instruction for all junior and senior high school students in North Dakota.

C. To provide an on-site visitation by staff from secondary education to 25 percent of the high schools each year.

III. Evaluation

All annual reports for the high schools in North Dakota were reviewed for statutory compliance during both years of the biennium. The written reports that were submitted to the Superintendent of Public Instruction identified schools that were in compliance with the statutory requirements. Finalizing the compliance activities for all schools by December 31 was not accomplished as the review activities for some of the schools extended beyond December 31.

The annual reports and data provided to our office for accreditation purposes were processed and completed by March 31 of each year of the biennium. The classification levels of accreditation were assigned to each school; a summary of the classification status of each school was mailed to each high school district; and a report was also submitted to the State Superintendent.

The consultative services that were provided to school districts have been documented and are on file in our office in the individual school district's folder.

The objective which identified on-site school visitations to 25 percent of our high schools each year was not met. The number of visitations that we were able to carry out have been decreasing substantially during the past three years. The decrease has resulted due to additional responsibilities assigned and the reorganization of functions in the Secondary Education Division. The addition of the activities involved in school approval in 1979 has increased the need for more time at desk for the staff. There were only 32 on-site visitations conducted by the staff during the 1979-80 school term. This amounts to slightly over 10 percent of our schools that were provided with a visitation from our staff each year.

The annual workshop sponsored for new school administrators during the month of August each year continues to be highly successful. Evaluations which verify the success of each workshop are on file in our office.

The final draft of the revised accreditation standards for junior and senior high schools was not completed by June 30, 1981. The final draft of the revised standards should, however, be completed before June, 1982. The projected implementation date for the new standards continues to be for the 1982-83 school term.

The Right-to-Read Program by our Department has been successful as approximately 20 percent of our junior and senior high schools have added some type of reading program to their total junior and senior high school curriculum.

Our goal of providing staff members to assist the North Central Association in the school evaluation activities for at least five member schools each year was not met. However, additional involvement in other activities with the North Central Association was provided. The Director of Secondary Education also functioned as Associate Director for junior high middle schools, served as Acting Director for the 1980-81 school term, and served on the Regional Committee on Small Schools, for the North Central Association.

The Director of Secondary Education continues on the Board of Directors for the National Association of State Supervisors and Directors of Secondary Education.

IV. Future Trends

There is a need for initiating some major activities by our Department which are directed at assisting schools in developing and implementing a school improvement process for each school. The school improvement process which was included in the revised standards for school accreditation at the junior and senior high schools should serve as an accountability process for schools. The need for an accountability process for each school appears evident and appears to be demanded by the consumer.

There is a need to address some incentives or mandates by the Legislature to encourage the sharing of programs between or among schools. We have encouraged the program sharing concept among schools and have provided assistance for successful implementation.

There is a need for in-service programs to assist secondary teachers and administrators in reviewing their total school programs and in their adaptation of their programs to accommodate the various functioning levels of the students.

There is a need to identify and establish a minimum level of pupil services that should be provided by all schools. Along with this need is the identification of the various agencies that currently exist which could assist schools in providing the student services. In our opinion the school guidance counselor would be the appropriate individual to coordinate these activities.

Division of Instruction - Resources and Services
Director of Curriculum

I. Activity Description

The Director of Curriculum is both a staff advisor on curriculum and instructional matters and a consultant to school districts in matters pertaining to the K-12 curriculum in the public and private schools throughout the state.

These services are provided by establishing and maintaining state advisory committees which assist in setting curriculum priorities and implementing curriculum changes and by providing direct consultant services to school districts conducting curriculum research and experimentation.

II. Goals

A. To provide internal and external curriculum research, development, implementation, and materials.

B. To provide in-service training workshops to update teacher preparation as needed.

III. Evaluation

Two curriculum committees conducted four meetings during the biennium to assist in setting curriculum priorities and implementing curriculum changes.

Thirty on-site visits to provide direct consultant services to schools conducting curriculum research and experimentation were completed during the biennium.

Two new curriculum guides were produced and disseminated to all schools. Three others were reprinted and provided to schools as requested.

The Director of Curriculum responded to 297 requests for assistance from in-state persons and 115 requests from out-of-state persons.

The division provided 24 in-service training workshops enrolling 500 teachers to update teacher preparations.

An extensive array of materials appropriate at all elementary and junior high grade levels was provided without charge to all schools during the biennium. This included the provision of classroom quantities of the 20 paperback Project STUDY books.

The Director of Curriculum represented the state of North Dakota and its public schools at 17 conferences, seminars and meetings, the majority of which were conducted within the state.

The division has moved to a more cost effective means of delivering materials and training to teachers. Committees and on-site consultations are being diminished and regional and special area workshops are being increased to maximize cost effectiveness of activities.

IV. Future Trends

The most critical problem for the Director of Curriculum is funding. The office is currently being funded 100 percent with federal funds which are experiencing massive reductions. At this time it is not possible to project what degree of funding is available nor which priorities can be accomplished within those funding restrictions.

Division of Instruction
Teacher Certification

I. Activity Description

The Office of Certification has the responsibility of processing, evaluating, issuing and recording a North Dakota Educator's Professional Certificate to those who apply and fulfill the North Dakota certification requirements.

This division processes applications received from non-high school persons, and approves, issues and records their Equivalency Certificate based on the General Educational Development Tests (GED).

Another responsibility of the Office of Certification is to process, evaluate, issue and record various credentials related to school positions according to established guidelines.

II. Goals

A. To act as the state licensing agency for those applicants desiring a North Dakota Educator's Professional Teaching Certificate.

B. To act as a resource person to colleges in the area of teacher certification.

C. To be a resource person for school administrators and school boards for teacher certification in employment.

D. To act as the state director for the General Educational Development Test Program (GED).

E. To act as the approval agent for various Department of Public Instruction credentials.

III. Evaluation

During the 1979-81 biennium 2,542 two year entrance certificates, 1,625 two year renewal certificates, 1,311 five year renewal certificates and 50 alien certificates were awarded.

During the same period 1,173 high school equivalency certificates were awarded.

As part of the standards for voluntary school accreditation 200 superintendent credentials, 173 elementary principal credentials and 164 secondary principal credentials were issued.

IV. Future Trends

Continued effort will be made to utilize micro-filming techniques for efficient information retrieval and usage.

It is anticipated that with the change in 1976 from issuance of life certification to five year maximums, the Office of Certification will continue to experience an increased work load.

Division of Instruction - Resources and Services
Information and Research

I. Activity Description

The Information and Research Division collects, processes, analyzes and reports enrollment, census, staffing, transportation, and school district financial information to a variety of groups.

The Division assists state agency personnel in the development and production of audio and visually supported presentations. In performing this service we also maintain an audio-visual equipment and materials pool to serve state agency personnel.

II. Goals

A. To conduct information and research activities to facilitate the decision-making capacity of state and local educational personnel and others.

B. To provide consultative services to local educational agencies.

C. To provide audio-visual support services to state agency staff members.

III. Evaluation

The objectives for the Office of Information and Research were accomplished as stated. The data collected, processed and analyzed along with consultative services to school district, state agency, and legislative personnel are constantly being evaluated to identify areas for improvement.

The program for distributing state foundation payments to school districts will be rewritten for the 1981-83 biennium because of problems resulting from a large number of modifications which have occurred since 1972.

The data systems which include staffing, enrollment, census and transportation information, although several years old, will not be updated until such time when the conversions become cost effective. The school finance data system will be redesigned to accommodate reporting under Accounting Handbook II, second edition.

The collection of audio-visual equipment and supplies into a centrally located area allows us to more efficiently serve users from state agencies including the governor's office.

The mathematics assessment initiated during the 1977-79 biennium was completed and reports distributed. The science assessment which was initiated during the 1979-81 biennium will be completed during the 1981-83 biennium.

The elimination of one secretarial position and the planned removal of one professional position from the staff of the Office of Information and Research will result in the elimination of assessment activities and audio-visual services. The reduction in staff will also make it more difficult to respond to user requests in a timely manner.

IV. Future Trends

The demand for information is expected to continue which will necessitate the maintenance of existing data systems. Data collected will continue to be analyzed for appropriations and use. The collection of data elements which are rarely used and cannot be justified will be discontinued.

It is expected that the ability to analyze data on-line will enhance our ability to validate, post and use data for answering information requests. However, some additional training in the application of user languages will be required for improved efficiency.

Division of Instruction - Resources and Services
Director of Guidance Services and ESEA Title IV-C

I. Activity Description

Elementary and Secondary Education Act (ESEA) Title IV-C receives program and administrative funds under the provision of P.L. 93-380. The administrative funds are used to provide the proper utilization of competitive program funds for which local districts compete. These duties involve contacting all public and non-public schools in the state to issue them an invitation to compete for the available funds. Technical assistance is given in the writing of proposals. Proposals are reviewed by appropriate state staff, the State Advisory Council and a team of out-of-state readers. Subsequently the ESEA Title IV-C staff recommends to the State Superintendent either to approve or disapprove of the submitted projects. After funding, the ESEA Title IV-C staff is responsible for monitoring projects, lending technical assistance in project operation, and overseeing the evaluation component of each project.

The Guidance Services Staff is also responsible for providing leadership for counseling and guidance programs in the state. The Guidance staff visits schools, counselors and guidance projects, making recommendations for improvement of services. Also the division is responsible for certifying school counselors and conducting periodic in-service sessions for improvement of professional staff.

II. Goals

A. To coordinate the administration of ESEA Title IV-C.

B. To coordinate the administration of the State Facilitator project.

1. To build and maintain a statewide system for delivering exemplary educational projects of the National Diffusion Network (NDN) to education service providers.

2. To assure that exemplary projects in the NDN are made available for consideration by education service providers in North Dakota.

C. To coordinate the administration of the Guidance, Counseling and Testing program under the provisions of applicable federal and state legislation.

III. Evaluation

The ESEA Title IV-C program plan was written and submitted to the U.S. Department of Education for approval. The plan called for an expenditure of $768,496 of local grant money during the 1979-1981 biennium and for an expenditure of $330,000 of SEA administration and leadership money. The plan was approved. Likewise, the performance and financial sections of the annual evaluation report were accepted for fiscal year 1980 and fiscal year 1981 by the Department of Education with positive comments made concerning the information provided in the report.

In fiscal year 1980, 14 major grants (over $3,000), 15 mini-grants ($3,000 or under) and 21 adopter/adapter grants were funded for a total of 50 LEA Title IV-C grants. In fiscal year 1981, 12 major, 17 mini and nine adopter/adapter grants were funded for a total of 38 LEA grant awards.

The monitoring of projects, involved SEA staff and the State Advisory Council (SAC) in addition to the Director of ESEA Title IV-C. In fiscal year 1980, all major projects were monitored by the SEA staff, while the SAC and SEA monitored all mini-grants. During fiscal year 1981, the SEA monitored 11 of 12 major grants, while the SEA and SAC monitored all mini-grants and adopter/adapter grants. The system of cooperative monitoring by both the SEA and SAC provided a comprehensive evaluation of projects funded by Title IV-C monies.

The State Facilitator worked with local school districts and secured applications for adopter/adapter grants funded under Title IV-C. In fiscal year 1980, 19 adopter/adapter projects were funded at a cost of $50,230. In fiscal year 1981, nine adopter/adapter projects were funded at a cost of $23,120. Because of the funding cycle and evaluation activities, projects were generally monitored the year after funding was initiated.

The Assistant Director of Guidance Services maintained a regular schedule of school visitations for technical assistance to guidance programs and also the monitoring of Title IV-B projects. In fiscal year 1980, 98 schools were consulted on guidance services and Title IV-B, while in fiscal year 1981, 130 schools were consulted concerning guidance programs. In addition, 43 counselor credentials were processed in each of the two years of the biennium.

The Guidance Services staff arranged a week-long workshop on "Crisis Intervention for Counselors" at North Dakota State University, June 9-13, 1980, with 26 counselors successfully completing the graduate credit course. Another fiscal year 1980 activity involved a counseling and guidance workshop for 13 administrators on August 11-12, 1980. During fiscal year 1981 another "Crisis Intervention for Counselors" workshop was held, but this time on the BJC campus in Bismarck on June 1-5, 1981, with 21 counselors in attendance. Additionally in fiscal year 1981, three open houses for administrators and school board members were held in order to see guidance programs in action. These affairs were held in Minot, Valley City and Grand Forks. The outcome has been that at least two schools have added guidance counselors to their school systems. In addition, a new guide to students' rights and responsibilities was prepared, printed and disseminated.

The purpose of the North Dakota Facilitator Project is to promote the adoption, by public and non-public schools in North Dakota, of innovative educational programs and practices in improving the educational quality. The work of the State Facilitator is essentially to serve as a broker or linking agent between developers of innovative programs and consumers who adopt those programs.

During the 1979-81 biennium, 41 regional awareness sessions were conducted in various parts of the state and two statewide conferences. Awareness material was mailed to all school districts on innovative programs of the NDN. In addition, abstracts and other project materials were sent to schools on request. The State Facilitator was available to assist schools in matching their needs to the solutions offered by NDN validated projects.

After studying project material, 43 local districts decided to adopt a specific validated project. The facilitator then arranged for consultants from the developer/demonstrator sites to visit the local districts or some central location for training sessions. Each district adopting a project continued to receive help through letters, phone calls, and visits until the teachers trained felt comfortable in using the program.

IV. Future Trends

The current situation involves a sizeable cut-back in both in-state and out-of-state travel which means less school visitations and technical assistance to schools for both guidance programs and monitoring of federal projects.

Another trend is less sponsorship of department workshops because of a cut in professional staff in the previous biennium.

Less printing of large scale productions has occurred as the Guidance Viewpoint has gone from four issues to two. At the present time only one issue is contemplated for the current year. Again less staff to do the work necessitates the change.

Title IV-C projects need to be conditioned for the change to the block grant system. At the same time these projects need to operate efficiently during the change-over in order to make a smooth transition while seeking to serve students based upon needs. Final evaluation reports for Title IV-C will have to be prepared and submitted to the Department of Education.

Short-range plans include obligating money for projects prior to June 30, 1981; training county superintendents in project monitoring; and training regional field coordinators in project application, implementation, monitoring and evaluation techniques.

Long-range plans include becoming familiar with block-grant procedures and developing audio-visual modules for use in guidance programs.

We can expect about 20 to 25 adoptions on NDN programs in North Dakota per year. There will be an increase of North Dakota educators who are certified by developer/demonstrators to conduct adoption training sessions. Local districts will have the benefit of current adoption sites in North Dakota. It will be very easy to visit local adoption sites and see the NDN programs in operation. They will be able to interact and get an indepth awareness of the program. Should they decide to adopt there will also be a local resource person for technical assistance.

The school districts which have been financially unable to attach themselves to such innovative projects will have the opportunity to investigate, visit and determine the feasibility of implementation of such projects in their own schools. Small rural distrcts will be able to benefit from extensive development of the demonstration site methods and materials otherwise too difficult or costly to develop in the home districts.

Division of Instruction - Resources and Services
Coordinator, Health, Driver, Physical and Traffic Safety Education

I. Activity Description

This division provides consultative services to schools to help them satisfactorily solve the educational problems which they may face in Traffic Safety Education and in Health, Physical Education and Recreation programs. Services are also provided to teachers in the areas of school visitations, newsletters, workshops and up-to-date curriculum and facility guides.

The division assists in obtaining financial aid for local school districts to adequately support a Traffic Safety Education Program and establishes and maintains a high level of subject knowledge among safety education instructors through teacher standards and continued training programs.

II. Goals

A. To reduce the number of vehicle crashes, fatalities, injuries and property damage by improving the quality of driver, motorcycle operator and pedestrian performance through an effective Traffic Safety Education Program for all age groups.

B. To provide for planning, development, monitoring, and coordinating special programs and projects and providing consultative services in Health, Physical Education and Recreation.

III. Evaluation

Driver Education Administration provided salaries and fees for the coordination and implementation of the planned activities in Traffic Safety Education. This office will not and cannot continue to function without an administrative staff.

There were 178 high school and college instructors trained during fiscal year 1981. The training took place during the annual Driver

Education Conference through credit offered from NDSU and UND Continuing Studies, plus state institutions located at Minot, Grand Forks, Fargo, Mayville, Valley City and Dickinson.

There were 195 schools served and 2,536 films and multi-media materials have been distributed throughout the state of North Dakota by the Instructional Media Center.

Arrangements have been made for 1982 with the Instructional Media Center to continue to provide the services to the school districts at a nominal fee of $3.00 per film, and $2.50 per multi-media kit. In meetings with the Governor's Representative for Highway Safety it was discussed and agreed on that the Department of Public Instruction would redo the catalog for audiovisual materials and the Traffic Safety Programs Division of the North Dakota Highway Department would continue to buy additional materials to keep the Instructional Media Center current and accessible to traffic safety instructors and other community sources having need for the use of these materials.

The development of a Driver Education Curriculum was a cooperative effort between South Dakota and North Dakota with the assistance of a consultant to formulate a rough draft and to conduct a one-week curriculum development workshop at Mary College. The materials to provide for the distribution of this curriculum have arrived and the curriculum will be distributed in early November.

The Regional Driver Education Programs provided for contracts from one central school to outlying schools for range and/or simulation training. The schools participating at contract centers were Minot (78 students) and Dickinson (63 students). A total of 123 students were trained.

Eight Driver Excellence Programs were held during the month of April, providing three representatives from each of the eight regions to enter the state contest. These contests were coordinated and sponsored by local high schools and driver education instructors with assistance from the Department of Public Instruction. The state contest was held in Valley City in May and sponsored by AMVETS, and the state champion was sent to St. Louis, Missouri, to participate in the national contest, representing North Dakota.

Driver education free loan automobiles were no longer available through local dealers. Therefore, a car for handicapped students was leased for one quarter and was made available throughout the state wherever a need was indicated. This service was utilized by the Bowman Public Schools and the Fargo Public Schools. With P.L. 94-142 this is a service that should continue to be available to students in North Dakota schools.

The Administrative Resource Guide was revised and printed in August and distributed in the fall packet in September.

The Parent Ride Along materials were purchased and distributed during the North Dakota Driver and Traffic Safety Education Annual Conference. The materials that were not distributed at this time were provided to schools who had already adopted the program.

We evaluated the feasibility of the "I Can" series by Zig Ziglar, and explored the possibilities of the alcohol education program at Jamestown. We checked on the feasibility of a workshop that was sponsored by Southwest Alcohol and Drug Prevention School and found the cost prohibitive.

Seven scriptographic booklets, produced by Channing L. Bete Co., were purchased in quantity for use in the schools. The booklets are: "What Parents Should Know About Children and Traffic," "ABC's of Pedestrian Safety," "How to Walk to School Safely," "What Everyone Should Know About Bicycle Safety," "Be An Expert Bike Driver," "Join the School Bus Safety Team," and "About the New Highway Signs, Signals and Markings." The Governor's Highway Safety Coloring Book, produced by the North Dakota Highway Department was distributed to all schools requesting classroom size quantities.

Expansion of the state's Student Safety Programs in secondary schools was enhanced by providing travel for three students to attend the Student Safety Programs Conference in Eugene, Oregon, in the summer of 1981. Two new Student Safety Councils were established in Dickinson and Mandan. Continuation of present secondary school Student Safety Programs was provided.

Due to administrative changes at the state level, alterations had to be made in over 10,000 copies of the North Dakota Bicyclist's Guide. Pride Industries was contracted to provide the alterations in the inventory of booklets. Distribution to schools in classroom quantities were provided by the Department of Public Instruction.

Presently the Department of Public Instruction has an obligation to administer Section 39-28-01, the Motorcycle Education Program for the state of North Dakota.

We also have a graduation requirement requiring driver education. Those students completing a 30 and 6 minimum driver education program qualify for early licensing at age 14. Those completion certificates are provided by the Department of Public Instruction and signed by certified driver education instructors whose credentials are evaluated within this department to assure that only the highest quality instruction is being provided.

During fiscal year 1980 the Coordinators of Health, Physical Education and Recreation have been actively involved in monitoring Health, Physical Education and Recreation programs and projects in school districts throughout the state. This has been done through participation on North Central Association evaluation teams as well as responding to school district requests for assistance in specific problem areas.

The Coordinators continued to work with the North Dakota Association of Health, Physical Education and Recreation Executive Board and were actively involved as their physical education public information representatives for the state. Activities in this area include articles in the Department of Public Instruction newspaper, "Outlook: North Dakota Education," and distribute statewide the "Physical Education Newsletter" which was printed ten months of the year and sent to each physical education instructor in the state.

The Coordinators of Physical Education and Recreation in cooperation with Mary College conducted an in-service workshop in the ramifications of P.L. 94-142 as it relates to Physical Education of the Handicapped.

The Coordinators attempted to identify in which discipline the majority of health education was being taught. Health is taught in the sciences, health education, physical education, and home economics. This diversification of disciplines has identified a portion of the problem for a coordinated K-12 health curriculum.

The North Dakota Health Department has health service projects using nurse practitioners in North Dakota. These nurse practitioners are school nurses and are utilized in two North Dakota counties.

(HAP) Health Activities Project is making inroads in grades 4-8. The School Health Curriculum Project for each grade unit extends over an eleven-week period and is organized around the structure, function, interaction, and care of the body system. For example, the subjects are energy, nutrition, and the digestive system in the fourth grade; lungs and the respiratory system in the fifth; heart and the circulatory system in the sixth, and brain and nervous system in the seventh grade.

The Coordinators worked closely with the North Dakota Fire Safety Association's "Learn Not to Burn" Curriculum. This curriculum has been placed in the County Superintendent's offices throughout the state for loan to individual schools as needed.

During fiscal year 1981 the new one-half time Coordinator of Health, Physical Education and Recreation has been actively involved in monitoring and getting acquainted with many programs and projects in school districts throughout the state. This has been accomplished through participation in two North Central evaluations, four in-service workshops, 53 school visitations, five state-wide teacher workshops, and four administrator workshops.

The Coordinator of Physical Education and Recreation in cooperation with North Dakota Game and Fish Department conducted a Shooting Sports Training Workshop during the NDEA Convention in October. Also, in conjunction with NDSU, a workshop in Rhythmic Activities was conducted in December, 1980, and a National Clinic in Fitness and Sports was cosponsored in May, 1981.

The Coordinator is active in the Society for State Directors in Health, Physical Education and Recreation on the lifetime and shooting sports committees. Administrative guidelines and curriculum programs have been approved by the National Rifle Association to provide shooting sports training for instructors during fiscal year 1983 and fiscal year 1984.

In conjunction with the North Dakota Health Department, Health Education Division, support has been given to enhance comprehensive health education in the schools. Several districts have implemented the School Health Curriculum Project and the Health Activities Project, as well as Operation Aware programs throughout the state. A survey is being conducted to determine the content of many school health programs presently in existence. At the present time, results from this survey are being received and should be available by fall, 1981.

Health education is an area of growing concern throughout the state. Requests for materials, in-service programs and workshops continue to be directed to our office. Expansion in the area of health education is needed to assist the schools properly.

The continuation and expansion of the present activities of the Coordinator in Health, Physical Education and Recreation are necessary to maintain adequate communication and direction in the state's school programs.

IV. Future Trends

Lacking the continuous financial support which the Highway Department has provided since 1972, the long term goals are in jeopardy.

In the future the major thrust of our Traffic Safety Education Division will be in motorcycle safety education and in providing solutions to the day-to-day problems in traffic safety education.

The short term goals are to finalize all the tasks previously listed for Highway Safety Programs for fiscal year 1981, and to finalize the motorcycle information for 1981 to establish procedures for 1982 in regard to requests already received from regional coordinators and ABATE regarding the Better Biking Program piloted in 1981.

With the type of lifestyle in today's society, preventive methods to maintain adequate health are being emphasized. Health and Physical Education programs are becoming more important for proper preparation of today's youth. Good comprehensive health education programs and proper direction in physical maintenance and activities of the human body need to be basic ingredients in the curriculum.

Statewide direction and recommendations are important to establish programs that meet the needs of the local communities.

With the lack of federal funding the state must assume responsibility for the continuation and advancement of these programs. The need for a state supported curriculum guide in health education and secondary physical education is important. Revision and adoption of a new guide to replace the present 1964 and 1965 guides would be helpful to many communities to develop adequate programs for today's needs.

Division of Instruction - Resources and Services
Coordinator, Music and Fine Arts

I. Activity Description

This division assists local education agencies in planning, developing and implementing special projects for Fine Arts and Music. To accomplish this we coordinate efforts of state arts organizations when their activities involve North Dakota elementary and secondary students and schools.

The coordinator for Music and Fine Arts participates in local, state, regional and national conference and conventions relating to Arts education.

II. Goals

A. To provide consultative services to school districts to strengthen their Fine Arts and Music programs.

B. To plan, develop, monitor and coordinate special programs and projects.

C. To cooperate with other units and divisions of the SEA and professional Arts in Education leaders throughout the state to initiate the development of program and curriculum for North Dakota Arts in Education.

D. To coordinate efforts of various Arts organizations in programs and projects involving the North Dakota elementary and secondary students and schools.

III. Evaluation

The objectives and activities for the biennium have been accomplished within certain budgetary constraints.

The highest priority has been giving technical assistance to schools in the area of fine arts programming. More than 100 schools have been visited mostly on request. In addition, in-depth evaluation has occurred in ten North Central visitations.

In-service workshops have been conducted or coordinated in 20 locations supported by Alliance for Arts Education funds under grant applications written by this office.

We have coordinated 25 Very Special Arts Festivals including two at the Jamestown State Hospital and one at the Grafton State School. Each of these festivals involved planning and in-service training for teachers and administrators These festivals have in most cases led to an awareness of the need for ongoing arts for the handicapped programs. The festivals are supported by funds from the National Committee Arts for the Handicapped awarded as a result of grant applications from this office.

A close relationship has been developed and maintained with the North Dakota Arts Council with whom we work in the Artists in the Schools Program.

We cooperate with the North Dakota High School Activities Association in conducting Festival Rules Clinics each fall. Sixteen such clinics were conducted during the past two years throughout the state. Attendance is mandatory for music teachers and the opportunity to be in contact with virtually every music teacher directly is extremely valuable.

Work on curriculum guides has progressed but has been slowed by some unavoidable and unfortunate circumstances. Completion and dissemination is expected to be completed this year.

We have been provided with a seat on the Board of Directors of the North Dakota Music Educators Association and the Chairmanship of that organization's Government Relations Committee.

Activities beyond the arts description include coordination of the Teacher Center Program and the North Dakota Teacher of the Year Program for the Department.

We are making progress in matching Department efforts with those of the nine North Dakota Teacher Centers, particularly, regarding staff development and in-service training.

Music and art education are showing definite signs of resurgence following a recovery from initial enrollment drops. There is a definite shortage of teachers in both art and music which makes it difficult for districts to hire additional needed personnel.

Requests for visits regarding staffing, scheduling, programming and other technical assistance continues to increase. The needs for assistance are great, particularly, with new teachers and those new to the state.

IV. Future Trends

It is of great importance to continue to advocate at least some additional help for schools who continue to employ only one music teacher. The heavy load experienced by the teacher who teaches all of the music in a school is one of the most commonly stated reasons for music teachers leaving small schools and often the profession itself. In either case the students are left without a continuous well structured music program.

Plans for the future include further development of a comprehensive arts in education program for North Dakota in cooperation with MENC, NDAEA and the appropriate college and university personnel.

A continued effort to develop sequential visual art programs throughout the state remains a top priority.

We will continue to write grant proposals to strengthen the Alliance for Arts Education and the Arts for the Handicapped Program.

Division of Instruction
Title IV Civil Rights

I. Activity Description

The Title IV Civil Rights Office provides technical assistance to any school district in the state which requests help in the area of civil rights. This includes both race and sex discrimination.

II. Goals

A. To insure equality for all people, regardless of race, sex or national origin.

III. Evaluation

During fiscal year 1981 the EEO Program of the State Department of Public Instruction was re-established. A noticeable difference from previous years of operation was that the program was funded only on a half-time basis.

The half time status of staff caused the program to operate more from a crisis management standpoint than anything else.

During fiscal year 1981 we attempted to become familiar with legislation pertaining to race desegregation and to advise schools as to our willingness to help should the need arise.

In corresponding with schools we found that what most of them wanted was money. When the schools were advised that the program had no money, we found that schools soon lost interest in EEO.

For fiscal year 1982 a comprehensive plan was put together wherein prevention was the primary focus of the program and local lenders (Indian and non-Indian living on the four reservations in North Dakota) were to be utilized. Severe budget cuts at the Federal level resulted in this not coming to pass.

IV. Future Trends

Given the present staff and budget the EEO Program can again function only in a crisis management capacity, ready to help when asked.

Division of Instruction - Resources and Services
Coordinator of Library Services and Elementary Curriculum

I. Activity Description

The Coordinator of Library Services and Elementary Curriculum provides consultative services and technical assistance to school administrators, instructors and library media personnel through correspondence, telephone conferences, school visitations and professional meetings.

The division evaluates library media and elementary curriculum programs through visitations and review of annual accreditation reports submitted by the school district.

II. Goals

A. To improve library media services in elementary and secondary schools of North Dakota.

B. To provide leadership in elementary school curriculum development in North Dakota.

C. To administer the Department of Public Instruction Professional Library.

III. Evaluation

Elementary curriculum and elementary/secondary library media consultative services and technical assistance were provided to North Dakota school administrators, county superintendents, instructors and library media personnel. In addition, coordination activities with Department personnel, State Library personnel, Teacher Center directors, public librarians, academic instructors and other personnel were conducted throughout the biennium.

Approximately 275 schools received assistance through correspondence, telephone conversations, professional meetings and 45 on-site visitations.

Cooperation with local, state and federal personnel responsible for state and regional accreditation; curriculum development; Titles I, II, III, IV, V, VI and IX; The Nutrition Education Training Program and the National Diffusion Network was highly visible. This included the monitoring of federal programs at 27 schools, serving as a member of an accreditation visitation team at eight schools and providing a variety of technical assistance and consultative services upon request.

To continue to develop professionally and to be aware of current educational trends and concerns, various local, state, regional and national meetings were attended. Membership was maintained in eight professional educational organizations, and graduate courses were taken in the area of elementary science and mathematics. In addition, as a member of the North Dakota state team, I attended the Cultural Understanding Project Seminar focusing on Japan, the Middle East and China.

Information relevant to library media programming was disseminated to all educators through the Department newsletter and directly to school librarians through fall and spring mailings. Six schools received assistance specifically for the initial development of a library and 12 schools requested on-site assistance to consolidate separate facilities into a K-12 library media center.

Library media in-service was provided within the state at eight regional and four state conferences.

Interlibrary coordination among multi-type libraries was explored at a state conference in May, 1980, sponsored by the State Library. A Northeast regional meeting, held in the spring of 1981, initiated the development of an organizational pattern that could be implemented statewide. The coordinator cooperated with the State Library personnel and other librarians by representing the schools and state agency librarians.

The Department of Public Instruction annual library report for the elementary, junior high and senior high schools was revised. Specific library documents developed and disseminated upon request by the Department include: "Periodicals in the Elementary School Library Media Center", "Junior/Senior High School Library Media Professional Tools", "Selected List of Subject Headings for a Small Elementary Library", "Library Media Skills", "Library Media Center Services...K-6" and "Library Media Center Services...K-12."

In a facilitating role, human and material resources were identified for school personnel requesting information relating to a specific curricular area. Materials in the Department were disseminated upon request. Schools involved in a self-study process examined the curriculum and instructional program as it related to the local educational philosophy and goals. Upon request assistance was provided as a member of the visitation team or as a resource person to the school or team members.

Assistance in curricular development over this biennium included the Junior High School Music Guide, the Elementary Art Guide, the North Dakota STUDY Project and related elementary North Dakota studies material as well as examination of the K-12 Language Arts instructional program.

In-service relating directly to elementary curriculum was conducted at six schools, eight regional meetings and two state conferences including regional in-service relating directly to elementary North Dakota materials and a state level in-service focusing on global education were conducted.

The curriculum library, a depository of new textbooks for sale in North Dakota for bonded publishers, has been updated. Educators involved in textbook selection on a local level have been encouraged to utilize these services.

A professional library containing a collection of 3,025 volumes, 108 periodicals and a number of microfiche was made available to the Department staff and other personnel. The library continues to provide services through the North Dakota Network for Knowledge.

Due to time and financial constraints not all the activities planned for the biennium were met, including 1) the project to examine elementary curriculum in North Dakota, 2) the elementary library media handbook for small rural schools, 3) a listing of elementary library media professional tools, 4) examination, recommendations and development of K-12 language instructional program guidelines, and 5) school resource selection guidelines.

With the present level of support the coordinator was able to complete approximately 75 percent of all requested on-site visitations, to respond to approximately 75 percent of the informational requests, to complete 25 percent of the initiated projects and to administer the Department professional and elementary curriculum library with a slight decrease in the number and extent of services.

IV. Future Trends

There appears to be a need for continued state agency leadership in both library services and elementary curriculum. In order to insure that students reach their full potential, the school library must provide a variety of resources which can be retrieved and utilized efficiently and effectively. States that have a graduate library program may have the availability of state leadership at the academic level. In states, such as North Dakota, the state educational agency serves in a leadership role in redefining the role of the library.

As administrators and instructors continue to develop and improve the instructional program on a local level to insure that students reach their potential, the state educational agency leadership role in curriculum evaluation and development continues to be beneficial to all public and non-public schools.

Short and long term goals in this area will continue to be to provide technical and consultative services necessary to enable public and non-public schools to provide a quality basic education and to meet the individual needs of each student.

Division of Instruction - Resources and Services
Adult and Career Education and Youth Employment Training Program

I. Activity Description

The Career Education program had been funded 100 percent under P.L. 93-380 to develop a State Plan for Fiscal Year 1976-77. The purpose of this grant was preparation for a statewide implementation of career education to be conducted under the New Career Education Implementation Act, P.L. 95-207. The Law requires each state to receive monies for implementation of career education. The State Education Agency responsible for Elementary and Secondary Education will receive the allocation.

The Adult Basic and Secondary Education program (ABSE) provide Adult Basic (1-8) and secondary education (9-12) to those highly in need of these services. The ABSE programs also provide GED preparation courses.

The State Career Education Office coordinates the Youth Employment Training Programs with North Dakota Job Service.

II. Goals

A. To promote the concept of career education in schools and communities throughout North Dakota.

B. To facilitate the implementation of Career Education Plan throughout North Dakota in the elementary and secondary schools.

C. To monitor and record incremental changes in the schools implementing career education.

D. To up-date the state plan yearly to accommodate student, teacher, business/industry and parent needs.

E. To provide technical assistance to elementary and secondary schools.

F. To administer the ABSE programs.

G. To coordinate the Youth Employment Training programs.

III. Evaluation

Career Education programs in North Dakota were funded as a result of the P.L. 95-207 Elementary and Secondary Act of 1977. The State was allocated $250,000 for this biennium, with 80 percent of the total allocation going to the LEAs for program planning and implementation.

The Department funded 24 Career Education projects in 1978-80 and 21 projects in 1980-81. The funding of each project was based upon the state guidelines issued by the Office of Education.

During each year the division was involved in preparation and dissemination of information regarding Career Education to educators, school boards, business/industry and the public.

Technical assistance and staff development sessions was provided to 34 schools regarding Career Education. This included identification of career development resources to be used by schools.

Awareness sessions on reduction of sex, race, socioeconomic status and other handicapped stereotyping were conducted. In-service sessions for special interest groups such as the special education population, Native Americans and women were also conducted.

The major problem facing Career Education seems to be a lack of preparation of new teachers coming out of teacher training institutions. With no funding available for higher education program development, the interest shown at higher education levels has been minimal.

Since the transfer of ABSE administrative functions in 1979, the project has experienced considerable state staff changes and consequently program development has slowed down considerably.

The project has been operating with federal allocations to the state. An attempt was made to supplement the growing needs of ABSE through state funding, however, no monies were appropriated for expanding the ABSE programs at this stage.

The State Department funded 43 programs of Adult Education during this biennium. Two of these programs of 310 nature were established in Dickinson (Call Project) and West Fargo. The project as provided by law provides professional in-service and technical assistance in the area of Adult Basic Education instruction.

Approximately 4,000 adults were served with the 41 ABSE programs. The ABSE programs provide Adult Basic and Secondary Education to those highly in need of these services. The ABSE programs also provide GED preparation courses. In addition to LEA programming, the State has two educational programs at the State Penitentiary and at the State Hospital.

The Department of Public Instruction in cooperation with North Dakota Job Service was able to administer 8-12 Youth Employment Training Programs. The programs were coordinated through the State Career Education Office.

The selection of the 12 projects was made by the North Dakota Job Service based upon the guidelines issued by the agency in cooperation with the Youth Employment Training Council.

Each project site was visited and monitored by Department personnel. Staff development workshops were held in the area of career development and program implementation.

The projects were well coordinated through the local Job Service, North Dakota, Job Service, State Department of Public Instruction and all the local education agencies. These programs proved valuable for almost all Special Education programs. Unfortunately, with the CETA funding costs the projects will not be refunded for the next biennium.

IV. Future Trends

The Department of Public Instruction will continue to support the Career Education effort based upon the availability of federal and state funds. The LEAs have indicated renewal interest in the creation of career development programs in various forms. The Department supports a comprehensive career development program and will continue to provide services to those attempting to accomplish that goal.

The ABSE program needs have been growing throughout the state as evidenced by the LEA applications received by the State Office. Each existing program requested expansion of their project. However, the expansion had to be curtailed due to lack of funding.

The Department will continue to support the efforts of LEAs in development of local programs and work directly with other agencies in providing needed services to the citizens of North Dakota.

Division of Instruction - Resources and Services
Director of State and Federal Relations

I. Activity Description

The Director of State and Federal Relations serves as the liaison between the Department of Public Instruction, the North Dakota Congressional Delegation, and the U.S. Office of Education in cooperation with the Council of Chief State School Officers. The Director also serves as the administrator of Title IV-B P.L. 93-380, the Elementary and Secondary Education Act (ESEA), which includes the allocation of funds to the school districts. Funds under Part B are allocated to the local school districts on the basis of a formula which includes four factors: greater than average tax effort, children whose education imposes a higher than average cost per child, children living in sparsely populated areas, and the remainder based upon enrollment.

Aid and advise is given to schools in the planning of programs and in the selection of equipment, facilities, and materials as are now established in the regulations of the Department of Public Instruction in the fields of science, mathematics, modern foreign languages, social studies, English, reading, industrial arts, the arts and humanities, audiovisual materials, library resources and textbooks.

II. Goals

A. To serve as the Department of Public Instruction liaison.

B. To assist local educational agencies (LEAs) in the acquisition of necessary books, educational materials, library resources and instructional equipment.

III. Evaluation

The purpose of Part B is to assist local educational agencies (LEAs) in the acquisition of necessary books, educational materials, library resources, and instructional equipment. Specifically, the amounts allotted to each state for the purposes of Part B shall be used by LEAs for the acquisition of school library resources, textbooks, and other printed and published instructional materials for use of children and teachers in public and private elementary and secondary schools which shall be used for instructional purposes only; and for the acquisition of instructional equipment and materials suitable for use in providing education in academic subjects for use by children and teachers in elementary and secondary schools which shall be used for instructional purposes only.

Grants for these purposes are awarded to the states each fiscal year. From the total amount available for Title IV, Part B for allotment in any fiscal year, the Secretary allots to each state an amount proportionate to the number of children aged 5-17 in the state, as compared with the total number of children in all of the states.

Title IV, Part B program requirements provide for the distribution of Part B funds to LEAs on the basis of their public and private school enrollment except that states are also required to award, in accordance with criteria specified by the Secretary, higher per student allocations of Part B funds to certain LEAs whose tax effort is high and who have large numers of children whose education imposes a higher than average cost, such as children from low-income families, children living in sparsely populated areas, and children from families in which English is not the dominant language. The amounts per child in each of the special categories must be at least equal to the amount for the enrollment.

Funds are distributed to LEAs to provide materials and equipment under Part B for the use of private school children on an equitable basis with public school children and according to the respective needs of the public and private school children.

A state must give satisfactory assurance that the state, its LEAs, and its private schools shall have expended on Part B program purposes during the preceding fiscal year an amount of non-federal funds that at least equals the amount of non-federal funds expended for those purposes during the second preceding fiscal year. The SEA must collect and maintain data (including private school data) to verify compliance.

The Transition Program for Refugee Children is funded under the Refugee Act of 1980 (P.L. 96-212). This program provides educational services to meet the special educational needs of eligible refugee children. Eligible refugee children means those children whose parents hold or they themselves hold Alien Registration cards classified by the Immigration and Naturalization Service as "Refugee" and are enrolled in public and nonprofit, private elementary and secondary schools.

Funds are provided to state education agencies by formula grants. The formula includes weighted components to ensure that the program addresses the most critical education needs. In this system, older students are weighted more heavily than younger, and recent arrivals more heavily than other refugee students.

In North Dakota, the special services planned by educational officials include English as a Second Language (ESL). ESL is a highly structured shortcut to learning English that emphasizes listening and speaking, then reading and writing. As soon as children can function in English, they are "mainstreamed" into the regular school program. School officials use the ESL program because while teachers do need some training in ESL techniques, they don't need formal training in another language.

During the 1980-81 school year, the Department of Public Instruction distributed $19,265 to North Dakota school districts serving eligible students. Seventeen school districts reported the enrollment of refugee children. The total number of refugee children served was 131.

IV. Future Trends

Title IV-B is one of the existing programs to be included in the block grant program for elementary and secondary school improvement at the local level. It is anticipated that the State Plan for administering the block grant program will continue to provide funds for the purposes described in the present Title IV-B program.

Division of Instruction - Resources and Services
Coordinator of Math and Science

I. Activity Description

The Coordinator of Math and Science provides consultative services to administrators and teachers, curriculum development, and communication.

Consultative services involve on-the-spot visits, telephone conversations and letter writing.

Assistance is offered to school districts in the area of laboratory planning and promotion of metric education in all schools.

II. Goals

A. To visit schools to review the science and mathematics programs, review Title IV-B programs and participate in NCA evaluations.

B. To provide consultative services to school districts.

III. Evaluation

When a school is visited, the first step is a short visit with the superintendent or principal, and then a visit to as many science and mathematics teachers as possible. The Title IV-B program is also checked in most of the schools visited. During school visits time is spent discussing the science and/or mathematics curriculum. Topics such as individualized instruction, tracking, non-college bound students, laboratory programs and microcomputers are discussed.

In the area of communication the Newsletter was sent to all secondary science teachers, secondary mathematics teachers, superintendents, and others who have requested to be on the mailing list. The Newsletter attempts to keep the teachers informed and involved in things of interest.

The consultant sent out material to select the West Virginia National Youth Science Camp participants from North Dakota. The Spacemobile program was scheduled for 21 schools for the fall of 1980. Meetings were attended in the state, such as administrator's conference, science assessment, workshops, computer meetings, energy and others.

Many questions were being asked about microcomputers. A questionnaire was prepared and a survey was conducted regarding the status of microcomputers in the state. The results were tabulated and have proven a good source of information.

The questions for the North Dakota Science Assessment (grades 4, 8 and 11) were printed and sent to a random sample of schools. The test results, summary and conclusions will be ready for the fall of 1981. Many questions were taken from NAEP, and thus, will provide comparisons.

IV. Future Trends

There is a continuing need for consultative services in science and mathematics. Teachers and administrators will probably always need help in the basic curriculum needs. This includes consultation on a one-to-one basis as well as group in-service work.

Division of Instruction - Resources and Services
Administrative Consultant Services

I. Activity Description

The Department of Public Instruction staff visits as many school districts as possible to assist them in developing Title IV, ESEA programs. The personnel attends local, state, regional and national conferences relative to Title IV, ESEA and coordinates school visitations.

II. Goals

A. To administer, fund and assist local school districts to develop programs for Title IV, ESEA.

B. To serve as Executive Secretary of the State Advisory Council for Title IV, ESEA.

C. To coordinate consultative services in the Department of Public Instruction.

III. Evaluation

During the previous biennium, Title V of the Elementary and Secondary Education Act (ESEA) supported various administrative and consultative functions of the Department. These functions included the following: 1) general administration of the office of the deputy superintendent in regard to federal programs; 2) indirect costs to support general budgeting and accounting procedures; 3) data collection and dissemination; 4) administrative functions for the purposes of Titles IV-B and C - exemplary and innovative programming and supplementary supplies, materials, and equipment; 5) the support of consultative functions for elementary and secondary education; 6) curriculum consultation; 7) library/media services; and 8) certain functions within special education.

During the 1979-80 school year 239 schools were visited at least once. Title IV, ESEA P.L. 95-561 monitoring was conducted at 93 schools during this period. The number of schools visited during the 1980-81 school year was 256 with 84 school districts being monitored relative to Title IV, ESEA P.L. 95-561.

The number of visitations indicates that the Department of Public Instruction is a service organization interested in providing assistance to school districts to improve instruction for all children in the state.

IV. Future Trends

As federal support lessens, many of the consultative functions will be decreased and/or shifted to other personnel. Two high-order priorities will determine the staff functions: statutory requirements and monitoring activities. To assist with monitoring and consultative functions which are decreasing because of shrinking federal support, the roles and functions of the county superintendents are being enhanced through inservice education and administrative restructuring.

To provide needed technical assistance to the staff and schools, consultants will be employed on an ad hoc basis. For example, schools and educators will receive assistance in information dissemination and individualizing instruction.

STATE OF

DEPARTMENT OF PUBLIC INSTRUCTION
THE BIENNIAL REPORT

NORTH DAKOTA

July 1, 1981 to June 30, 1983

Dr. Joseph C. Crawford
Superintendent of Public Instruction

FOREWORD

The Biennial Report of the Department of Public Instruction of the State of North Dakota for the 1981-83 Biennium has been compiled as required by Sections 54-06-04 and 15-21-14 of the North Dakota Century Code. The report contains a list of goals, objectives and activities; a summary of activities; an explanation of difficulties encountered; a listing of unfinished work; and a projection of future trends for each unit under the divisions of administration and instruction.

The report also contains miscellaneous information regarding publications produced by the Department, the availability of minutes of meetings, and required statistical reports.

Dr. Joseph C. Crawford
Superintendent of Public Instruction

Superintendent's Office

I. Goals, Objectives and Activities Operable During Biennium

The Superintendent of Public Instruction is given the authority for the general supervision of the elementary and secondary schools for the State of North Dakota.

The Superintendent's Office supervises the Department's activities, personnel, administrative and consultative functions as they relate to the superintendent's statutory authority over the state's elementary and secondary schools.

The Superintendent is an ex-officio member of the Board of University and School Lands, the State Board of Public School Education and Vocational Education, the Teachers Fund for Retirement, and the North Dakota High School Activities Association. He oversees the Education Fact Finding Commission and the Teachers' Professional Practices Commission. He insures sponsorship of the North Central Association, and his office acts as legislative liaison.

II. Summary of Accomplishments

The "Each Student Is Special" project was developed to insure that every child, in addition to handicapped children, would receive the most appropriate education possible. Twelve schools the first year and 18 schools the second year voluntarily agreed to develop an individualized education plan for every child in the school system.

A pilot program to train more teachers in the area of mathematics was begun in the summer of 1982. In cooperation with North Dakota State University, the Department developed a six-course mathematics curriculum for use with available software and microcomputers commonly found in North Dakota high schools.

A North Dakota history book, North Dakota: A Living Legacy, was written, with 6,000 copies estimated to be sold and distributed by the beginning of the 1983-84 school year.

A study relative to certification standards in 50 states was completed, and accreditation standards were completed and implemented.

A greater emphasis was placed on adult education, and as a result, people receiving GED certificates increased by 25 percent.

During the biennium, a program was implemented to give women opportunity for advancement. Support staff was encouraged to take advantage of continuing education classes, and the Department offered to pay full tuition for satisfactory completion of courses pertinent to employees' positions. Additionally, the Department of Public Instruction offered to pay 50 percent of the membership fees in Professional Secretaries International to provide the opportunity for support staff to associate on a professional basis with peers. Eight women in support staff positions were promoted to professional staff, and five women now occupy executive-level positions. In 1981, after the legislature awarded a 9 percent increase in state salaries, Department of Public Instruction support staff received an 11 percent increase while professional staff received 7 percent, to help offset the disparity in wages.

The Department implemented a Personnel Review and Development Plan, and redefined and updated job duties and responsibilities of all staff. Staff members were consolidated and physically relocated to facilitate unit integrity and to provide direct line and staff accountability. Full-time equivalent positions were reduced by 14 percent. Administrative monies appropriated ($7,026,609) were reduced by 15 percent ($5,937,614 expended).

Also, the Department initiated a uniform filing system, developed a records retention system and expanded word processing services through better utilization of equipment, adding a printer and input device, and providing backup operator training.

Internal budgeting and accounting were centralized and preparations made to convert to the new statewide accounting system.

III. Difficulties Encountered

Federal cutbacks in funding necessitated staff reductions, and as a result, several programs have been eliminated or combined.

IV. Unfinished Work

The Department plans to continue its long-range goals to have individualized programs to meet the needs of all children in the state. Research will continue relative to merit pay for teachers, as well as to the encouragement of prospective teachers to enroll in programs for mathematics and science, to meet the need in these areas. The Department of Public Instruction initiated the development of an English and mathematics curriculum guide for grades 1-12, both due for completion by the fall of 1984.

V. Changes, Trends and Future Directions

A return to the basics and an increase in graduation requirements seem to be the pervading issues in education. The Department will be working with others in the education community to respond to the findings of the National Commission on Excellence in Education, and the North Dakota Governor's Conference on Education. Another aspect needing research is the technical area of computers and their importance in the classroom.

Plans have been implemented to redirect federal administrative monies in the form of direct grants to schools for microcomputers. As a result, it is anticipated that more than 100 small schools will receive these computers for use and instructional purposes during the 1983-85 biennium.

Small and rural school needs have been addressed in two annual rural school conferences. An in-depth survey of 19 small high schools with 7 on-site reviews has produced data on the strengths and needs of smaller schools. These needs will be translated into goals and activities which will be addressed by Department staff.

As part of the revised accreditation system, a school improvement process is being initiated through four steps: a planning phase, the self-study, a team visit, and follow-up procedures. The entire process encourages schools to clearly define their goals and objectives and to determine how well these are being attained. Additionally, steps are outlined to address the validated needs.

To overcome the lack of technical assistance in specific curricular areas, a state-level curriculum council has been established. This council advises the Department in all areas of curriculum development and suggests priorities for funding of various projects.

Three field coordinators have been established by the Department of Public Instruction to provide more direct services and to assist with the identification of problems and various solutions to those problems. At the same time, the coordinators have facilitated the inservice training of the county superintendents in the areas of school food programs, school budgeting and financial accounting, and federal grant programs.

Additionally, the Department has accepted responsibility for a significant increase in the number of programs administered; the President's Commodity Food Distribution, Child Care and Summer Care Food programs, Displaced Homemakers and Bilingual Education are all new programs the Department of Public Instruction has undertaken to serve North Dakota. Expansion of the GED program, Equal Education and Sex Equity programs will also serve to broaden the overall educational spectrum of the state.

Certification

I. Goals, Objectives and Activities Operable During Biennium

The Office of Certification has the responsibility of issuing North Dakota Educators Professional Certificates to qualified applicants; approving General Educational Development (GED) testing for applicants and issuing the North Dakota High School Equivalency Certificate; issuing School Administration Credentials to qualified applicants; servicing, maintaining and conducting the professional business of the Teachers' Professional Practices Commission; and informing, guiding and advising teachers, administrators, school boards and the general public on teacher certification.

II. Summary of Accomplishments

The first major assignment involved evaluation and approval of applications for teacher certification in the 1981-83 biennium. Awarded were 1,953 two-year entrance certificates, 1,288 two-year renewal certificates, 1,564 five-year renewal certificates, and 22 alien certificates.

The second major assignment involved approval and issuance of 3,619 high school equivalency certificates for the calendar years of 1981, 1982 and 1983.

The third area involved evaluation and/or issuance of credentials for school superintendents, secondary principals and elementary principals, with 231 certificates for elementary principals, 296 certificates for secondary principals, and 263 certificates for superintendents.

III. Difficulties Encountered

All of the assigned responsibilities share equally in importance regarding satisfactory performance. Constant troubleshooting and problem solving require the most perseverance. Application of the regulations must be consistent and extremely thorough, and criteria must be constantly reenforced because of a constantly changing clientele, requiring extreme patience and enthusiasm on the part of the administator.

IV. Unfinished Work

The overall certification system includes microfilming records, which has been temporarily shelved because of lack of funds.

V. Changes, Trends and Future Directions

Future changes in teacher certification could well include competency-based criteria to increase public confidence in the profession of teaching.

Curriculum

I. Goals, Objectives and Activities Operable During Biennium

The Curriculum Unit provides curricula (K-12) assistance to North Dakota public and nonpublic schools through communication with educators, curriculum development activities, distribution and identification of resources, and dissemination of information. The unit also has established the North Dakota Curriculum Council, and administers the National Diffusion Network State Facilitator project.

Library media services are improved in North Dakota elementary, junior high and secondary schools by revision of standards and guidelines, administration of library media credentials, and library media visitations.

The Curriculum Unit administers the Department of Public Instruction Professional Library acquisition, processing and circulation of resources, and retrieval and identification of resources for staff.

Cooperation with state and national agencies and organizations relating to curriculum is accomplished by unit response to requests for information, and maintenance of an awareness of curriculum concerns, issues, directions, and activities on a state, regional and national level.

II. Summary of Accomplishments

The North Dakota junior high school textbook, North Dakota: A Living Legacy, was piloted in 12 schools, as one project of the curriculum unit. Another project was the establishment of the North Dakota Curriculum Council, comprised of representatives from 23 educational associations, in 1982.

The third year of the four-year NDN State Facilitator Project was completed, and the unit assisted in the production and distribution of "WOW II, Especially for the Young People of North Dakota," and "Souvenir Passport."

III. Difficulties Encountered

Financial and time constraints curtailed or minimized many activities.

IV. Unfinished Work

Work yet to be completed as of June 30, 1983, includes the printing and distribution of the text North Dakota: A Living Legacy, an elementary art curriculum, junior high school physical education units, a junior high school music curriculum, and K-12 language arts curriculum.

V. Changes, Trends and Future Directions

Future plans of the Curriculum Unit include the completions of North Dakota: A Living Legacy and other curriculum projects, especially the K-12 language arts curriculum, and continuation of the North Dakota Curriculum Council and other current goals.

Driver Education and Traffic Safety

I. Goals, Objectives and Activities Operable During Biennium

The Division of Driver Education and Traffic Safety provides guidelines for classroom and behind-the-wheel training to North Dakota driving students. This training enables them to take the drivers license examination provided by the state Highway Patrol.

The division also ensures that driver education teachers hold state credentials and are qualified to teach driving, and provides students with completion certificates indicating the amount of training they have received.

Motorcycle training programs sponsored by schools or organizations are approved by the driver education division. The sponsoring organization is reimbursed for approved programs, through funds collected through motorcycle registrations and administered through the Department of Public Instruction.

II. Summary of Accomplishments

Approximately 10,000 students per year were served by driver education courses. The state required 20 classroom hours of driver education as a graduation requirement, but a school had to provide 30 classroom hours plus six behind-the-wheel hours for a student to receive classroom credit.

III. Difficulties Encountered

None

IV. Unfinished Work

None

V. Changes, Trends and Future Directions

Changed graduation requirements, which deleted driver education as a requirement, could have a significant effect on the driver education program. The number of schools offering the classes and the number of teachers could drop significantly.

Education Consolidation and Improvement Act

I. Goals, Objectives and Activities Operable During Biennium

Chapter 1 provides financial assistance to state and local educational agencies to meet the special needs of educationally deprived children in attendance areas having the highest concentration of low-income children. Chapter 2 consolidates a number of programs with the goal of providing state and local educational agencies with the flexibility of setting their own priorities, and in that way provides funds to improve elementary and secondary education.

II. Summary of Accomplishments

Chapter 1 is a streamlined version of the former ESEA Title I program, with fewer restrictions and greater flexibility. This program provided no problems for the local districts, and served over 7,000 children in 255 participating school districts.

Chapter 2, which consolidated a number of categorical programs into block grants for the states, has been well accepted by the local school districts. The block grant allows schools to develop their own programs within three broad categories: basic skills, school improvement, and special projects. Participation in the Chapter 2 program has been excellent. Schools enrolling over 99 percent of the students in North Dakota submitted applications.

All nonpublic schools were contacted, and all public school districts that included nonpublic schools have agreed to administer services relating to these programs to students wishing to participate who are enrolled in nonpublic schools.

III. Difficulties Encountered

None

IV. Unfinished Work

None

V. Changes, Trends and Future Directions

None

Education Fact-Finding Commission

I. Goals, Objectives and Activities Operable During Biennium

The Education Fact-Finding Commission was established under Section 15-38.1-03 of the North Dakota Century Code, and has been charged with investigating situations in which impasse has occurred between school boards and teacher groups in resolution of contract terms.

The recommendations of the commission are not binding, and schools have the option of accepting, partially accepting, or rejecting suggestions of the commission.

II. Summary of Accomplishments

In the period between July 10, 1981, and June 18, 1983, 21 impasse hearings were conducted at schools throughout North Dakota, with 15 hearings held during the 1981-82 school year and six held during the 1982-83 school year. In addition, 11 schools which had declared impasse, or where impasse seemed imminent, were able to resolve difficulties in negotiations without hearings, with the help of the commission.

III. Difficulties Encountered

Laws passed by the Legislature regarding negotiations, contract settlements and binding arbitration should be made with input from the commission. In that way, the commission would be able to work with the laws instead of around them.

IV. Unfinished Work

No cases remained to be heard as of June 30, 1983. However, some contracts were still in negotiation and could result in impasse situations.

V. Changes, Trends and Future Directions

The number of contract difficulties and impasse situations fluctuates according to economic conditions and new state legislation.

Elementary Education

I. Goals, Objectives and Activities Operable During Biennium

The Elementary Education Unit assumes major functions concerning the supervision of elementary education in the state. Through the approval process, the Elementary Unit is to guarantee the minimum statutory requirements for schools (grades K-8) based upon uniformity of course offerings, length of school year, teacher certification, and other agency review of health, fire and safety codes.

Through the accreditation process, the Elementary Unit encourages quality programming above the minimal requirements of the statutes.

The unit provides consultative services to all state and local departments and agencies which directly or indirectly provide services to all elementary school-age children in the state, so that the needs of elementary education may be more adequately met.

Under ECIA Chapter II, the Elementary Unit reviews basic skills proposals, provides technical assistance, and monitors the schools receiving funds for basic skills.

II. Summary of Accomplishments

The Elementary Unit accredited approximately 394 elementary schools for 1981-82, and 400 elementary schools for 1982-83. Approximately 461 elementary schools for 1981-82 and 466 elementary schools for 1982-83 were approved.

Unit personnel represented the Department of Public Instruction at approximately 101 meetings and visited 91 schools.

III. Difficulties Encountered

A reduction in unit personnel and a restriction on travel has resulted in less consultative services to schools in the content areas and administration, fewer school visitations, less inservice provided to school districts, and less participation by unit staff in professional development activities.

IV. Unfinished Work

Two projects yet unfinished at the end of the 1983 fiscal year are publication of the School Improvement Manual, and the Each Student Is Special project.

V. Changes, Trends and Future Directions

Additional private schools are opening which necessitates more work on the approval process. Increased numbers of schools are becoming involved in the school improvement process, which necessitates additional time for overseeing the process.

The continued emphasis on Each Student Is Special (ESIS) places an additional burden on the Elementary Unit in administration.

Finance and Reorganization

I. Goals, Objectives and Activities Operable During Biennium

The Finance and Reorganization Division provides assistance to local school districts and counties, and cooperates with other state and federal agencies in the area of budgeting and accounting for funds supporting education. It also provides assistance to local school districts in the area of school district reorganization and annexation.

The division assists school districts in implementing the double entry modified accrual accounting system, and assists small school districts in providing greater educational opportunities for their students by shared services with other districts.

State foundation aid is distributed by this division according to Legislative intent, inservice training is provided for school district clerks, and the Legislature is given current education cost data.

II. Summary of Accomplishments

As of July 1, 1983, all school districts were on the double entry accounting system, 15 school districts in the state are operating cooperative programs, and 100 school districts received assistance in the areas of annexation, reorganization, cooperative programs, increased levies, and budgeting.

Financial data was provided to the 1983 Legislative session, and state foundation aid and transportation were distributed as per Section 15-40.1 of the North Dakota Century Code.

Sixteen inservice sessions were provided to school district clerks in eight areas of the state.

III. Difficulties Encountered

Implementing the modified accrual accounting system will be an ongoing inservice program as school district clerks change.

The shortfall of state funding for the foundation aid program posed difficulties for this division.

IV. Unfinished Work

Work continues on the implementation of the double entry modified accrual accounting system statewide, and on compilation of state school district finances.

V. Changes, Trends and Future Directions

Financial data will be more efficiently reported under the modified accrual accounting system, and funding should stabilize under the 1983 Legislature's guarantee of the state aid payment for 1983-85.

The division will be studying methods of education funding other than the current foundation aid formula, taking into consideration sparsity of funds.

Foundation Program

I. Goals, Objectives and Activities Operable During Biennium

The goal of the 1981 Legislative assembly was to support public, elementary and secondary education at 70 percent of the average cost per pupil on an equalized basis.

II. Summary of Accomplishments

Pupil payments were set at $1,425 per weighted unit for 1981-82 and $1,591 per weighted unit for 1982-83. Aid for transportation was set at 34 cents per mile for 1981-82 and 36 cents per mile for 1982-83 for buses having a capacity of 16 or fewer pupils, and 68 cents per mile for 1981-82 and 76 cents per mile for 1982-83 plus 19 cents per day per pupil transported in school buses having a capacity of 17 or more pupils. In-city transportation was set at 9.5 cents per rider time. Family transportation was to be reimbursed at the rate of 10 cents per mile one-way. The appropriation for foundation payments was $388,704,876 plus $29,877,400 from the state tuition fund.

The analysis of the foundation program payments and tuition apportionment payments are as follows:

	Legislative Appropriation	Actual Amount	Variance
Pupil Payments	$385,961,408	$356,927,831	$29,033,577
Less 20 Mill District Levy	34,972,000	35,373,055	401,055
Net Pupil Payment	350,989,408	321,554,776	29,434,632
Transportation Payment	37,715,468	37,169,376	546,092
Net Payment From State	$388,704,876	$358,724,152	$29,980,724
Tuition Apportionment	$ 29,877,400	$ 31,600,431	$ 1,723,031

III. Difficulties Encountered

Due to a shortfall in the amount of oil extraction tax collections during the 1981-83 biennium, the pupil payment of $1,591 for 1982-83 was reduced to $1,353 per weighted unit. Emergency appropriations in the amount of $25 million from the Lands and Minerals Trust Fund plus $6 million from the state's general fund were used to replace some of the oil extraction tax shortfall to bring the payment to $1,353.

IV. Unfinished Work

None

V. Changes, Trends and Future Directions

If the state is to maintain the level of payment set in the 1981-83 biennium, it will be necessary to increase the state's share of funding.

Guidance and Counseling, Career Education and Adult Basic and Secondary Education

I. Goals, Objectives and Activities Operable During Biennium

The Guidance and Counseling, Career Education and Adult Basic and Secondary Education Unit has been established to enable adults to acquire basic skills necessary to function in society, and to acquire General Education Development (GED) certificates. The unit provides counseling and employability skills to adults so they might obtain marketable skills to aid in securing employment.

The administration of ESEA Title IV-C programs, the State Facilitator project, and Guidance, Counseling and Testing programs are coordinated through this office.

Other tasks of the unit are to promote the concept of Career Education throughout North Dakota, to facilitate the implementation of the Career Education Plan, to upgrade the existing Career Education Plan in the state, and to monitor and make appropriate recommendations for program improvement.

II. Summary of Accomplishments

Approximately 30 Adult Basic Education programs operated each year throughout North Dakota during this biennium. Programs were funded through the North Dakota State Adult Education grant through the U.S. Department of Education.

Approximately 2,000 adults received GED certificates through the efforts of ABE programs in the state. All adult education programs offer employability skills and counseling to participants.

The state department funded approximately 83 educational projects under the Elementary and Secondary Act (Title IV-C) to elementary and secondary schools in the state.

Seven National Diffusion Network (NET) projects were adopted in elementary and secondary schools. The majority of these projects were related to basic skills and computer education. The state facilitator also provided several NDN awareness workshops throughout the state.

The unit provided technical assistance and monitoring of Guidance and Counseling programs throughout the state. The majority of the project sites were monitored, and review of guidance credentials and program evaluation was also provided.

The Guidance and Counseling Division also planned the State Testing Program, ordered materials for schools, and provided technical assistance upon request. The unit assisted schools in the North Central Association (NCA) accreditation process in improvement of Guidance, Counseling and Testing programs.

Area meetings and summer workshops were held, and 54 projects in Career Education were funded under a special federal grant to the state. The projects were designed to enhance the curriculum techniques and strategies to infuse Career Education concepts into the regular program.

The state plan for Career Education was upgraded as originally planned. A resource guide for Career Education materials was developed and distributed to schools. An overall needs assessment was conducted for Career Education program planning.

III. Difficulties Encountered

The federal budget reduction requested the Department to scale down its programs and staff, as originally planned for this biennium.

IV. Unfinished Work

Consolidation of programs and responsibilities by the Department have met the majority of goals set for the biennium.

V. Changes, Trends and Future Directions

In view of federal budget restraints, the operation of programs will have to be scaled down to meet the necessary requirements by the schools. The Department will furnish technical assistance and program evaluation.

Indian Education Programs

I. Goals, Objectives and Activities Operable During Biennium

The Office of Indian Education Programs became a unit within the Department of Public Instruction on March 15, 1982. The broad goal of the office is to advocate improved educational opportunities for Indian students attending schools in the state.

Race and Sex Equity (Title XI) are programs that came into the administration of the Office of Indian Education Programs.

The objectives of this unit are to promote the concept of race and sex desegregation throughout North Dakota schools, and to provide technical assistance to North Dakota schools where race and sex equality desegregation are taking place.

Inservice training is provided at the school level in race relations; the promotion of desegregation relations to communities is carried out through public meetings, workshops and seminars.

II. Summary of Accomplishments

During the 1982-83 fiscal year, the office was involved in curriculum bilingual education projects for schools serving Indian children. Nine schools submitted proposals for bilingual education funding, with seven being funded for the 1983-84 school year. The University of North Dakota and three tribally controlled community colleges were also funded for a bilingual education teacher training project.

During the last part of the biennium, an Indian Youth Leadership Institute was held for Indian students across the state. The conference was a success and will continue in the future.

The race desegregation component was funded under a federal grant for a brief period. A number of contacts with schools was made regarding race relations. The sex desegregation grant was awarded to the Department of Public Instruction with a sub-contract arrangement with North Dakota State University for the 1982-83 fiscal year. Approximately 60 schools were contacted in providing sex equity services. NDSU had been the recipient of a similar program for six years, and were subcontracted to retain expertise.

III. Difficulties Encountered

Noted difficulties in achieving the goals of the race equity component included the loss of time between the appointment of the current director of the program and the previous administrator. For the first eight months of the grant period, very few activities were held or accomplished.

IV. Unfinished Work

None

V. Changes, Trends and Future Directions

A future focus of the Office of Indian Education Programs will be educational equity with special emphasis on the education of Indian children.

Nonpublic Schools

I. Goals, Objectives and Activities Operable During Biennium

The Office of Nonpublic Schools was established July 1, 1982, to serve as a liaison from the Department of Public Instruction to nonpublic schools in the state. The office orients private school systems to block grant procedures and participation they are entitled to receive; conducts inservice workshops for nonpublic administrators on evaluation, accreditation and approval procedures; assists the directors of elementary and secondary education in conducting inservice workshops for total school evaluation program, for both public and nonpublic schools; and acts as liaison between the Department of Public Instruction and the Office of Private Education in the U.S. Department of Education. The director of the office also acts as the southeast regional coordinator for the Department of Public Instruction for public schools.

II. Summary of Accomplishments

Since July 1, 1982, the director of the office visited all nonpublic schools and administrators, including Catholic, Seventh Day Adventist, Lutheran, Evangelical and Baptist schools. Many public school superintendents in southeast North Dakota were also visited. The director served as chairperson of visitation for the Association for Evaluation of Elementary Schools (AEES) at Mayville-Portland, Ellendale, and Little Flower Elementary School at Minot. The director also acted as a consultant for School Improvement Process at Wyndmere and Wahpeton Indian School. He interviewed the finalists for Teacher of the Year for 1983, and chaired and acted as liaison to the steering committee for adoption of Articles of Association for the State Association of Nonpublic Schools (SANS).

The director spoke at a seminar on private education at the University of North Dakota, and on private education at St. Mary's School "FUTURE" organization at Grand Forks, and at the Dickinson Rotary Club. He also attended the National Commission on Excellence in Education at Hopkins, Minnesota.

The director worked with the directors of elementary and secondary education and certification regarding approval, accreditation and certification problems in nonpublic schools.

Two newsletters were sent out of the Office of Nonpublic Education, and the director attended numerous conferences and workshops across the state.

III. Difficulties Encountered

None

IV. Unfinished Work

The State Association of Nonpublic Schools (SANS) had just begun before the end of the 1981-83 biennium, with date for finalization of organization set for September, 1983.

V. Changes, Trends and Future Directions

The office will continue to promote the need for nonpublic schools as an alternative, to encourage public and nonpublic schools to cooperate in providing the best possible education for future generations, to be involved in the school improvement process in public and nonpublic schools, to serve as liaison to SANS, to promote further establishment of the Each Student Is Special project, and to provide better visibility to public school districts in southeast North Dakota.

Pupil Transportation/School Construction

I. Goals, Objectives and Activities Operable During Biennium

The responsibilities of the Pupil Transportation Unit include the development of standards for school buses and the operation of the buses, and to provide materials and assistance for the operation of the pupil transportation system.

The responsibilities of the School Construction Unit include the determination that school buildings are constructed according to standards, and to provide assistance with regard to planning and constructing buildings. Associated with this is the administration of the State School Construction Fund, which provides loans to assist with the financing of school construction projects.

II. Summary of Accomplishments

Activities for pupil transportation included assisting school districts in the operation of the pupil transportation system, providing materials and revising standards for school buses.

Activities for school construction included reviewing preliminary plans and approving final plans for building projects, and administration of the State School Construction Fund.

Review and approval of plans for school building projects were completed for 63 projects during the past biennium. Nine contracts for loans from the State School Construction Fund were processed.

III. Difficulties Encountered

The State School Construction Fund was basically depleted during the biennium and additional funds may be needed to meet the needs of school districts.

IV. Unfinished Work

None

V. Changes, Trends and Future Directions

None

School Food Programs

I. Goals, Objectives and Activities Operable During Biennium

The broad goals of the School Food Programs are to continue implementation of USDA programs at all levels of food service and food distribution. Under this division, commodities are requisitioned, warehoused, offered and distributed for each program in accordance with needs and regulations. Responsibilities also include providing supervisory assistance and nutrition education, and participation in the decision-making process on the state and federal levels.

II. Summary of Accomplishments

All existing programs have been maintained and/or expanded. In addition, the "Jobs Bill" program has been initiated, which provides additional food to needy people.

III. Difficulties Encountered

Facilities for increased food distribution have been inadequate, and additional requirements have added personnel burdens.

IV. Unfinished Work

Transfer of the food distribution program to adequate facilities is still in progress.

V. Changes, Trends and Future Directions

New legislation seems to be increasing all phases of the programs, from reimbursement levels to quantities of food.

Secondary Education

I. Goals, Objectives and Activities Operable During Biennium

The Division of Secondary Education has as part of its responsibilities the review of all high school programs to ensure that they are in compliance with statutory requirements, and the maintenance of a system of school accreditation for all schools, which is viewed as an ongoing process that provides for preestablished standards directed at providing quality educational programs.

The division assists schools in assessing their roles within a constantly changing educational system, in an attempt to determine what their focus should be. An awareness for the necessity of specific training essential to junior high school teachers is also provided.

The division is charged with reviewing the annual reports of all schools to determine statutory compliance by December 1, and to determine statutory eligibility for full foundation payments.

After reviewing all available data, the division assigns an accreditation classification to each school by March 31.

An annual workshop is provided for all new administrators in August to assist them in assessing their new responsibilities.

On-site visits are made each year to 25 percent of the schools, and technical assistance is given to schools upon request.

The division sponsors workshops to implement the revised accreditation standards, and has developed a school evaluation process as part of the accreditation standards.

Secondary education staff members are available to speak at teacher training institutions, and cooperative efforts with the North Central Association continue.

II. Summary of Accomplishments

All schools were reviewed each year for statutory compliance; less than ten percent were contacted for additional information before final approval was given after December 1. All schools were assigned an accreditation classification by March 31 each year.

New administrators (107) registered for the two two-day workshops provided during the biennium.

Technical assistance was provided to schools as requested; 90 percent of the assistance was provided by telephone and/or written communication. Thirty-eight on-site visits were made during the biennium.

Regional meetings were held at eight sites three times during the biennium, to facilitate discussion of the revised accreditation standards. A four-phase school evaluation process was developed, and is now a part of the accreditation process. Revised accreditation standards were adopted and implemented during the 1982-83 school term.

Staff members spoke at teacher training institutions on ten occasions, and participated directly or indirectly in 13 NCA school evaluations.

III. Difficulties Encountered

Slightly less than eight percent of the schools were provided on-site visits during the biennium. A reduced travel budget, directed changes in division functions, and additional functions assigned to the staff resulted in less direct contact with school administrators.

IV. Unfinished Work

The division is still developing procedures for implementing the four-phase school improvement process for those schools that choose to seek the accreditation with commendation classification.

V. Changes, Trends and Future Directions

A large number of schools have requested assistance in conducting the four-phase school evaluation activity. This will necessitate a greater amount of staff time directed toward assisting schools in their efforts.

A greater emphasis on establishing qualitative standards and criteria for schools will become a priority within the next two years.

Special Education

I. Goals, Objectives and Activities Operable During Biennium

The Division of Special Education has the responsibility of insuring that school districts and other public agencies provide special education programs for identified handicapped children. Also, the division is responsible for seeing that school districts carry out the identifying and locating of handicapped students and provide appropriate special education programs and related services for all handicapped students. The division establishes regulations, monitors all school district programs, and seeks state financial support for the excess cost of implementing special education at local levels for all exceptional children including handicapped and gifted.

II. Summary of Accomplishments

During the 1981-83 biennium, the Division of Special Education monitored 25 special education units, representing 165 school districts. The number of handicapped children served increased from 9,038 in 1981 to 10,315 served during the 1982-83 school year. The number of special education personnel increased from 941 in 1981 to 1,100 in 1983. The reported increase in services included, but was not limited to, specific low-incidence handicapped children as designated in the biennium goals: multiply handicapped and low-incidence, severely handicapped children.

Two training grants were received by the Department of Public Instruction; one funded high-priority inservice needs, and provided funding for summer traineeships to assist in the tuition and living expenses for teachers being retrained in a specific field of special education. The other grant funded the Very Special Arts Festival program, which extended opportunities for handicapped children to learn about the arts by taking an active role in the arts.

Federal monies have continued to be received for special education programming. The necessary activities to receive the funding have been completed, and a three-year state plan for fiscal year 1981-83 was completed and approved by the U.S. Department of Education.

Three interagency agreements to provide special education services to handicapped children were in place during the 1981-83 biennium. The agreements were between the Department of Public Instruction and Vocational Education and Vocational Rehabilitation, Department of Human Services, and the Bureau of Indian Affairs.

The division continued to review and disseminate state and federal regulations to special education programs in the state. Inservice training was planned and delivered to assist school districts and special education units as they implemented regulations for the operation of programs.

The state legislature appropriated $19,558,128 for special education during the 1981-83 biennium, covering an estimated 35 percent of the cost of providing special education and related services to handicapped children in North Dakota. In addition to reimbursing a portion of program costs, the division was responsible for the cost incurred in the statutory requirement of North Dakota Century Code 15-59-07. (The state's responsibility for costs incurred above the 2½ times the state average per-pupil cost for elementary or secondary education to students attending the Anne

Carlsen School, the Adolescent Center of the State Hospital, and contracts for students to attend out-of-state public and private schools, and to fund transportation for students enrolled in state operated schools, in-state private and out-of-state schools.)

III. Difficulties Encountered

None

IV. Unfinished Work

Monitoring reports identified areas of incomplete programming, reflecting a statewide average gap for secondary-age students with specific learning disabilities, and for emotionally disturbed children on the elementary and secondary levels.

V. Changes, Trends and Future Directions

Regional service units, larger than the existing multidistrict units, must be studied for service delivery to low incidence, multihandicapped students.

Because only a few districts provide adequate special education in the secondary schools or for severely emotionally disturbed students, these will be areas of growth in the years immediately ahead.

Federal law PL 94-142 has mandated that preschool handicapped children (ages 3-5) are to be served if the state law is not in conflict. North Dakota law does not mandate programs for ages 3-5, but some school districts have assumed the responsibility. The North Dakota State Plan for PL 94-142 suggests providing full services to ages 3-5 by 1985, and services to ages 0-2 by 1990.

State and Federal Relations

I. Goals, Objectives and Activities Operable During Biennium

The Director of State and Federal Relations has been given the responsibility of developing and continuing a close working relationship with the North Dakota congressional delegation to Washington, DC, and with the North Dakota Governor's Office, state constitutional officers, state legislators, the U.S. Department of Education, and other levels of government, to maintain and ensure communication and responsiveness.

II. Summary of Accomplishments

Through the efforts of this division, several school districts in North Dakota received payback of Title I money; the Superintendent of Public Instruction has been appointed to federal level boards and commissions; the Department has had the opportunity to positively affect our Senators' votes on key educational legislation; and conferences and workshops have been coordinated with the Governor's Office.

III. Difficulties Encountered

The division encountered the greatest difficulties in knowing who to contact, and what was the most opportune time for those contacts to occur.

IV. Changes, Trends and Future Directions

This division will be focusing its efforts toward the acquisition of block grants, and will emphasize research directed at developing teaching techniques.

Teachers' Professional Practices Commission

I. Goals, Objectives and Activities Operable During Biennium

The Teachers' Professional Practices Commission studies and makes recommendations to the Superintendent of Public Instruction on teacher certification regulations and on the North Dakota Code of Ethics for Teachers. The committee receives complaints against teachers, investigates and evaluates the complaints, and makes recommendations to the state superintendent as provided in North Dakota Century Code 15-38-19.

Prospective education students, members of the teaching profession, administration and school boards are informed by the TPPC of the commission's role.

II. Summary of Accomplishments

The TPPC met 17 times in the 1981-83 biennium. During those two fiscal years, 11 requests for inquiries on teachers and administrators were followed through as per North Dakota Century Code 15-38-19.

On the cases, the commission held informal hearings, gathered factual information and data, and issued a letter of reprimand in four cases while dismissing four cases. Four cases were presented to the Superintendent of Public Instruction with the information and recommendations for suspension or revocation. The state superintendent held hearings under North Dakota Century Code and suspended three teaching certificates for a period of one year.

Other informal hearings were held in the 1981-83 biennium to gather information on proposals for teacher certification regulation changes. The hearings culminated in recommendations being made to the state superintendent, who held hearings under North Dakota Century Code 28-32 in August of 1981. The proposals were adopted, and amendments were added to the regulations of Chapter 67-01 in the areas of kindergarten, Indian studies, deaf education and education of the visually impaired. In June, 1983, changes in the regulations for Subsection 4 of 67-02-01-01 and 67-02-07-04 were made.

III. Difficulties Encountered

None

IV. Unfinished Work

None

V. Changes, Trends and Future Directions

In light of the many studies relative to teacher/education training, it will be necessary for the commission to review the regulations to determine if changes are warranted.

Meetings Listing

Following is a list of meetings and conferences regularly held, sponsored by the Department of Public Instruction, and the names of Department personnel who would have minutes or records of the events.

Fall Administrators Workshop - Ron Stastney

New Administrators Workshop - Pete Gefroh and Gerald Roth

Small Schools Conference - Ron Stastney

County Superintendents Association - Ron Stastney

Conference on Alcoholism and Drug Abuse - Vicky Wicks

National Association of State Directors and Directors of Secondary Education - Pete Gefroh

North Central Association of Collges and Schools - Marie Harper

VI-B Advisory Board (Special Education) - Shelby Niebergall

Gifted and Talented Advisory Board - Ida Schmitt

Advisory Council for Food Distribution - Marlys Lindemann

State Board of Public School Education - Carol Adams

North Dakota Curriculum Council - Patricia Herbel

YCL - Patricia Herbel

National Spelling Bee - Patricia Herbel

Each Student Is Special - Ron Stastney

Advisory Committee for Chapter 2 - Sam Lacher

Teachers' Professional Practices Commission - Ordean Lindemann

Close Up Foundation - Ron Stastney and Irish Linden

Advisory Committee for Traffic Safety Education - Howard Mack

North Dakota Elementary Evaluation Commission - Gerald Roth

North Dakota Migrant Education - Curt Stahl

Computer Education Curriculum Council - Ron Torgeson

North Dakota Indian Education Association - Jim Davis

American Indian Youth Leadership Institute - Jim Davis

Indian Education Curriculum Workshops - Jim Davis

Publications Listing

"Directory of North Dakota Guidance Personnel," October 1981 and 1982.

"Guidance Viewpoint," January, 1982.

"North Dakota XXIV 1980-81 Annual Report of Elementary Schools," August, 1981.

"North Dakota XXV 1981-82 Annual Report of Elementary Schools," August, 1982.

"Basic Skills Answer Book K-12," January, 1982.

"North Dakota Accreditation Standards, Criteria and Procedures for the Classification of Elementary, Junior High/Middle, and High Schools," August, 1982.

"A Guide for Teaching Reading in the Content Areas," August, 1981.

"Guidelines for Voluntary Accreditation of Private Kindergarten Programs," November, 1982.

"School Food News," 1981-82 and 1982-83. Monthly.

"Nutrition Notes," 1981-82 and 1982-83. Quarterly during school year.

INTRODUCTION

This Biennial Report of the North Dakota Department of Public Instruction for the 1983-85 biennium is changed in format from past reports. The new format presents a unified Department report with cleaner focus of the Department, its purposes and mission. The report can also be readily used in the ongoing management review process.

The report begins with a goal statement derived from the North Dakota Constitution and the North Dakota Century Code. In meeting the goal as set out in those documents the report details the function, the objectives and the activities conducted by the Department. The report also notes trends that are apparent in North Dakota education and discusses problems that have been encountered in fulfilling educational needs.

For further detail the reorder is directed to the individual unit reports listed in the Table of Contents.

Chapter 1 (Compensatory Education) 107

Finance and Reorganization 119

School Construction 122

Special Education 123

SECTION A

SUMMARY DOCUMENT

GOAL

In accordance with Article VIII of the Constitution of North Dakota and the related statutes enacted by the Legislative Assembly,

the goal of the Department of Public Instruction for elementary and secondary education shall be:

To provide for the establishment and maintenance of an effective, efficient system of quality elementary and secondary education and to ensure equal educational opportunities for all the citizens of North Dakota.

To this end, the Department of Public Instruction shall enforce and/or implement all statutes relating to education; promote school improvement; and provide leadership in assessing statewide needs, priorities and goals that will benefit all citizens of North Dakota.

Function A: Statutory Compliance

The Department of Public Instruction shall provide for the enforcement of all statutes and the regulations adopted by the Superintendent of Public Instruction pertaining to the approval of all schools, the implementation of accreditation standards, and the enforcement of all other statutes or regulations pertaining to the establishment and maintenance of other educational or related programs that have been charged to the responsibility of the Superintendent of Public Instruction by the Constitution or Legislative Assembly.

1. Ensure that all schools are in compliance with statutes pertaining to school approval.
    a. Develop, review, revise and disseminate school approval criteria and procedures relative to the statutory requirements.
    b. Determine the status of approval for all schools, and where appropriate, invoke statutory sanctions.
    c. Certify teachers based upon established criteria relating to considerations of character, adequate educational preparation and general fitness to teach in North Dakota schools.
    d. Provide direct assistance to schools through various means such as workshops, meetings, consultative services, inservice training, on-site visitations, and the development, identification and dissemination of resource materials.
    e. Collect, maintain, verify, process, analyze and report data to schools, the legislative assembly, agencies and the public.
2. Ensure education-related statutes and regulations that have been charged to the department's authority through legislation are carried out. These programs and activities pertain to: handicapped, gifted and talented, adult education, driver's education, kindergarten,

motorcycle safety, preservation of materials and bonding of textbook publishers.

   a. Develop, review, revise and disseminate appropriate criteria and guidelines.
   b. Develop, implement, monitor and evaluate programs.
   c. Collect, maintain, verify, process, analyze and report data to schools, the legislative assembly, agencies and the public.
   d. Provide direct assistance to schools through various means such as workshops, meetings, consultative services, inservice training, on-site visitations, formation of task-force and advisory groups and the development, identification, and dissemination of resource materials.
   e. Coordinate cooperative efforts between and among agencies, schools and organizations.
   f. Maintain a listing of bonded textbook publishers and textbook prices; administer a textbook library and distribute a listing of bonded textbook publishers.

3. Promote state accreditation as a voluntary process.
   a. Develop, revise and disseminate school accreditation criteria, guidelines and procedures.
   b. Determine the status of accreditation for all schools seeking accreditation.
   c. Collect, maintain, verify, process, analyze and report data to schools, the legislative assembly, agencies and the public.
   d. Credential educators in areas of professional preparation.
   e. Provide direct assistance to schools through various means such as workshops, meetings, consultative services, inservice training,

on-site visitations, formation of task-force and advisory groups and the development, identification and dissemination of resource materials.

4. Promote uniformity of curriculum.
   a. Develop, revise and distribute curricular guidelines.
   b. Collect, maintain, verify, process, analyze and report data to schools, legislative assembly, agencies and the public.
   c. Coordinate activities with schools and state/national agencies and organizations.
   d. Provide direct assistance to schools through various means such as workshops, meetings, consultative services, inservice training, on-site visitations, formation of task-force and advisory groups and the development, identification and dissemination of resource materials.
5. Ensure that local districts are in compliance with other statutes supportive of instruction: reorganization requirements, statistical reporting, school construction, bus transportation, teacher negotiations and teacher conduct.
   a. Develop, review, revise and disseminate criteria, guidelines and report forms.
   b. Collect, maintain, verify, process, analyze and report data to schools, the legislative assembly, agencies and the public.
   c. Implement, monitor and evaluate programs.
   d. Provide direct assistance to schools through various means such as workshops, meetings, consultative services, inservice training, on-site visitations, formation of task-force and advisory groups and the development, identification and dissemination of resource materials.

   e. Implement and/or enforce the decisions of the state board of public school education in such matters as reorganization and school construction and provide resources for the statutory functions of the board.
   f. Jointly concur and enforce the regulations of the Teacher's Professional Practices Commission and provide resources.
   g. Appoint the chair of the Educational Fact Finding Commission and provide resources for the purposes of resolving impasses in teacher negotiations, when requested.

6. Counsel and advise county superintendents and school boards.
   a. Facilitate the Association of County Superintendents.
   b. Enforce rules of practice and regulations pertaining to hearings and determination of appeals.
7. Provide a leadership role under statutory or constitutional responsibilities.
   a. Serve on the Board of University and School Lands.
   b. Serve on the Teacher's Fund for Retirement Board.
   c. Serve on the North Dakota High School Activities Association Board.
   d. Serve on the State Board for Vocational Education.
   e. Serve on the State Board for Public School Education.
8. Ensure that schools receive state foundation aid and other funds to carry out state and federal mandates.
   a. Collect, maintain, verify, aggregate and analyze data.
   b. Develop proposals and draft legislation.
   c. Seek and receive authorization and/or funding.
   d. Develop a distribution program with appropriate processes and procedures.
   e. Allocate and distribute funds.

Trends

A wide variety of trends and issues face elementary and secondary education in North Dakota in regard to the fulfillment of the Constitutional mandates and statutory requirements. Many of the issues and accompanying trends reflect the economy of North Dakota. Other trends have evolved because of demographic changes. Beyond these financial and demographic influences, this function is being greatly influenced by educational demands as have been promulgated by federal statutes, court rulings, and national studies of education. In addition, statutory requirements are increasingly being challenged by nontraditional, private and home school movements.

First, the reader's attention is directed toward the financial and demographic arenas. Small schools with decreasing enrollments are finding it more difficult to meet accreditation and approval standards and requirements. Under the belief that the Department will assist all schools to offer the best education possible, various approaches are being explored to help such schools to broaden and intensify their curricula. For example, models for the sharing of services and the instructional use of technology are being studied and explored, the offices of the county superintendents are being restructured, and teacher centers are being established statewide.

With the continued development of full-service special education programming in all sizes of districts, the issue of a least restrictive environment remains. As smaller districts provide more of this education locally, there will be an increased demand for appropriate physical facilities.

Schools are being faced with demands to become more accountable. This is a reflection of the recent national studies and the decreasing amount of financial support. Thus, we have more schools seeking accreditation with commendation--a status which requires a school improvement process culminating with a school improvement plan that ensures significant parent and community involvement. The Department is being asked to identify and develop curricula which is adaptive in nature and which presents an objective-based approach. These types of curriculum activities provide more sophisticated resources for local schools.

The 1985 Legislative Assembly passed three separate bills addressing other areas of concern relating to education in North Dakota.

Displaced Homemakers - SB 2307

The Displaced Homemaker Program was transferred to the Adult Education Unit about four years ago. Under this program, the Department provides funding for Adult Learning Centers which serve the displaced homemakers.

Since the first year of implementation the programs have grown from four regional centers to eight regional centers. They are located in Fargo, Bismarck, Grand Forks, Devils Lake, Jamestown, Minot, Dickinson, and Williston. The student population served by these centers have doubled and it is anticipated these programs will further grow.

The first biennial appropriation for the Displaced Homemaker Program was $225,000. The second biennial appropriation was doubled by the legislature. The apparent increase is a result of a growing need for services in our state.

Chemical Abuse - HB 1545

On July 1, 1985 the North Dakota Department of Public Instruction began administering an interagency program for community alcohol and substance abuse prevention. The Departments of Health, Highway, Human Services, and Public Instruction combine their resources to provide program money for community chemical health mini-grants to schools or community agencies. These four departments of state government established an interagency committee to set up guidelines, review proposals, and to make decisions on allocating money to applicants in order to address their local needs in promoting community chemical health. Thus far, 64 communities have responded to the initial call for proposals with 207 people representing these communities in the two initial training sessions.

Teacher Centers - HB 1038

North Dakota teacher centers coordinate area professional development and resource distribution activities. Developed in response to teachers, administrators and teacher educators seeking better ways to meet the needs of our teachers and the entire educational community, the centers provide valuable assistance for school improvement. The Bismarck-Mandan, Devils Lake, Dickinson, Grand Forks, Fargo-West Fargo-Moorhead, Mayville, Minot, Valley City and the Grand Forks Small Schools Teaching Learning Centers are part of the North Dakota Teacher Center Network, established in 1976. The Bush Foundation supported the Teacher Center Network in North Dakota's efforts "to establish a

> coordinated statewide response to the recognized inservice education/staff development needs of the professional educators while maintaining our state's traditional respect for, and support of, local initiatives."
>
> Individually, each center policy board, consisting of representatives from each school, sets goals and plans activities responsive to the needs of the area schools. Collectively, the centers support activities such as an Artists-in-the-Schools program, a statewide writing festival, a writing inservice education program, and the maintenance of a statewide resource file.
>
> Through continued local support and legislative funding of $350,000 for the 1985-87 biennium, continuation of services at these sites and availability of services to all North Dakota educators through the establishment of two new centers at Wahpeton and Williston will be ensured.

In addition, for the first time, state funding was appropriated for curriculum development in the following disciplines: math, law and justice, computer education and science. Monies were also made available for the acquisition of library media resources and membership in MECC, which ensures that the department will have access to computer-related education materials.

Problems

The continuing decline in federal and state resources has imposed minimum staffing levels in the Department and a resultant decrease in the level of services to schools. These same fiscal constraints have induced stricter requirements for financial accountability, and further sophistication in data collection and reporting. It has become increasingly difficult for schools to employ qualified staff to gather and report data accurately and on a timely basis. The problem intensifies as the Department, faced with staff shortages, attempts to manage the additional administrative workload and meet the needs for increased inservice training and technical assistance.

Limited financial resources also continue to hinder the Department's capabilities in meeting requirements mandated by state statutes and the North Dakota Constitution. Some of the problems include the necessity of curtailing curriculum development and educational research; inservice training; coordination and implementation; programmatic approval for certification purposes; and assistance to schools in exploring bond issues, construction loans and possible reorganizational strategies.

As financial resources are reduced, the Department will need to seek other ways to enhance a coordination of efforts and resources to more efficiently and effectively meet common goals.

Function B: School Improvement

The Department of Public Instruction shall continually promote the enhancement of quality education through the implementation of school improvement processes which provide for the development, adoption and promulgation of policies, standards, methods and materials designed to assist schools in their improvement efforts.

1. Support schools in their endeavors to improve education.
    a. Serve as sponsoring agency of the North Central Association;
    b. Coordinate such school improvement activities as teacher preservices, and inservice with higher education institutions, and state, regional and national agencies and organizations.
    c. Identify, develop, revise, adopt and distribute curricular resources.

    d. Provide direct assistance to schools through various means such as workshops, meetings, consultative services, inservice training, on-site visitations, formation of task forces and advisory groups and the development, identification and dissemination of resource materials.
    e. Seek, receive and administer supplementary funds to assist schools in their improvement efforts.
2. Encourage school participation in the School Improvement Process (SIP).
    a. Develop, review, revise and disseminate SIP guidelines, information and schedules.
    b. Coordinate self-study and team visitation activities.
    c. Approve and monitor the school improvement plans.
    d. Conduct training sessions and accreditation meetings.
3. Evaluate special emphasis programs to determine their impact and effectiveness on improving the quality of education such programs may include kindergarten, Chapters 1 and 2, National Diffusion Network, school foods, Title IX, bilingual, Indian education, gifted and talented, and guidance and counseling.
    a. Collect, verify and analyze data of special emphasis programs implemented in schools.
    b. Provide the procedures for the selection and implementation of special emphasis programs.
    c. Disseminate information on special emphasis programs that have been evaluated.

Trends

The rubric of school improvement relates to efforts of the Department which are not mandated but intended to assist schools in their efforts to improve the educational opportunities for students. In North Dakota, there is a very strong tradition of local control and local initiative. Therefore, the general approach taken by the Department is to assist schools to more clearly define their missions, assess needs, and implement school improvement plans.

Educational research and practices are beginning to focus upon student outcomes. Some schools and accreditation systems are emphasizing student outcomes as the focal point of their school improvement processes. In consort with this development, the School Improvement Process is itself encouraging a greater variety of alternatives which might increasingly address unique local needs.

The attention to student outcomes is also noticeable with the increase in the number of school recognition programs, improved achievement results over the past five years, and academic competitions. The concern for more effective counseling is another expression of society's desire that students have the best possible advice concerning career decisions and social and personal adjustments.

Problems

Declining resources and staff shortages have also had a negative impact on achieving the objectives of the school improvement function. Independent efforts to enhance educational opportunities for students have had to take the back seat to the Department's responsibilities of meeting statutory mandates and fulfilling federal program requirements. Because the Department has not been able to devote adequate resources, the process is lacking the necessary coordination of effort and resources among interested parties.

In many cases, the underlying problem hindering progress in the School Improvement Process relates to the lack of overall focus and direction. Without firm goals and objectives, an adequate assessment of educational needs cannot be determined.

Function C: Leadership

The Department of Public Instruction shall provide leadership in assessing local and statewide needs, establishing priorities, setting goals, and promoting innovative programs through federal and/or foundation grants which will benefit the intellectual development, mental health, social adjustment, and physical well-being of all citizenry.

1. Provide leadership in the assessment of educational needs, setting educational priorities and the definition of trends.
    a. Conduct assessment of needs and establish priorities.
    b. Seek to develop programs and provide resources which relate to the identified needs of our state.
    c. Maintain membership in the Council of Chief State School Officers.
    d. Act as educational liaison with the Legislature and Congress.
    e. Maintain cooperative efforts with organizations, advocacy groups and appropriate funding sources.
    f. Provide educational information.
2. Promote educational equity through special focus programs designed to meet the needs, interests and aptitudes of all students, including the handicapped, educationally deprived, migrant, refugee and gifted; adults lacking skill proficiency; and groups affected by discrimination.
    a. Pursue and administer grants attained through governmental and private sources for the purpose of providing supplementary program support to local schools.
    b. Administer the federal food and nutrition programs in order to supply nutritious food and nutrition information on diet and health to schools, child care facilities, charitable institutions, and economically disadvantaged segments of the population.

3. Promote involvement and participation in education and educational endeavors.
   a. Facilitate student programs which encourage student leadership, e.g. Close Up, Spelling Bee, Young Citizens League, Mathcounts, Arts for the Handicapped.
   b. Maintain liaison with state, regional and national boards, commissions and executive boards.
   c. Coordinate efforts with various educational organizations.
   d. Coordinate teacher programs, e.g.: Teacher of the Year, NASA Teacher in Space and Presidential Awards for the Teaching of Science and Math.
   e. Co-sponsor exemplary school programs.
4. Effectively and efficiently administer the internal operations of the Department of Public Instruction.
   a. Plan, execute and evaluate management goals.
   b. Collect, process and verify statistical data from schools for staff, legislative and public utilization in the school accreditation process, foundation aid distribution and management of department functions.
   c. Prepare a Department budget for presentation to the legislative assembly; provide an ongoing budget analysis; conduct a quarterly budget review and monitor of expenses.
   d. Manage internal accounting functions including: payroll, purchasing and receiving, vouchering, billing, recordkeeping, inventory control, cash receipts, cash disbursements and accounts payable.
   e. Comply with state and federal audit requirements.
   f. Develop management policies and procedures.

g. Develop and maintain a system for records management.

h. Confer with the Attorney General's office in matters pertaining to school law.

i. Provide support in the areas of information processing, communications, supplies, clerical needs, space allocations and equipment.

j. Manage personnel to include recruitment and selection, definition of job functions, assignment of responsibilities, employee relations and staff evaluation and development.

Trends

This function can best be described as often addressing the "cutting edge" of educational issues, concerns, and developments. As such, various governmental and private grants are sought to address key issues and identified needs through the collection and analysis of data. The most significant trend is the possibility of decline in federal revenues.

The general approach, following an analysis of data and identification of needs, is to explore the options available which might support a special leadership activity. This approach has led to the provision of more hands-on experiences in citizenship education, an exploration of models of teacher assessment, the provision of adult instruction programs, a continuing concern for nutrition education, increased provision for GED testing as an avenue for school dropouts, more consciousness relative to the various equity issues, and a greater and more effective use of technology in school systems.

Obviously, the use of data is critical to this area. The demand for good data will increase at both the state and local levels. The quality of decision making depends upon it.

Problems

Providing sustained and consistent leadership manifests itself in the curtailment of inservice coordination and restricted technical assistance due to budgetary constraints and staff shortages; aging and outdated educational resource materials; a lack of qualitative data analysis; deficiencies in overall program focus and organizational goal-setting; inadequate manpower necessary to address current needs of paramount importance; and an increase in administrative responsibilties due to governmental regulations and program responsibilities that have been added without adequate funds to provide for enforcement and implementation.

Since many of these efforts are federally funded, the most significant problem is the anticipated decline in federal resources. Other sources of funds must be identified which will continue to support and enhance the leadership activities.

Summary of Expenditures
1983-85 Biennium

Line Item	Appropriation	Expended	Percent
Operating			
Salaries and Wages	$ 4,090,469	$ 3,838,651	93
Operating Expense	2,429,432	2,390,135	98
Data Processing	401,099	306,088	76
Equipment	47,180	47,168	99
Subtotal	$ 6,968,180	$ 6,582,042	94.5

Total		47,168
Total 1983-85 Biennium Administrative Expenditures		$6,587,030

SECTION B

INDIVIDUAL UNIT REPORTS

STATE SUPERINTENDENT

I. Administrative Support

A. Function/Responsibility

Provide administrative direction to the program areas of the Department of Public Instruction.

1. Description

Facilitate budgetary staffing and logisticial requirements; act as liaison to other members of the management team in communicating statewide directives affecting general administrative policies and procedures.

2. Objectives

Establish program goals, objectives and priorities that will fulfill the educational requirements mandated to support the elementary/secondary schools in the state of North Dakota.

Provide for the allocation of revenue within established departmental line authorization for distribution to the individual programs based on scope, statutory requirements, and compliance with grant awards.

Assign adequate staff, develop job descriptions and define qualifications necessary to accomplish program functions.

Allocate space, equipment, and other support necessary to perform program assignments.

Communicate management decisions, policies and procedures.

Coordinate of multidisciplined personnel, programs and activities to form a cohesive group for the accomplishment of a broad spectrum of departmental goals and objectives--providing educational excellence to the handicapped, elementary and secondary students, and adult education.

3. Activities

Review departmental expenditures quarterly

Meet with departmental management team

Meet with individuals, groups, intra-agency personnel

Conduct staff meetings

Review state directives

Chair and serve on program committees

Present budget recommendations for department review and presentation to the legislative assembly.

B. Evaluation

1. Summary

The administrative review process is an ongoing, everchanging process. Management must be attuned to fluctuations in program scope, responsibility, funding, public perceptions and changing priorities, as well as changes relating to state general administrative policies and procedures. Evaluative measures include an annual review of unit goals and objectives, personnel duties and responsibilities, and personnel performance. Other methods of evaluation include a predetermined review of objectives at scheduled milestones, updating short-range goals, and periodic, unscheduled staff meetings.

2. Trends

Plans are currently underway for an external management team to review the organizational structure and management functions which may streamline and reorganize the administrative aspects of the department. There is a decline in funding at both the state and federal level.

3. Problems

Due to a lack of funding, the staffing is insufficient to adequately provide support services.

II. Education Fact Finding Commission

A. Function/Responsibility

1. Description

The Education Fact Finding Commission was created and is governed by sections 15-38.1-03, 15-38.1-04, 15-38.1-05, 15-38.1-06 and 15-38.1-13 of the North Dakota Century Code. The function of the commission is to render assistance to school boards and teacher associations when the two parties reach an impasse during contract negotiations. The Commission holds hearings at which facts from both contending parties are gathered and issues recommendations which, if accepted, become the basis for resolution of the impasse and the issuance of contracts.

2. Objectives

The primary objective of the Commission is to help the contending parties resolve an impasse situation. This is done through impartial hearings where facts are gathered from both parties. These facts then become the basis for the Commission's recommendations. The Commission tries to recognize the legitimate interests of both school boards and teacher associations and strives to balance these interests in an even-handed manner.

3. Activities and Achievements

The Commission conducted eight on-site impasse hearings during the 1983-85 biennium. The locations and dates of these hearings follows:

Velva School District No. 1 - July 16, 1983
Burleigh County Special Education Unit - September 10, 1983
Midway School District No. 128 - September 17, 1983
Minot School District No. 1 - September 24, 1983
Fort Yates School District No. 1 - May 23, 1984
Elgin School District - May 24, 1984
Hazelton-Moffit School District - June 21, 1984
Napoleon School District - June 22, 1985

B. Evaluation

1. Summary

Even though the recommendations of the Commission are not binding and may be rejected by either of the two parties, they resulted in impasse resolutions in seven of the eight cases. Thus, the Commission does offer a viable method of resolving or finding an accommodation for resolving an impasse.

2. Trends

The review of the annual reports of the Commission from 1970 to the 1983-85 biennium indicates that there were five hearings in three of those years and six in four others. During the remaining years, the number of hearing were: two (once), seven (once), eight (once), eleven (twice), twelve (once), fifteen (once), and sixteen (once). From July, 1970 to June 1975, there were relatively few impasses. There was a surge from July, 1975 through June, 1978 and the pendulum has swung between "high" and "low" during the subsequent years. Relatively large numbers of impasses appear to occur in the fiscal years immediately following the legislative sessions (ie. 1977, 1979, 1981, and 1983).

3. Problems

Since the statutory function of the Commission is rather limited, it does not have any unresolved problems within its defined role and function. However, the Commision members do feel frustrated at times when their efforts do not result in impasse resolutions. The current law does not lend "finality" to the negotiation process.

ASSISTANT SUPERINTENDENT FOR INSTRUCTION

I. Coordinate the services of the Department of Public Instruction

A. Function/Responsibility

1. Description

Through a process of mutual goal setting, the various units of the Department focus their efforts upon the overall Department goals.

2. Objectives

a. Identification of unit goals.

b. Development of objectives and activities to accompany goals.

c. Definition of evaluation indicators and procedures.

d. Evaluative summarization.

3. Activities

a. Meet with unit directors to develop and confirm unit goals, objectives, and activities.

b. Conduct the evaluative review sessions.

c. Prepare a summary report.

B. Evaluation

1. Summary

The management documents of the Department delineate the goals, activities, objectives, and narrative justifications. The evaluations of the unit directors and unit programs are on file.

2. Trends

There is a need to address management in a more well-planned and collaborative effort. A national trend toward rewarding merit should be considered.

3. Problems

   a. The development of a more meaningful evaluation procedure.

   b. More accurate and up-to-date job descriptions.

   c. A more complete policy manual.

II. North Central Association

A. Function/Responsibility

1. Description

   The Department of Public Instruction serves as the sponsoring agency for the North Central Association which accredits approximately 60 schools in North Dakota.

2. Objectives

   a. To encourage the maintenance of standards.

   b. To facilitate school evaluations.

   c. To provide leadership in the area of current trends and issues.

   d. To assess and provide needed inservice.

3. Activities

   a. Review school reports and develop recommendations for accreditation levels.

   b. To approve evaluation designs, team members, and the schedules for team visitations and to issue various letters and certificates of recognition and appreciation.

   c. To arrange for and conduct regional meetings.

   d. To translate inservice needs into inservice programs.

B. Evaluation

1. Summary

Each year, the State Committee/NCA reviews the goals and activities and confirms and/or revises the work plan for the following year.

2. Trends

a. Outcomes accreditation

b. Alternative evaluation designs

c. Unit school (K-12)

3. Problems

a. The time to carry out the functions.

b. Developing more meaningful evaluation systems.

III. Liaison to County Superintendents

A. Function/Responsibility

1. Description

This office coordinates the work of the Department of Public Instruction in relationship to the various functions and responsibilities to the county superintendents.

2. Objectives

a. To coordinate the various tasks and functions.

b. To assist the County Superintendents Association in the conduct of its functions.

c. To facilitate the Association in the development of its goals and objectives.

3. Activities

a. To serve as secretary/treasurer of the County Superintendents Association.

b. To serve as a member of the Executive Board of the Association.

B. Evaluation

1. Summary

The minutes of the various meetings are on file in this office. Copies of the various financial records are retained. All agendas of the meetings and conferences are kept.

2. Trends

Many county commissioners are considering a restructuring of the offices.

3. Problems

a. To evolve appropriate and meaningful job descriptions of county superintendents.

b. To restructure the offices.

IV. School Improvement

A. Function/Responsibility

1. Description

The primary function of the School Improvement unit is to facilitate the School Improvement Process, a four-phase procedure which provides for the school a means with which to assess the effectiveness of its total school program and to address the issue of accountability.

2. Objectives

a. To promote the School Improvement Process.

b. To coordinate the program and school evaluation efforts of elementary, secondary, and special education.

c. To assist schools in implementing the four-phase Improvement Process: the plan, the self-study, the on-site visitation, and the follow-up.

d. To provide support services to enhance the School Improvement Process.

e. To help schools attain improvements suggested by the evaluation process.

f. To establish procedures for updating, revising, and adapting evaluation instruments and methodologies for use in small or unique schools and in special education units.

g. To evaluate and, if necessary, revise the following: a) The structure and functions of the Elementary, Secondary, and Joint State Committees; b) The roles of Regional Evaluation Panel members; and c) The regional structure established for evaluation purposes.

3. Activities

a. Fill those positions which are vacant on the various state committees.

b. Study options for the financing of state committee activities.

c. Redefine the roles of Regional Evaluation Panel members.

d. Establish an application procedure to facilitate the scheduling of evaluation activities.

e. Serve as a resource to REP members, consultants, chairpersons, and school officials.

f. Coordinate inservice activities for consultants, chairpersons, teachers, administrators, and school board members.

g. Provide opportunities for consultants and chairpersons to gain experience.

h. Serve as a consultant, chairperson, and/or team member.

i. Work cooperatively with the directors of elementary education, secondary education, special education, and North Central Association.

j. Schedule visitations

k. Maintain pertinent records

l. Coordinate the distribution of evaluation materials.

m. Conduct regional informational meetings to foster the School Improvement Process.

n. Attend and participate in relevant meetings at the state, regional, and national levels.

B. Evaluation

1. Summary

a. An assistant director for School Improvement has been added to the professional staff of the Department of Public Instruction.

b. Approximately 36 schools are currently involved in one of the four phases of the Improvement Process.

c. Schools' interest in the Improvement Process is high and the number interested in evaluation is growing.

2. Trends

a. The number of schools initiating the Improvement Process is growing.

b. Alternatives to traditional evaluation procedures are being studied.

c. Emphasis is being placed on the outcomes of school programs.

d. Schools utilize the Improvement Process to demonstrate accountability.

e. There is a large number of schools pursuing K-12 evaluations.

i. The percentage of elementary schools and junior high/middle schools undergoing the Improvement Process is increasing dramatically.

3. Problems

a. There is a pronounced need for more experienced consultants and chairpersons.

b. A strict application procedure is necessary to facilitate scheduling.

c. The funding of the Joint Committee needs be addressed as additional funds are needed to train resource people.

d. There is a need for alternative evaluation instruments and alternative formats.

e. Long-Range Goal: To see the passing of legislation similiar to that of Massachusetts" 1985 School Improvement Act which makes available to local school districts substantial sums of money to be used to strengthen and improve the educational system and to ensure excellence in education.

C. Resources

1. The School Improvement Process Manual for North Dakota Elementary, Middle/Junior High, and Secondary Schools.
2. The Association for the Evaluation of Elementary Schools Manual.
3. NSSE and AEES evaluation instruments, surveys, and manuals.
4. Resource packets for consultants' use.

5. Manuals pertinent to the "Outcomes Accreditation" alternative.
6. Data Processing services for use in processing AEES evaluations.
7. Lists of trained consultants.
8. Lists of elementary and secondary state committee members.
9. Minutes of all evaluation committee meetings.
10. Consultant services
11. Lists of schools accredited with commendation.
12. Lists of NCA schools and prospective NCA schools.

V. North Dakota State Close Up Program

This is a new function/responsibility.

A. Function/Responsibility

Provide a supplement to social studies classes at the secondary level that enhances the study of North Dakota state and local government.

1. Description

A two and one-half day residential program for students and teachers from North Dakota secondary schools for an in-depth study of state government. To strengthen the educational impact, pre-program activities are developed for student preparation prior to the on-site experience and follow-up activities upon its completion.

2. Objectives

The development of an experiential study of government that goes beyond the textbook and creates a participatory environment for the learning process that is designed to:

a. Educate and provide substantive information about North Dakota government.

b. Create an awareness of an individual's rights and responsibilities in a democratic society.

c. Establish citizenship skills

d. Encourage involvement at all levels of government.

e. Avail students with opportunities to become involved in community activities.

f. Instill a positive attitude in each individual of their ability to make a difference in defining the role of government.

g. Provide a forum for students and teachers to exchange and share a perspective on themselves and others in their communities and state.

h. Give inservice to teachers in updated and participatory teaching methods, provide direction in locating resources and distribute curricular materials and information.

3. Activities

Reach beyond the educational network to involve people within local communities--parents, business leaders, government officials--to join educators in identifying needs, determining program focus, and providing assistance in the development of a concentrated plan to meet the defined needs. To accomplish this end, the Department engages in publicity campaigns, fund-raising activities to defray developmental costs, awareness sessions, the provision of audiovisual and other informational materials to schools for presentation to interested groups, the formation of an advisory board made up of a broad cross-section of individuals from throughout the state to give guidance and direction, and the recruitment of volunteers for the planning committee and subcommittees.

Committees are assigned specific responsibilities: curriculum planning, agenda and program planning, logistical arrangements, and development of the Participant Guide for distribution to participating schools.

B. Evaluation

The Participant Guide includes an evaluation sheet for participants to record their observations at the end of each session offered during the program; a debriefing session is scheduled at the conclusion of the program; and upon returning home, a follow-up questionnaire is sent to all participating schools requesting a formalized response.

1. Summary

   The North Dakota Close Up program is a unique educational learning experience--due not only to the experiential, participatory process, but also because of the community involvement necessary for program development and success.

2. Trends

   Since the 1985 pilot program, more and more schools have expressed an interest in participating at the state level. It is anticipated that the 1986 program enrollment will double.

3. Problems

   a. Close Up is an ambitious project that demands commitment from volunteers who must juggle busy schedules, workloads and agendas.

   b. There are limited funds available for program development.

   c. Currently lacking is an adequate publicity campaign designed to reach schools, parents, teachers and community members with Close Up's program offerings, purpose and philosophy.

ECIA-CHAPTER 2 AND EESA-TITLE II

I. Administer the ECIA Chapter 2 Program

A. Function/Responsibility

1. Description

The Education Consolidation and Improvement Act of 1981 (ECIA) was enacted as part of Subtitle D of Title V of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35). Chapter 2 of the act consolidates educational grant programs into a single authorization grant to states for the same purposes as set forth in the antecedent programs.

2. Objectives

The objective is to provide supplementary support to the local district instructional program by authorizing a variety of activities that could be undertaken at the local level.

3. Activities

a. Develop the State Plan to be submitted to the United States Department of Education.

b. Report to the Governor's Advisory Committee for Chapter 2.

c. Develop the formula for distribution of funds to the local education agencies.

d. Determine local education agency allocations.

e. Produce a technical assistance manual.

f. Develop local education agency application forms.

g. Distribute application materials to local education agencies. Equitable funding is identified for services to students in each eligible nonpublic school.

h. Conduct regional inservice meetings to provide technical assistance to local education agencies.

i. Receive, review and approve/disapprove applications from the local education agencies.

j. Identify annual grant reporting information.

k. Develop annual Chapter 2 local education agency reporting forms.

l. Distribute end-of-year financial and evaluation report forms to local education agencies.

m. Receive, review and approve/disapprove annual reports.

n. Develop monitoring report forms.

o. Supervise the monitoring that is accomplished by county superintendents.

p. Receive, review and approve/disapprove monitoring reports.

q. Design and implement an evaluation plan.

r. Collect and analyze local education agency data and prepare an annual evaluation report to be submitted to the United States Education Department.

s. Monitor the financial transactions of this program.

B. Evaluation

1. Summary

a. All of the above activities have been accomplished.

b. All nonpublic schools that wished to do so were able to participate in the program.

c. Approximately 99 percent of the students enrolled in public schools and 95 percent of the students enrolled in nonpublic schools had an opportunity to participate in Chapter 2 programs.

2. Trends

School administrators tend to be cautious when it comes to using federal funds for personnel. Since they cannot be sure about how long the funds will be available, they perfer to use the funds for nonrecurring expenses such as equipment purchases.

3. Problems

a. The diversity of local Chapter 2 programs makes it difficult to perform a quantitative evaluation.

b. Parent involvement in planning and implementation of Chapter 2 programs is difficult to accomplish.

II. Administer Title II of the Education for Economic Security Act

This is a new function/responsibility.

A. Function/Responsibility

1. Description

The Education for Economic Security Act (Public Law 98-377) is designed to improve quality of mathematics, science, computer learning and foreign language instruction in the United States.

2. Objectives

a. To provide financial assistance to improve the skills of teachers and instruction in mathematics, science, foreign languages, and computer learning, and to increase the access of all students to that instruction.

b. To coordinate the program efforts of the Department of Public Instruction and the Board of Higher Education.

3. Activities

a. Prepare the State Plan to be submitted to the United States Education Department.

b. Develop and distribute a technical assistance manual.

c. Identify local education agency application information, including information needed for the statewide assessment.

d. Develop the local education agency application format, including a local needs assessment.

e. Apply the statutory formula for distribution of funds to be used by local school districts.

f. Determine the local education agency allocations, using the statutory regulations.

g. Disseminate application materials to local education agencies, including allocation information. Equitable funding is identified for services to students in each eligible nonpublic school.

h. Receive, review and approve/disapprove the local education agency and statewide project applications.

i. Contract with teacher centers to coordinate inservice to mathematics and science teachers in rural areas that are traditionally underrepresented.

j. Consult with the coordinator of the Board of Higher Education portion of the Title II program to design and implement cooperative projects.

k. Identify annual grant reporting information.

l. Format the annual Title II local education agency report forms.

m. Distribute the annual report forms to local education agencies.

n. Receive, review and approve/disapprove annual reports.

o. Monitor local district programs.

p. Design and implement an evaluation plan which both satisfies the statutory mandate and assist local education agencies in reporting the effectiveness of the programs.

B. Evaluation

1. Summary

a. The implementation of the above activities of this new program are on target.

b. A statewide needs assessment has been designed and data is now being collected analyzed.

2. Trends

The skills of teachers and instruction in science and mathematics are again receiving special attention.

3. Problems

The mandated fund distribution plan provides a disproportionate amount of funds to school districts with large Chapter 1 counts.

III. Supervise the audiovisual equipment pool for the Department of Public Instruction

This is a new function/responsibility.

A. Function/Responsibility

1. Description

To provide audiovisual support to the Department of Public Instruction staff.

2. Objectives

a. To acquire and maintain the necessary audiovisual equipment.

b. To provide technical assistance to staff members.

3. Activities

a. Requisition the needed equipment.

b. Inventory and store equipment.

c. Implement a check-out system.

d. Maintain equipment in operating condition.

e. Assist staff in equipment usage.

B. Evaluation

1. Summary

a. A basic supply of equipment has been acquired and adequate storage has been provided.

b. A check-out system is functioning.

c. Equipment is being repaired when necessary.

2. Trends

The video cassette equipment is replacing other equipment in usage.

3. Problems

Video equipment needs to be updated.

SECONDARY EDUCATION

I. School Approval - Junior and Senior High Schools

A. Function/Responsibility

1. Description

Constitutional responsibility is . . . "to prevent illiteracy and secure a reasonable degree of uniformity in course of study," Article VIII, Section 4; Powers and Duties of Superintendent of Public Instruction to be prescribed by law, Article V, Section 13. Responsibility for the Standardization of Schools by the Superintendent of Public Instruction is established by Statute, NDCC 15-21-09; The Director of Secondary Education provides for the supervision, under the direction of the Superintendent of Public Instruction, the conditions affecting the high schools receiving financial aid from the State, NDCC 15-41-04.

2. Objectives

a. To assure that all teachers teaching in all junior and senior high schools are certified.

b. To assure that all teachers teaching in all high schools are teaching in their major, minor, or minor equivalent fields of preparation.

c. To assure that the prescribed minimum curriculum is available to all students.

d. To assure a minimum length of school year; 180 days is to be provided by all schools.

e. To assure that all units of credit are taught for the prescribed minimum length of time.

f. To provide assistance to all schools that are having difficulty in complying with the requirements.

3. Activities

a. Review certificates of compliance in which schools certify their intent to comply with all minimum requirements.

b. Review fall and spring school calendars to determine the minimum length of school year.

c. Edit all Professional Personnel Records (MIS03) for omissions and errors prior to entry into the data system.

d. Review printouts for each school to determine compliance with all minimum requirements.

e. Contact school administrators to verify and/or request additional data as needed in order to complete the approval process.

f. Respond to requests from school administrators on teacher qualifications, changes in course offerings and other statutory requirements.

g. Submit the names of schools that have not met the minimum approval requirements to the State Superintendent.

h. Review, summarize and compile data on the condition of Secondary Education to the Legislative Interim Committees and the Legislative Assembly as requested.

i. Establish and maintain an updated file of all teachers for the purpose of establishing minimum qualifications.

j. Review and approve applications from school districts for summer programs that provide courses for high school credit and are eligible for proportionate foundation aid payments.

B. Evaluation

1. Summary

The approval process provided for the approval of 21 independent junior high schools, five state institutions and private high schools, 10 nonpublic high schools, and 233 public high schools. Four nonpublic high schools operated without meeting minimum approval requirements.

2. Trends

The number of nonpublic schools providing high school courses are increasing. Most of these schools fail to meet the minimum requirements for approval. High schools with enrollments of less than 20 students find it extremely difficult to meet the minimum curriculum requirements. Schools continue to consider program sharing through cooperative efforts and delivery of courses utilizing existing and emerging technology, i.e. satellite.

3. Problems

A number of nonpublic high schools do not intend to meet the minimum requirements for approval. The number of high schools that attempt to teach more than one course during the same time period is increasing, thus they fail to meet the minimum time requirements for instruction to issue one unit of credit. The data submitted by all schools that is required in order to determine minimum approval is neither complete nor accurate. The editing of the Professional Personnel Records (MIS03) to correct errors and omissions adds approximately an additional one month of time consumed by four staff members. Additional efforts to obtain accurate data need to be researched.

II. School Accreditation - Junior and Senior High Schools

A. Function/Responsiblity

1. Description

Develop and maintain a process of school accreditation for schools that voluntarily wish to compare themselves to a set of pre-established standards that are considered essential for providing quality educational programs. The legislative authority to adopt standards for accreditation is granted to the Superintendent of Public Instruction under NDCC 15-21-04.1.

2. Objectives

a. Provide for a voluntary process of school accreditation that will encourage a minimum of 90 percent of the schools to strive for and maintain the accredited classification.

b. To encourage and assist schools to strive toward meeting all the pre-established standards to affect positive changes in the quality of their instructional programs.

c. Provide first-year and new-to-the-state school administrators an orientation and an awareness of the statutory requirements and the standards for school accreditation.

d. To provide for and assist in maintaining a four-phase school evaluation process for those schools seeking the accredited with commendation classification.

e. To maintain cooperative efforts with the North Central Association of Colleges and Schools and provide assistance in the accreditation and school evaluation activities for its member schools.

f. To cooperate with the institutions of higher education in the review, revision and instruction of the teacher education programs.

g. Provide technical assistance to schools, as requested, in a manner which will assist them in decision making in their assessment of instructional programming.

3. Activities

a. Establish a file for all teachers through a procedure which includes the review of transcripts to determine the course preparation to qualify to teach high school courses as established under the standards and criteria for school accreditation.

b. Review printouts for all schools to determine the degree of compliance with the standards by each school.

c. Request and process additional data from schools that received citations, in order to finalize the degree of compliance with the standards.

d. Issue a classification letter to each school in which the degree of compliance with each standard and the accreditation status of the school is noted.

e. Provide training sessions for consultants and visiting team chairpersons to assist schools in the implementation of the School Improvement Process and the School Evaluation Activities of the North Central Association.

f. Serve as consultant and/or visiting team chairperson for at least four schools each year involved in the NCA School Evaluations and/or School Improvement Process.

g. Provide for a two-day workshop prior to the opening of each school year for administrators new to their position and new to the state.

h. Serve as a guest speaker for curriculum and administration classes upon request by the state teacher training instituitons.

i. Serve on various committees for the development and implementation of special projects such as, "Each Student Is Special," "Small Schools Seminar," and curriculum reviews.

j. Maintain membership in and continue in the leadership activities of the State and National Administrative Organizations.

k. Serve on the State Committee for the North Central Association as Deputy State Director to assist in carrying out the functions and activities of the organization.

l. Conduct three or four workshops and/or presentations in coordination with the Special Education Unit on program and course adaptation for the handicapped and low-achieving students at the secondary level.

m. Provide for on-site monitoring of some summer programs.

B. Evaluation

1. Summary

a. Implemented the revised Standards and Criteria for School Accreditation, effective August, 1982.

b. Provided for the accreditation of 212 public, seven nonpublic, and five institutional high schools and 21 junior high schools.

c. Implemented the four-phase School Improvement Process in 12 schools; initiated the process in approximately 10 schools and provided an awareness and initial orientation to the process in approximately 40 schools.

d. The School Improvement Process has satisfactorily expanded whereby it is becoming an acceptable accountability process for school districts.

e. The need for coordinating the School Improvement Activities statewide resulted in employing an assistant director to carry out these functions.

f. Provided for four training sessions to approximately 75 consultants and team chairpersons that will assist schools in the school evaluation activities for the State School Improvement Process and the North Central Association.

g. Provided two, two-day inservice sessions to 107 first-year and new-to-the-state school administrators.

2. Trends

a. Small high schools with enrollments of 35 or less are finding it difficult to meet the standards for accreditation, i.e., curriculum. Inversely, a standard not being in place in the remaining 85 percent of the schools is becoming quite uncommon. The standards being in place is becoming a given in most schools.

b. Schools are beginning to investigate alternatives for accrediting schools. Consideration is being given to the accreditation of schools based on outcomes instead of the traditional input standards.

c. A larger number of schools is considering the sharing of teachers and/or facilities to increase the capacity to meet the standards for accreditation.

d. High school programs include a more adaptive curriculum for students that are not achieving in the regular system. Alternative type programs are being included for dropouts to facilitate their chances to earn a high school diploma.

e. The number of schools providing summer programs is increasing. The area experiencing the greatest increase is driver education.

f. The on-site visitations that were previously conducted by the Secondary Education Unit are being replaced with on-site visitations during the activities involved in the School Improvement Process. A visiting team plus Department staff provide more structure and direct assistance to schools during the time schools are in need of assistance for planned revisions.

3. Problems

a. Difficulties

1) A larger number of private and/or parochial high schools are operating without minimum approval. These schools have one or two students or less at a grade level. Complying with the statutory requirements is nearly impossible.

2) The alternative high schools for dropouts cannot function effectively and efficiently if they fully comply with the minimum time requirements for instruction required for a unit of credit.

3) The funding formula to determine proportionate payments for summer programs and alternative programs is not equitable. The formula currently in place provides excessive state funding, 200-300 percent of cost in some instances.

b. Work Remaining

1) To broaden the School Improvement Process activities to involve 85 percent of the schools in North Dakota.

2) Continue to establish more effective methods of school evaluations which will include procedures for identifying student, program, and school outcomes as alternative means for accrediting schools.

3) Research possible alternatives to provide for minimum approval for effective private and parochial high school programs.

c. Plans

1) Provide a minimum of two training sessions annually to potential consultants and team chairpersons to the School Improvement Process.

2) Provide for a review of the standards for accreditation within the next three to four years to determine if some or all of the input standards are already in place prior to the consideration for accreditation.

3) Review the practice and criteria being used for accepting preparation as equivalent to a minor. Possible changes could include increasing the minimum number of hours required and/or identifying specific course preparation which more closely follows college granted minors.

4) Review procedures and forms currently used to gather data. The possible process of submitting data via an electronic system needs to be explored.

III. Driver Education

A. Function/Responsibility

1. Description

To assure the availability of an approved two-phase driver education program to all high school students as provided in NDCC 39-06-17, Restricted licenses. For licensure prior to age 16, students must complete a course of classroom instruction and an approved course of behind-the-wheel instruction.

2. Ojectives

a. Assure that teachers of drivers education programs meet the minimum qualifications as established by the Superintendent of Public Instruction.

b. Assure that the required minimum time of instruction is provided in both the classroom and behind-the-wheel phases of the program.

c. Assure that all students completing both phases of instruction are provided a certificate of completion following the successful completion of both phases of the program.

3. Activities

a. Review preparation of teachers to determine minimum qualifications for issuance of the Drivers Education Credential.

b. Issue Driver Education Credentials and maintain a file on all teachers.

c. Review data from forms submitted to determine type and costs of programs, verify compliance with minimum time requirements, determine type and amounts of insurance coverage for driver education vehicles, and compile data on numbers of students completing programs.

d. Verify completion of approved driver education programs as submitted by schools in order to process the issuance of individual student completion certificates

e. Serve on the board for North Dakota Driver and Traffic Safety Association.

B. Evaluation

1. Summary

a. During the 1983-85 biennium, 15,807 students successfully completed an approved driver education course. Normally 18,000 to 20,000 students completed the course during the biennium as the classroom instruction portion was a requirement for graduation.

2. Trends

a. The majority of the schools have switched or are considering the switch to providing the programs during the summer months due to scheduling and availability of additional foundation aid payments.

b. More students will complete the commercial driving school course due to comparable cost and no classroom instruction.

3. Problems

a. The driver education courses are not available to all students because of the high fees (i.e. $150.00) being charged by some school districts. Students who wait until they are 16 to take the drivers examination do not have to take drivers education training; therefore they receive no classroom instruction.

b. Lack of funds in the Department of Public Instruction do not allow for providing bicycle and traffic safety pamphlets.

1) Plans

a) Rewrite and update the Drivers Education Administrative Resource Guide to reflect current and planned changes in the instructional programs.

b) Continue efforts to enact legislation to provide funding for driver education courses in the schools; i.e. a $5.00 surcharge on all moving traffic violations to be used by school districts and distributed on a pupil basis.

IV. Motorcycle Safety Education

A. Function/Responsibility

1. Description

Statutory responsibility is vested in the Superintendent of Public Instruction (NDCC 39-28-02) to establish standards for motorcycle safety courses which shall include instructional standards, course approval, and teacher certification standards. The Superintendent shall reimburse public schools and organizations offering and providing approved courses for actual costs of the courses.

2. Objectives

a. Assure that all novice motorcycle riders, ages 14 to 16, have access to a motorcycle safety education course taught by a qualified instructor. (MRC-Motorcycle Rider Course)

b. Assure that experienced motorcycle riders have access to motorcycle safety education courses taught by qualified instructors for improving their skills. (BBP-Better Biking Program)

c. Assure that all MRC students receive a minimum of 20 hours instruction.

d. Approve all motorcycle safety education courses and budgets to assure compliance with the standards established by the Superintendent of Public Instruction.

e. To encourage establishing an advisory board representing all groups and organizations interested in activities for statewide motorcycle safety education.

3. Activities

a. Approve qualified motorcycle safety education instructors to attend chief instructor courses for providing the latest MSF (Motorcycle Safety Foundation) instruction and materials to North Dakota instructors.

b. Contract with the North Dakota Safety Council, Inc. and with ABATE (American Bikers Aimed Toward Education) of North Dakota to provide motorcycle safety education courses throughout North Dakota which conform to the standards established by the State Superintendent of Public Instruction.

c. Edit and approve for payment the budgets submitted for actual costs of instruction at each site.

d. Maintain records of all related expenditures and student program completions.

e. Arranged three meetings of those groups interested in motorcycle safety education to assess the programs statewide in order to eliminate duplication of efforts and expenditures.

f. Provide information and testimony to the legislature concerning Motorcycle Safety Education.

g. Participate in a statewide study of motorcycle safety education conducted by the National Motorcycle Safety Foundation.

B. Evaluation

1. Summary

a. Approximately 3,100 students successfully completed a training course during the 1983-85 biennium.

b. The National Motorcycle Safety Foundation state survey provided a sense of direction for organization and implementation of motorcycle safety education throughout the state of North Dakota.

2. Trends

a. Plans to have a coordinator of traffic safety within the Department of Public Instruction have been developed. One of the duties would be to coordinate all motorcycle safety education programs statewide.

b. The new MSF (Motorcycle Safety Foundation) curriculum will be adopted for instructor training and for course content in the Motorcycle Rider Course for novices.

3. Problems

a. There is a lack of coordination of efforts and resources concerning motorcycle safety education among the groups interested in training riders in the state; i.e. colleges, Safety Council, ABATE, North Dakota Driver and Traffic Safety Education Association, Highway Department, Highway Patrol, Department of Public Instruction, and motorcycle dealers.

b. Not all concerned groups favor full adoption of the Motorcycle Safety Foundation standards; i.e. college instructors who no longer are motorcycle riders.

c. Plans are to have a coordinator in the Department of Public Instruction to initiate meetings of all groups interested in motorcycle safety to form an advisory board for coordination of all programs statewide.

d. There is a need to revise and update the Motorcycle Safety Education Guidelines to reflect changes made and to reflect the changes that may result from adoption of all or part of the new Motorcycle Safety Foundation curriculum.

V. Bonding and Approval of Book Publishers

A. Function/Responsibility

1. Description

To maintain procedures for publishers or their representatives offering books for sale to schools in North Dakota to comply with the bonding procedures as established under NDCC 15-43-01.

2. Objectives

a. Develop and maintain procedures to assure that all publishers offering books for sale in North Dakota provide this office with the following:

1) A bond executed by a surety firm at a $2,000.00 legal minimum. The bond may be for a maximum of five years and is renewable.

2) A sworn statement of prices for books sold in North Dakota stating the lowest wholesale price sold anywhere in the United States and an exchange price if any.

3) A standard copy of all textbooks offered for sale in North Dakota by each company.

b. Provide for a quarterly updated list of textbook publishers authorized to sell textbooks in North Dakota.

3. Activities

a. Transmit initial forms and forms for renewal for surety bonds, etc., to all publishers intending to and/or are offering textbooks for sale to schools in North Dakota.

b. Review statement of prices and surety bonds as submitted by all publishers.

c. Publish the names of all approved publishers in the directory and other appropriate publications of the Department of Public Instruction.

B. Summary

Fifty-one publishers of textbooks are currently authorized to sell textbooks to schools in North Dakota. This is a slight decline in numbers as a recent trend would indicate an increase in mergers by major publishers.

ADULT BASIC AND SECONDARY EDUCATION PROGRAMS

I. Program Implementation

A. Function/Responsibility

1. Description

The coordination of Adult Basic and Secondary Education programs.

2. Objectives

a. To ensure programs are funded based upon the needs of each community.

b. To monitor and evaluate each program.

c. To coordinate services with other agencies.

3. Activities

a. To prepare the North Dakota State Adult Education Plan.

b. To disburse funds according to prescribed guidelines.

c. To fund projects based upon community needs.

d. To coordinate services with other agencies.

e. To monitor each program to ensure compliance.

f. To promote the concept of Adult Basic and Secondary Education programs.

B. Evaluation

1. Summary

a. A three year plan (1985-1987) has been prepared and approved by the United States Office of Education.

b. Over a million dollars have been dispersed by this office for Adult Basic and Secondary Education.

c. Over 30 projects have been funded based upon identified needs.

d. Financial and nonfinancial agreements are drawn with other agencies for coordination.

   e. The Adult Basic Education program is being promoted through television, radio, etc.

   f. Twelve testing centers have been established to handle GED testing.

2. Trends

   a. Certification of Adult Education teachers.

   b. More adults changing careers need assistance from Adult Learning Centers.

3. Problems

   a. Need legislation to clarify certification requirements.

   b. Additional monies needed to expand services.

ELEMENTARY EDUCATION

I. Approval of Elementary Schools

A. Function/Responsibility

1. Description

   To assure that all public elementary schools are within statutory compliance and to approve private and parochial schools.

2. Objectives

   To assure that all teachers are certified, a minimum curriculum is provided to all students, that the school meets for the minimum required time and meets fire, health, and safety standards.

3. Activities

   a. To review Certificates of Compliance;

   b. Teacher assignments; and,

   c. Curriculum offerings for all elementary schools each year.

   d. Report their status to the Superintendent of Public Instruction by December 1, of each school year; and,

   e. To maintain liaison with county superintendent regarding approval questions.

B. Evaluation

1. Summary

   During the 1983-85 biennium approximately 422 schools were reviewed and approved. Nine schools were reported as non-approved.

2. Trends

   An increasing number of fundamentalist and home schools who cannot or will not meet approval standards.

3. Problems

Maintenance of quality educational opportunities for all children may be undermined by a growing number of nonapproved school operations.

II. Accreditation of Elementary Schools

A. Function/Responsibility

1. Description

To adopt and publish accreditation standards for public/private schools as authorized by NDCC 15-21-.04-1.

2. Objectives

To provide quality educational programs which exceed minimum standards for all children and to allow recognition to schools which seek such accreditation status.

3. Activities

a. Review and revision of standards (ongoing).

b. Publication and dissemination of standards to half of all elementary schools each year.

c. Review and evaluation of individual school accreditation reports.

d. Assignment and notification of accreditation status of each school.

e. Review and recommendations regarding elementary principal credential.

B. Evaluation

1. Summary

During the 1983-1985 biennium 321 schools were accredited; 29 schools were accredited with commendation; 50 were accredited warned and 22 were not accredited.

2. Trends

More schools in medium and large size districts are seeking the accredited with commendation status by undertaking the seven-year school improvement process.

3. Problems

Small schools and schools with rapidly declining enrollments are finding it increasingly difficult to meet the accreditation standards.

III. Early Entrance Programs

A. Function/Responsibility

1. Description

To provide guidelines and program approval to public schools in accordance with NDCC 15-47-01 providing for the early entrance of gifted children to kindergarten and/or first grade.

2. Objectives

To assure that children who by reason of special talents or abilities are offered educational opportunities commenserate with such abilities.

3. Activities

a. Review and revise guidelines for Early Entrance.

b. Provide approval to districts of developmental and readiness screening insturments.

c. To approve school programs that meet general guidelines of the Department of Public Instruction.

d. To provide technical assistance to schools in developing local early entrance programs.

B. Evaluation

1. Summary

All public schools have been reviewed for current early entrance programs.

2. Trends

Special Education units have been taking a more active role in developing comprehensive programs and this has reduced the burden on individual schools.

3. Problems

No major problems have been encountered.

IV. State Spelling Bee

A. Function/Responsibility

1. Description

To sponsor and coordinate the State Spelling Bee with the North Dakota Newspaper Association and the County Superintendents Association.

2. Objectives

a. To create more interest in spelling.

b. To recognize outstanding spellers.

c. To increase awareness of importance of spelling among parents, educators and the general public.

3. Activities

a. Cooperate with the county superintendents in setting the guidelines, dates, etc.

b. Disperse information to superintendents, principals and county superintendents.

c. Plan, organize and conduct the State Spelling Bee (written and oral competition).

d. Sponsor and coordinate the noon luncheon.

e. Award certificates, prizes and trophies.

f. Disperse publicity to news media.

B. Evaluation

1. Summary

One hundred forty-four students, in grades five through eight, representing 52 counties, participated in the North Dakota State Spelling Bee on April 18, 1985, in Bismarck. Certificates were awarded to all participants. Individual trophies were awarded the top 25 students. Bobbi Dykema, Bakker School, Emmons County, represented North Dakota at the National Spelling Bee on June 2-7 in Washington, D.C. Bobbi placed 19th out of 168 contestants.

2. Trends

More schools are participating in spelling bees on the local level each year, and as a result of the several years of State Spelling competition, North Dakota students are becoming better spellers. Our goal is to recruit all counties to participate in the State Spelling Bee.

3. Problems

Part-time county superintendents not wanting to become involved with the spelling bee.

The state winner always has to raise extra dollars to go to the national competition.

V. Young Citizen's League

A. Function/Responsibility

1. Description

   To sponsor and coordinate the Young Citizen's League activities in cooperation with the county superintendents, teachers and principals.

2. Objectives

   To assist in giving the best possible instruction, training and guidance in good citizenship to grade school children of North Dakota.

3. Activities

   a. Meet with the state Y.C.L. officers and county superintendents to plan the State Y.C.L. Convention.

   b. Prepare forms, letters and collect information from county superintendents necessary for the state convention.

   c. Give assistance to state junior Y.C.L. officers conducting the Y.C.L. convention.

   d. Sponsor and coordinate the noon luncheon for the Y.C.L.'ers and spellers.

   e. Cooperate with Delta Kappa Gamma for state officials reception.

   f. Disperse publicity to the news media.

B. Evaluation

1. Summary

   State Y.C.L. convention was held April 19, 1985, with delegates from nine counties participating. Delegates participated in the noon luncheon on April 18, 1985 and attended the state officials reception at the Capitol.

2. Trends

   a. More emphasis is being placed on patriotism.

   b. Teachers and principals are asking for citizenship training in classrooms.

   c. Schools and county superintendents are asking for assistance from the Department of Public Instruction in organizing, etc.

3. Problems

   a. Some county superintendents do not want the extra work.

   b. Some county superintendents have not had any experience with Y.C.L.

   c. Misunderstanding of Y.C.L. as being extracurricular. Need to inservice principals and teachers.

   d. Need to print more Y.C.L. manuals and update the Manual.

   e. Short-Term Plan: double the Y.C.L. memberships.

   f. Long-Term Plan: all counties have an active Y.C.L. organization.

VI. Mathcounts

A. Function/Responsibility

1. Description

To sponsor and coordinate MATHCOUNTS in cooperation with the National Society of Professional Engineers and the County Superintendents Association.

2. Objectives

   a. To elevate the prestige associated with mathematics among seventh and eighth grade students.

   b. To increase awareness of the importance of mathematics among parents, educators and general public.

3. Activities

    a. Disperse information to superintendents, principals and county superintendents of the rules and regulations of MATHCOUNTS. Mail guidelines for school registration forms and handbooks to all schools.

    b. Design, mail, collect and coordinate county level orders for tests, trophies and certificates from county superintendents and NDSPE.

    c. Plan, organize and cooperate in the conduct of the state MATHCOUNTS competition with NDSPE.

    d. Disperse publicity to newspapers, the Perspective and education organizations.

B. Evaluation

1. Summary

Ninety-eight seventh and eighth grade students from fifty North Dakota counties participated in the North Dakota MATHCOUNTS competition in Bismarck on April 17, 1985. The State sent four winners to the National MATHCOUNTS competition in Washington, D.C.

2. Trends

    a. Shortage of math teachers and more emphasis is being placed on mathematics.

    b. Each year, more schools in the counties are participating in MATHCOUNTS.

3. Problems

    a. MATHCOUNTS tests are too difficult for seventh and eighth grade students.

b. A few part-time county superintendents do not coordinate the county level competition meets; consequently, students in those counties are not participating.

C. Resources

1. Minutes of NDAESP meetings.
2. Minutes of State Evaluation Committee meetings.
3. All minutes, records, data for the Young Citizen's Leauge, the Spelling Bee and the MATHCOUNTS.
4. Accreditation/Approval status of all public/private elementary schools.
5. Early Entrance Program status for all schools.
6. After May 1, 1986, records of Y.C.L., prior to 1980, will be found in the Archives at the Heritage Center in Bismarck.
7. Accreditation Manual
8. Annual Report of Elementary Schools
9. Guidelines for Early Entrance
10. Accreditation Certificates
11. School Improvement Manual
12. Child Abuse/Neglect Model Program
13. Guidelines for Elementary Principal Credential
14. Y.C.L. Manual
15. Y.C.L. Charters
16. Spelling Bee Participation Certificates
17. Other - Spelling Bee Badges and Y.C.L. Badges

SCHOOL FOOD PROGRAMS

The School Food Programs Unit is primarily responsible for the administration of federal programs. The unit receives federal funding through the United States Department of Agriculture (USDA), Food and Nutrition Service (FNS) for the National School Lunch Program (NSLP), School Breakfast Program (SBP), Special Milk Program (SMP), Child Care Food Program (CCFP), Nutrition Education and Training (NET) Program, Food Distribution (FD) Program, Food Distribution Program on Indian Reservations (FDPIR), and Temporary Emergency Food Assistance Program (TEFAP). Beginning October 1, 1985 funding will also be received for the Summer Food Service Program (SFSP).

I. Diet and Health

A. Function/Responsibility

1. Description

Promoting the diet and health of children and adults through the provision of nutritious foods, nutritious meals and nutrition education.

2. Objectives

a. To improve diets through the distribution of nutritious foods.

b. To assist in the provision of nutritious meals to recipients of NSLP, SBP AND CCFP.

c. To disseminate accurate nutrition information to all eligible programs.

d. To conduct needs assessment relative to diet/health of recipients.

3. Activities

a. Ordered, received, warehoused and distributed donated foods in a timely manner.

b. Provided materials and inservice in nutrition.

c. Provided timely meal reimbursement to local recipients.

B. Evaluation

1. Summary

a. Distributed 20,600,000 pounds of donated foods;

b. Awarded 91 NET grants to local districts, totaling $42,000, and;

c. Distributed $18,500,000 in cash entitlements to local agencies.

2. Trends

Throughout the country there is a continuing concern about diet and health. Nutrition and nutrition education will continue to be important as individuals acquire life long habits.

3. Problems

As hunger increases and funding sources decrease, wise use of the dollar will become a major factor related to diet and health. There will be an increased need for accurate nutrition information.

II. Regulatory Compliance

A. Function/Responsibility

1. Description

Assure through monitoring and program reports that state and local programs are meeting the regulatory requirements of federal programs.

2. Objectives

a. To conduct the required program reviews and audits as outlined by 7CFR Parts 210, 215, 220, 226, 227, 250, 251, and 253.

b. To monitor all contracts for compliance.

c. To plan and expend administrative funds in accordance with 7CFR Part 3015.

d. To submit required reports within the required time frames.

3. Activities

   a. Conducted on-site reviews of schools, charitable institutions, child care facilities, emergency food programs, local FDPIRs, NET grant recipients and summer camps.

   b. Completed a state budget and federal budgets/plans of operation within the guidelines provided.

   c. Administered approved budgets.

   d. Completed required FNS reports and submitted within required timelines (FNS-10, 42, 44, 152, 155, 242, 269 and 270).

   e. Reviewed provisions of contracts with contracting agencies to ensure compliance.

B. Evaluation

1. Summary

   a. Conducted 455 program reviews and 18 audits.

   b. Completed one state budget and six federal budgets/plans of operation. Administered funds approved.

   c. Underwent one A-128 audit and seven FNS management evaluations.

   d. Reviewed all contracts at least annually.

2. Trends

The federal government is increasing requirements for program accountability while attempting to decrease funding support.

3. Problems

An increasing number of federal regulations which lend themselves to conflicting interpretation. The A-128 audit is in the process of being resolved.

III. Initiate, Expand and/or Maintain Food and Nutrition Service Programs

A. Function/Responsibility

1. Description

Initiate, expand and/or maintain food service programs. The purpose is to allow the benefits of the programs to be available to eligible recipients.

2. Objectives

a. To inform potential recipients about the availability of program benefits.

b. To accept additional food service programs or the added responsibilities which may come with existing programs.

3. Activities

a. Conducted mass mailing to all licensed child care facilities.

b. Conducted mass mailing containing NET program information and grant applications to eligible schools and teacher learning centers.

c. Regularly announce program benefits through newspaper, radio and allied agencies.

B. Evaluation

1. Summary

a. Added 14 centers and 3 sponsors to CCFP. Increased from 1,013 to 1,526 family day care providers served in the CCFP.

b. Did NET mailing to 500 potential grant applicants.

c. Annually announced benefits in NSLP, SBP, CCFP and FD. At the time of each distribution announced benefits in FDPIR and TEFAP.

d. Increased from 124 to 140 the charitable institutions served by the FD Program.

2. Trends

The federal government has targeted some programs for elimination and/or major cuts. Nationally, we see an increased need for preschool programs and programs for the elderly. These programs are needed as the population in these categories increases and as a result of often poor or reduced earning capacities.

3. Problems

Reduction of funds at the federal level will make program initiation, expansion and maintenance difficult. Increasing pressure will be placed on state government by the federal government to increase state dollars if federal dollars are to be received. The unit will begin administration of the Summer Food Service Program effective October 1, 1985.

IV. Consultative and Support Services

A. Function/Responsibility

1. Description

Provide consultative and support services to legislators, USDA, local agencies and allied organizations/agencies.

2. Objectives

a. To provide technical assistance as requested and needed.

b. To provide publications, manuals and other written information which will allow for ease of program operation.

c. To provide inservice through meetings and workshops.

   d. To work with allied organizations/agencies, legislators and USDA in the furtherance of food and nutrition programs.

3. Activities
   a. Revised correspondence course
   b. Developed nutrition teaching modules
   c. Wrote newsletters
   d. Developed and conducted workshops
   e. Developed and revised program manuals
   f. Provided technical assistance as requested by local programs.
   g. Commented on legislation and regulations.
   h. Have membership in and participate in allied organizations.

B. Evaluation

1. Summary
   a. Revised correspondence course and made available to 64 food service personnel.
   b. Developed and printed 200, 11 volume sets of teaching modules.
   c. Printed 24 newsletters, in addition to Perspective articles.
   d. Conducted 33 workshops
   e. Developed a CCFP manual, revised two school food service manuals.
   f. Had 20 memberships with allied organizations.

2. Trends

Increased need for technical assistance in helping implement and understand regulations. Programs may need assistance in determining whether it is to their benefit to remain in a federally funded program if regulations increase.

3. Problems

USDA, FNS is assessing what funds should be provided to states for administering programs. Program manuals will need to be developed for two programs.

V. Program Improvement and Change

A. Function/Responsibility

1. Description

Promote and encourage ideas and activities which may result in program improvement and changes at all levels of program operation.

2. Objectives

a. To improve the warehousing and distribution of donated foods.

b. To increase the utilization of computers.

c. To simplify and streamline state and local program operations.

d. To identify areas of need and possible solutions.

e. To develop and implement policies.

3. Activities

a. Developed forms for CCFP, FDPIR, TEFAP. Revised forms in all other programs.

b. Purchased microcomputer. Purchased and/or developed computer software.

c. Relocated warehouse and bid transportation.

d. Conducted program evaluation and assessment surveys.

e. Established a uniform food inventory system.

f. Attempted to standardize personnel and other procedures at local FDPIR.

g. Developed and implemented an office filing system.

h. Developed a distribution system for TEFAP.

B. Evaluation

1. Summary

a. Closed Jamestown Warehouse in 1983, with temporary relocation. Located warehouse in Bismarck on June 1, 1985. Allowed for increased control and improved facility.

b. Let bids and awarded transportation contract for commodities in 1984. This was the Unit's first attempt to reduce costs for transportation.

c. Conducted nine surveys.

2. Trends

Food service programs will need to tighten program operations as federal funds decrease. There will be an increased need to be responsive to program recipients at all levels (i.e. students, low income persons, etc.).

3. Problems

Decrease in funds will cause change and innovation in program operations. The unit faces the challenge of further improvements to warehousing and transportation, and increased use of computer time as staff time becomes premium.

C. Resources

1. School Food Programs Advisory Committee Minutes.
2. NET Task Force Meeting Minutes.
3. Number of programs participating in FNS programs.
4. All funds expended and where expended.

5. Number of income eligible children participating in NSLP, SBP, and CCFP.
6. Facilities reviewed and problems encountered.
7. Amount of commodities distributed and to which facility.
8. Number of people served by program benefits.
9. Most forms currently on file with OMB.
10. Child Care Food Program Manual
11. School Food Service Manual
12. School Food Service Administrative Manual
13. "Nutrition Notes" Newsletter
14. "School Food News" Newsletter
15. CCFP Menu Planner Workbook
16. SFS Menu Planner Workbook
17. School Food Service Worker's Correspondence Course
18. "Teaching Nutrition: An Elementary Teacher Inservice in Nutrition Education" (11 Volumes)
19. "Indian Reservation Food Distribution Program" pamphlet
20. "Child Care Food Program" pamphlet

TEACHER CERTIFICATION

I. License Teachers

A. Function/Responsibility

1. Description

The certification office provides an application to the North Dakota colleges for current graduates, to individuals out-of-state for entrance, and to all candidates for certification renewal. The office director acts as a resource person to college education divisions, boards, administrators, patrons and college students. Statutes reflecting activities mandated by law include NDCC 15-36, 15-37-01, 15-38, 15-49-03 responsibility which assures the public adopted standards are being met by each teacher applicant licensed. The certification office establishes the computer data base of personnel information for use by other divisions in the Department of Public Instruction.

2. Objectives

The candidates must present evidence of character and fitness to teach in the public schools of North Dakota and adequate educational preparation. Candidates are to comply with the certification regulations and statutes.

3. Activities

The applications are reviewed for compliance with the certification regulations and statutes. Transcripts are scrutinized for validity and determination of appropriate level of preparation in the college granted majors and minors.

B. Evaluation

1. Summary

The certification office issues 2,803 entrance certificates, 1,871 two-year renewals, 2,455 five-year renewals and 420 duplicates.

2. Trends

The certification system went through a complete philosophical change in 1973 when the legislature gave added responsibility to the Teachers' Professional Practices Commission under NDCC 15-38 and rewrote NDCC 15-36. Several statutes were repealed in favor of NDCC 15-36-01 which established a hearing procedure by the State Superintendent to develop certification regulations. The trend at that time was to move away from life certificates to five year plateaus with inservice training credits tied to the renewal certificates.

3. Problems

These new regulations were placed into effect July 1, 1976. Nine years later nearly one-half of the North Dakota teaching staff is on this system. This has created a tremendous paper work load and will continue to increase as the rest of the life certificated personnel leave or retire from teaching. The system is computerized for added efficiency.

C. Resources

The certification regulations were promulgated by law under NDCC 28-32 as authorized in NDCC 15-36-01. The records of all meetings and hearings are on file dating back to the initiation of the process in 1973.

The certification office data include a master file of all teachers certificated in the past and complies with the open records statutes.

The Certification Division has printed regulation booklets, Code of Ethics and Professional Practices pamphlets.

II. Credentials

A. Function/Responsibility

1. Description

The Department of Public Instruction has a system of school accreditation under NDCC 15-21-04.1 which is based on a predetermined set of standards for educational excellence at the school district level. Schools attempt to comply with the standards to improve the local educational experience of the students. Part of the standards include preparation of staff members in selected areas beyond the Bachelor's degree level. Expertise and training is recommended for superintendents, elementary principals, secondary principals, media, guidance, reading specialists, drivers education, and special education areas.

2. Objectives

Individuals apply for evaluation of graduate education credits for specific credentials. Part of the evaluation is based on experience and recommendations from past supervisors. These credentials are recorded in the master computer file to be used in the school evaluation process.

3. Activities

The applications are screened for completeness and evaluated for the issuance of the appropriate credential. Renewal requests are screened for adequate preparation requirements and recommendations. All data is placed into the master computer file on personnel.

B. Evaluation

1. Summary

The elementary principal's criteria were reviewed by the professional association and changes were recommended to the Department of Public Instruction which were accepted.

2. Trends

Periodic reviews to update the criteria in all credential areas will be accomplished on a need basis.

3. Problems

The accreditation standards should be strengthened to assure continued quality in the local educational setting. As finances become an increasing problem with school districts, a tendency exists to fall out of compliance with various standards.

C. Resources

1. All of the credentials issued after approval are placed into the master personnel computer file. This information is treated as part of the open public record law.

A credential booklet of all criteria used for the evaluation of each credential is available upon request and the information is provided to all schools and county superintendents in the state.

III. Secretary Designee to Teachers' Professional Practices Commission

A. Function/Responsibility

1. Description

The Teachers' Professional Practices Commission was strengthened in 1973 under NDCC 15-38-18 to include the three responsibilities of designing a Code of Ethics, investigate unethical conduct reports on teachers, design standards for teacher certification and in 1985 a fourth, to provide recommendations on inservice education to the State Superintendent.

2. Objectives

The secretary identifies the trends in certification and presents items for action to the Commission and State Superintendent. The secretary coordinates all of these efforts.

3. Activities

The secretary organizes the meetings for the Teachers' Professional Practices Commission, establishes the legal hearings on unethical conduct charges, researches information on topics for discussion and consideration, and provides background information on the activities in other states.

B. Evaluation

1. Summary

The discussions under way of the Teachers' Professional Practices Commission include hearings on program approval of college teacher education programs for certification purposes, inservice education models or structures for a state, strengthening regulations, and future supply/demand of teachers.

2. Trends

The national studies on education have identified goals to be achieved to improve the quality of education. Our state is responding by initiating program approval of college teacher education programs which will include standards for entry into teacher education at the junior level, academic proficiency, and understanding of methodology upon exiting from the program. Inservice education will be promoted for the veteran teaching staffs.

3. Problems

The entire effort to establish a first time program approval system for teacher education programs in the content area for certification purposes is being attempted without any funding allocated from any source. Consequently, the time element is elongated. The national accreditation standards must be adapted and adopted by our state and approved by the national executive committee before our programs will be accepted across the country. Both regulation and statutory changes may be necessary to ensure that the standards are followed. Several months of hearings will be involved in finalizing the plans for a set of standards for program approval, a state model or structure on inservice education, changes in regulations for quality and protection against unfit applicants and supply/demand information.

C. Resources

1. All meeting records of the TPPC dating back to the establishment date of 1973 are on file in the certification office.
2. The records are open to the public as prescribed by law and include the minutes of each meeting held.
3. The TPPC has available in quantity a brochure describing its statutory authority, processes and functions.

IV. Issuing the High School Equivalency Certificate Based on GED Testing

A. Function/Responsibility

1. Description

The certification office directs the national GED testing programs of the state through liaison with twelve college counseling centers. The applicants for testing are provided with an application that delineates eligibility for testing based on age. The criteria adopted for the state begin with age 18 and the person's class has graduated for issuance of the High School Equivalency Certificate. Applicants who are out of a regular school program for a minimum of six months and are 17 years of age may establish a need for early testing to use the scores for one of the four reasons of military, vocational, academic or employment denied that requires GED testing minimum with a guarantee of hiring after successful testing.

2. Objectives

The North Dakota High School Equivalency Certificate is issued to successful applicants who reach a standard score of 40 or an average on all five tests of a 50 score.

3. Activities

The applications are reviewed for accuracy and completeness in line with the adopted state criteria. Applicants with special considerations for age and need are reviewed and approved or disapproved. College counseling centers are monitored for security and testing conditions. The data base for all past applicants is computerized.

B. Evaluation

1. Summary

The certification office processed 1,486 High School Equivalency Certificates in 1983 and 1,261 in 1984 based on successful completion of the GED tests.

2. Trends

The use of the GED testing service has increased as high school dropouts find it increasingly more difficult to find employment. The educational advancement of any individual hinges on completion of this program to enter further vocational and academic pursuits.

3. Problems

There is a desire to include a writing sample for testing. The writing sample complicates the GED testing as it is a gratis service done by twelve college counseling centers and is not self-supporting. The turnaround time will be affected by this move, also. The new GED tests will require more math competency which will affect adult education teachers delivering the training as well as the testees.

C. Resources

The operation of the GED program includes attendance at the annual meeting and an occasional state meeting.

Data for public use would include an annual summarization of the data in the computer on the testing program.

No publications were prepared on the data summarized from the computer at the end of the year on the GED program.

INDIAN EDUCATION

I. Indian Education

A. Function/Responsibility

1. Description

Advocate for the improvement of educational projects and activities for Indian students, grades K-12, throughout the state of North Dakota.

2. Objectives

Provide assistance to parents in recognizing and increasing their role in the education of their children, facilitate and assist schools in the review of their curriculum and instructional methods, assist schools in identifying fiscal resources which will help in meeting the special educational and culturally related academic needs of their students, assist schools in identifying programs and activities which will increase educational opportunities and ultimately increase academic achievement.

3. Activities

Provide and direct inservice training to school staff and parents; provide resources to schools in the four-phase school improvement process; establish and coordinate services to schools on a regional or statewide basis; assist schools in identifying exemplary programs such as classroom management, tutoring, curriculum, instructional strategies, etc., which lead to quality programs; assist and work with colleges and universities in strengthening Indian education; and, plan and implement an annual Indian youth leadership institute.

B. Evaluation

1. Summary

The unit works with some 25 schools who have a primary responsibility to educate Indian children, grades K-12. The unit has actively supported, encouraged, participated and assisted schools in improving the academic performance of their Indian students.

2. Trends

The Department and schools in the state are taking a more active and positive role in identifying, assessing, planning and implementing programs conducive to improved academic achievement of Indian students.

3. Problems

There still remains a number of schools, administrators, teachers and educational support staff who do not feel Indian students have a need to be treated differently than the general population of students. These people are a great liability to the academic success of the Indian student.

II. Race Equity

A. Function/Responsibility

1. Description

Promote the concept of racial equity in North Dakota schools, monitor and record race activities occurring in the state's schools, provide technical assistance to schools in race equity and improve a more positive image of minorities in textbooks and in other curriculum materials.

2. Objectives

Provide training and technical assistance to schools in the more effective placement of Indian children in special education classes, work with teachers to improve their competence in special education testing, provide assistance to schools to assure that students are not segregated based on race only, provide human relations training to school district personnel on racial harmony, and develop and implement a leadership training program for Indian youth.

3. Activities

Identify educators who need assistance in the placement of Indian children in special education classes, identify tests which are more appropriate and less biased relative to minority students, identify and work with schools which might be segregating students solely on the basis of race, and provide assistance to schools (educators and students) in race relations.

B. Evaluation

1. Summary

Activities in race equity in schools has made some in-roads. Many more schools have become aware of their responsibility to minority students, whereby some have taken positive action to address their needs while others have continued to ignore these student needs.

2. Trends

The trend is that more educators are realizing the factors which can and do contribute to the educational success of minority students.

3. Problems

There are still too many Indian and other minority students who are inappropriately placed in special and "disadvantaged" education classrooms. Generally, minority students are still regarded by educators as intellectually inferior to the general population of students in the state and as a result, this has been one of the causes of poor academic success among these students.

III. Bilingual Education

A. Function/Responsibility

1. Description

Referred to as the SEA Bilingual Education Program, this program cooperates with schools educating students who are identified or considered non-English speakers or limited English speakers.

2. Objectives

Provide technical assistance to schools in all aspects of bilingual education inluding collecting, aggregating, analyzing, publishing and disseminating student data on limited English proficiency. Provide assistance to other units within the Department in regard to language needs of minority students.

3. Activities

Provide inservice training to teachers and support staff in bilingual education, assist schools in testing students for English language proficiency, work with regional and national bilingual education centers in providing and coordinating technical assistance to LEAs who have bilingual programs.

B. Evaluation

1. Summary

There are eleven LEA bilingual education projects in North Dakota and one teacher training program. The LEA projects involve about

1,500 students, most of the students being in the elementary grades K-6.

2. Trends

   Schools in North Dakota are beginning to become more concerned and involved in assessing the English language proficiency needs of minority students. In conjunction with this, the schools are recognizing the need to review their curriculum programs, instructional approaches and the culture of their minority students.

3. Problems

   There still are a number of schools educating a sizable population of language minority students who do very little or nothing in terms of assessing their English language needs.

IV. National Origin Equity

A. Function/Responsibility

1. Description

   Promote national origin equity in schools throughout North Dakota, monitor and record national origin activities taking place in schools, and provide technical assistance to schools in the development of curriculum materials.

2. Objectives

   Assist schools in identifying LEP students, provide training to parents in national origin equity, and assist in reducing discriminating practices in public schools.

3. Activities

   Provide resources and references to schools needing information, train parents in the realization of equal educational opportunities for their children, schedule and oversee a five-day youth leadership conference, and assist schools in the development of culturally-sensitive curriculum materials.

B. Evaluation

1. Summary

This function has promoted equal educational opportunities for national origin students in North Dakota schools. Schools have requested assistance in the above listed objectives.

2. Trends

There is an increase in the number of schools recognizing the importance of special needs of national origin students.

3. Problems

There is an insufficient number of teachers trained to minimally meet the needs of national origin students. Teachers who are more sensitive to the cultural and linguistic needs of national origin students are few in number.

V. Educational Equity Coordinator

A. Function/Responsibility

1. Description

The coordinator of the Educational Equity (Title IX) program will be responsible for the day-to-day activities of administering the objectives and goals of the Title IX grant. The responsibility of the coordinator is mainly one of providing leadership, information and technical assistance to all public schools and other school types, enrolling eligible school-age children.

2. Objectives

   a. Fifteen women interested in educational administration will have evaluated their career plans and developed a plan to reach future career goals.

   b. Fifteen counselors in the state will have tried four new techniques to increase student exploration of nontraditional occupations.

   c. Ten classroom teachers will have developed curriculum plans for infusing "Women's History" into the curriculum.

   d. Five hundred junior and senior high girls will have an opportunity to explore math/science related careers.

   e. Five school administrators will have stated Title IX self-evaluation and action plans.

3. Activities

   Educational Equity resources available through the state agency include: a free lending resource library of training and supplemental materials; training manuals and classroom materials developed specifically for smaller rural schools; inservice training for educators, parents and students; statewide workshops concentrating on specific areas of concern; and on-site and telephone consultation regarding Title IX compliance and other equal opportunity issues. Four districts are working on self-evaluations and action plans. A "Bias-Free Training Workshop" was held in August to train teachers and counselors to address various equity issues with their staff and/or students. Several "Women In History" projects are planned for March.

B. Evaluation

1. Summary

Throughout the past two years the state agency has taken the lead in addressing sex equity concerns throughout North Dakota. In the fall of 1983 the State Superintendent sent a letter to all school administrators advising them that one of the thrusts of the Department of Public Instruction during the current year would be efforts on behalf of educational equity in the schools. The response from educators has been excellent. Approximately 100 school districts have used the equity services of the Department.

2. Trends

Over the past two years the Department of Public Instruction has become more conscious of its responsibility to provide equal educational opportunities to all young men and women in the state. The Superintendent of Public Instruction is committed to assuring that educational equity exists in North Dakota schools for all students. Schools will be assisted in their endeavor to comply with Title IX.

3. Problems

There has been a lack of emphasis in the area of providing equal educational opportunities to young men and women with a tendency to overlook federal mandates related to Title IX and the Civil Rights Act. The impact of this has been that students have been denied equal educational opportunities, usually resulting in lower academic achievement, stereotypes and fewer employment opportunities, especially for women. The state constitution provides for equitable provisions of education to all students within the boundaries although state legislation has been minimal pertaining to sex equity.

CURRICULUM

I. Curriculum Development

A. Function/Responsibility

1. Description

The State Superintendent has charge and supervision of the standardization of schools and the preparation of courses of study in NDCC 15-21-09 and the general supervision of the public schools in North Dakota (NDCC 15-21-04). In addition, NDCC 15-21-04.1 provides him with the authority to adopt accreditation standards for the public and private schools.

2. Objectives

a. To provide curricular assistance to North Dakota public and nonpublic schools.

b. To develop curriculum guidelines appropriate for North Dakota.

c. To cooperate with schools, agencies and organizations relative to curriculum.

d. To promote quality curriculum development.

e. To disseminate curricular information.

f. To involve the North Dakota Curriculum Council in identifying state curricular trends and concerns and to prioritize state curricular activities.

3. Activities

a. Solicited involvement of the North Dakota Curriculum Council in state curriculum matters.

b. Developed a comprehensive school health program framework.

c. Revised A Guide for Curriculum Planning, K-12, 4th ed. with assistance from the NDCC.

d. Contracted with the North Dakota Mathematics Curriculum Committee to develop a K-12 mathematics curriculum guide.

e. Contracted with CELA, Inc. to develop a K-12 language arts guide.

f. Co-sponsored the development of a K-12 arts curriculum guide with the NDCA, North Dakota Division of Independent Study, and several schools.

g. Maintained quality curricula developed on local, state, regional and national levels.

h. Provided technical assistance to schools involved in curriculum development.

i. Communicated with educators, service providers, and interested personnel relative to curriculum.

j. Made available the junior high school North Dakota studies book, North Dakota: A Living Legacy.

k. Distributed state curricular data upon request.

l. Involved North Dakota students/teachers in the state/national Close Up program.

m. Cooperated in the development of How to Cultivate Agriculture in the Classroom.

B. Evaluation

1. Summary

The Department was involved in three major curriculum development projects. The state and regional accreditation processes encourage curriculum development on the local level. The state must provide the leadership to promote quality curriculum development.

2. Trends

Curriculum development on a local level will continue to become more refined. Schools will cooperate in curriculum development activities to a greater degree. Limited financial resources will require various alternatives.

3. Problems

   a. Difficulties

   Financial and time constraints restrict the number of curriculum developemnt projects and the amount of curricular research on a state level.

   The mission of the schools in many cases is not clear. Maximum involvement in the state curricular process has been limited.

   The multitude of educational theories, the varying levels of financial resources on the local level, the variety of student needs and strengths make it difficult to develop curriculum on a state level that is appropriate for all North Dakota schools.

   b. Trends

   There will be a continued demand for curriculum guidance on the state level; however, limited curriculum development projects will be initiated. Schools will coordinate curriculum development activities to a greater degree.

c. Short- and Long-Range Plans

Complete the three curriculum development projects. Initiate curriculum development projects in the law and justice area, elementary science and computer education/literacy. Involve the Curriculum Council in establishing curricular priorities for the 1987-89 biennium. Coordinate curriculum development with other areas.

C. Resources

1. Records of Curriculum Council meetings available.
2. State curriculum data as reported by the schools.
3. A Guide for Curriculum Planning, K-12, 4th ed.
4. Comprehensive School Health Program Guidelines
5. Close Up: The Legislative System

II. School Improvement

A. Function/Responsibility

1. Description

The superintendent in NDCC 15-21-04 is granted a leadership role through the general supervision of schools and in 15-21-04.1 to adopt standards for the accreditation of North Dakota schools. Interpreting both of these statutes broadly, the superintendent may consider various alternatives to encourage educators to provide the best education possible.

2. Objectives

a. To promote quality education.

b. To encourage schools to provide appropriate education to all students.

c. To provide technical assistance to schools.

d. To recognize exemplary practices.

e. To conduct research and seek means of educational improvement.

3. Activities

a. Co-sponsored the State Spelling Bee with the NDNA and NDACS.

b. Co-sponsored the State MATHCOUNTS Program with the NDSPE and NDACS.

c. Coordinated the Y.C.L.

d. Coordinated the NASA Teacher-In-Space program for North Dakota.

e. Conducted the Presidential Awards for the Excellence in Science and Mathematics Program for North Dakota.

f. Coordinated the Close Up Program.

B. Evaluation

1. Summary

With the focus upon quality education, public attention has promoted the utilization of recognition practices for school improvement. Students/teachers being afforded the opportunity to participate are provided with a variety of learning experiences. The programs have been expanding in the past few years.

2. Trends

The programs which value student/teacher participation will continue to receive a high priority in North Dakota.

3. Problems

a. Difficulties

1) Financial and time constraints have restricted the organization and quality of programs.

2) Finding alternatives that help ensure teachers/students the opportunity to participate if they desire.

b. Trends

Programs as identified in the activities will continue in North Dakota.

c. Short- and Long-Range Plans

Continue to support viable programs.

C. Resources

1. Records of meetings retained by this unit.
2. Identification of participants.
3. Y.C.L. Guidelines
4. State Spelling Bee Guidelines
5. State MATHCOUNTS Guidelines

III. NDN State Facilitator Project

A. Function/Responsibility

1. Description

The North Dakota NDN State Facilitator project is designed to disseminate information about nationally validated educational programs and practices and to promote the improvement of education through the implementation of NDN programs. The State Superintendent has the authority under NDCC 15-21-07.2 and NDCC 15-21-07 to administer federal programs which will assist in the quality education of North Dakota children.

2. Objectives

a. To disseminate information about the 400 plus exemplary programs in the National Diffusion Network throughout the state.

b. To assist schools and educational service providers in the identification of needs and the selection of programs to meet the identified needs.

c. To arrange with the developer/demonstrators to provide materials, conduct awareness and training sessions, and to provide follow-up assistance to ensure successful implementation of projects.

d. To assist schools in the training, implementation, and evaluation of NDN programs.

e. To identify exemplary programs in North Dakota and recommend their submission to JDRP.

3. Activities

a. Disseminated NDN information to all schools. Resources sent to schools included the 12th edition of the Educational Programs That Work, lists of programs funded for 1983-85, awareness/training schedules and registration forms.

b. Arranged for 25 NDN program developer/demonstrators to provide training in North Dakota at 39 sites.

c. Recorded over 100 program adoptions during this period.

d. Assisted three North Dakota educators to become certified trainers.

e. Disseminated NDN information to requesting schools. This included brochures, materials and videotapes.

f. Assisted schools in the selection, training, implementation and evaluation of NDN programs.

g. Communicated with developer/demonstrators to promote NDN programs.

h. Maintained NDN records.

B. Evaluation

1. Summary

The NDN State Facilatator Project enables North Dakota school personnel to be knowledgeable about exemplary programs, to select programs that match school needs and to obtain assistance in the implementation of programs. NDN SF records indicate those schools that have officially adopted the program. As a result of training but with no formal adoption agreements recorded or teachers who have gained employment at another school, there are a number of schools in which the program or parts of the program are implemented successfully.

2. Trends

If federal funding is continued at the same level and the program is administered by the superintendent, schools will continue to have ready access to NDN program information. The focus upon school improvement will support continued NDN activity.

3. Problems

a. Difficulties

1) Uncertainty of funding has curtailed long-range planning.

2) A communication process to ensure that the information is distributed to key school personnel has not been developed.

3) Financial constraints at the state and local level have hindered the number of adoptions.

4) Teacher mobility has reduced the longevity of the programs at some sites.

b. Trends

If the NDN SF program is maintained, NDN program adoptions in North Dakota will continue.

c. Short- and Long-Range Plans

1) Computerize all NDN SF records.
2) Seek additional assistance in the promotion of NDN programs.
3) Seek ways to improve the NDN program.
4) Increase the number of NDN programs implemented in the state.
5) Increase the number of NDN adoptions.
6) Increase the number of NDN certified trainers in North Dakota.

C. Resources

1. Records of training/awareness sessions conducted.
2. List of NDN programs adopted.
3. Educational Programs that Work
4. NDN program information
5. NDN program resources for some select programs

IV. Library Media Credentialing

A. Function/Responsibility

1. Description

The State Superintendent is authorized under NDCC 15-21-04.1 to developed standards of excellence which require specific preparation for school librarians to ensure quality library media program development/implementation.

2. Objectives

   a. To promote the library media credential concept.

   b. To review library media credential applications.

   c. To coordinate the library media credential renewal process with the renewal of the teacher's certificate.

   d. To computerize all library media credential records.

3. Activities

   a. Reviewed and approved 103 librarian (ME01); 5 audiovisual specialist (ME02), 47 library media specialist (ME03) and 3 library media director (ME04) credentials. Some librarians requested and were awarded more than one credential level.

   b. Reviewed and approved the renewal of 8 librarian (ME01); 1 audiovisual specialist (ME02), 8 library media specialist (ME03) and 1 library media director (ME04) credentials.

   c. Developed a computerized process for recording and maintaining library media credential data and began entering data into system.

   d. Entered all library media credential forms into information processing.

B. Evaluation

1. Summary

The computerized system has produced a more accurate, efficient system of data control.

2. Trends

School administrators, school board members and librarians recognize that the library media credential identifies criteria important for quality library media administration; therefore more schools are encouraging librarians to pursue library media credentials.

3. Problems

   a. Difficulties

      School librarians find it very difficult to enroll in audiovisual courses, specifically production courses, in North Dakota; therefore, attainment of a library media specialist (ME03) credential remains a challenge.

   b. Trends

      There will continue to be an increase in the number of library media specialist (ME03) credentials awarded.

   c. Short- and Long-Range Plans

      Computerize all library media credential records and forms. Review library media credential requirements.

C. Resources

1. List of holders of library media credentials.
2. Library media credential application and renewal forms.

V. Department Library Media Services

A. Function/Responsibility

1. Description

   The State Superintendent is directed in NDCC 15-21-05 to preserve books, maps, charts, work on education, school reports and school laws of other states and of cities, plans for school buildings and other articles of educational interest and value. In addition, textbook publishers are required to submit current copies of their instructional textbooks to the Department.

2. Objectives

   a. To administer an educational library media collection for the Department staff and North Dakota citizens.

   b. To participate in the state Interlibrary Loan Network.

   c. To provide educational information to Department staff members and North Dakota citizens in response to their requests.

   d. To maintain the North Dakota textbook collection and make these materials available to Department staff members and North Dakota educators.

3. Activities

   a. Incorporated over 400 resources and 24 textbook series into the collection.

   b. Circulated over 500 items to people outside the Department.

   c. Routed over 35 periodicals, 14 newsletters and 100 items to Department staff per month.

   d. Ordered over 75 items for Department staff members.

   e. Filled over 35 Interlibrary Loan requests.

   f. Assisted over 750 educators to locate/identify resources to meet their needs.

B. Evaluation

1. Summary

The library continues to provide basic library media educational services to the Department staff, state agency personnel, educators and other interested people.

2. Trends

The library will continue to provide basic library media services.

3. Problems

   a. Difficulties

      1) The library has been reorganized with a significant loss in space. Financial constraints limit the purchase of new materials necessary to maintain a current, up-to-date collection.

      2) Professional and secretarial time constraints curtail the utilization of resources, organization of resources and the development of a quality program.

      3) Reduction of printing by the federal government has reduced significantly the availability of educational documents.

   b. Trends

      Library media services will be maintained at a minimal level.

   c. Short- and Long-Range Plans

      1) Computerize all library media records.

      2) Continue library media program at least at current level.

      3) Inform Department staff of availability of resources.

C. Resources

1. Over 600 educational books.
2. Three years of current and back issues of over 35 educational periodicals.
3. Over 200 educational reports on microfische.
4. CIJE and RIE for educational research purposes.
5. Current textbooks for grades K-12 from bonded textbook publishers.

COUNSELING, GUIDANCE AND CHEMICAL HEALTH

I. Professional Guidance Credential Approval

A. Function/Responsibility

1. Description

Professional Guidance Credentials are issued to applicants who meet the stated criteria.

2. Objectives

a. To ensure that personnel performing guidance functions are qualified according to established criteria.

b. To provide a system for review of initial performance through issuance of a temporary credential.

c. To provide a system for professional renewal through requiring coursework for the five-year renewal of credentials.

3. Activities

a. Application forms are provided to applicants and are reviewed upon application being made for the credential.

b. Transcripts of graduate coursework are reviewed to compare with required coursework for issuance of credentials.

c. Credentials are issued and records kept of type of credential (secondary, elementary, K-12), expiration date and number by name of counselor.

d. Counselors are apprised of status for renewal prior to expiration date.

B. Evaluation

1. Summary

Seventy-two applications and transcripts were reviewed and Professional Guidance Credentials were issued to sixty-six applicants for the credential.

2. Trends

Fewer school counselors are being trained in North Dakota with the result that our elementary and secondary schools are having to recruit applicants who are trained at out-of-state institutions.

3. Problems

Criteria such as requiring a teaching credential for counselors but not for social workers is questioned. Also, salaries for social workers can be potentially reimbursed through Special Education while similar reimbursement for counselors is not allowed.

II. Approve Guidance Designate Status

A. Function/Responsibility

1. Description

A guidance designate status was originated for schools that did not have professionally trained guidance counselors, thereby providing the Department of Public Instruction with a contact person in all local schools.

2. Objectives

a. To maintain a program which seeks to upgrade guidance services criteria through completion of core courses in counseling and guidance.

b To maintain contacts in each local school for Counseling and Guidance Programs.

3. Activities

a. To review transcripts and make decisions on whether applicants have fulfilled criteria for inclusion in the Guidance Directory.

b. Coordinate the matching of prospective designates with appropriate inservice activities or recommended coursework.

B. Evaluation

1. Summary

Fifty-eight applicants for guidance designate status were reviewed with 38 disapproved and 21 approved.

2. Trends

Many guidance designates have not updated their training by taking core courses in counseling and guidance.

3. Problems

By maintaining the teacher certificate through taking a variety of extension workshops for credit, many guidance designates are defeating the purpose of the program by failure to work toward a degree in counseling and guidance.

III. Technical Assistance to School Counselors

A. Function/Responsibility

1. Description

This division acts as a resource to counselors in the schools by giving assistance for upgrading of Counseling and Guidance Programs in the schools.

2. Objectives

a. To improve the delivery of guidance programs in schools.

b. To provide opportunities for professional growth of counselors.

c. To provide a directory of guidance personnel in the state.

d. To create awareness of successful replicable programs which may have utility to Counseling and Guidance Programs.

3. Activities

   a. On-site visitation in order to assess adequacy of Counseling and Guidance Programs including adequacy of personnel, facilities, materials and operational budgets.

   b. Design a needs assessment device and determine appropriate kinds of inservice that are needed.

   c. Compile and maintain files and records on guidance personnel in the state.

   d. Disseminate information which may be useful to guidance personnel.

B. Evaluation

1. Summary

There has been a decline in school visitation and coordination of needed inservice sessions for counselors in the last three years due to consolidation of duties within the Department. With the current refocusing of needed personnel programs, more attention is being given to these areas.

2. Trends

Counselors state a need to be informed on areas such as: 1) Computerized guidance programs; 2) Child abuse and neglect; 3) Suicide prevention; and, 4) Alcohol and substance abuse programs.

3. Problems

Delivery of needed inservice programs stated in the trends section are difficult because of lack of funds for that purpose.

IV. Coordinate Statewide Testing

A. Function/Responsibility

1. Description

Statewide achievement and academic ability tests are coordinated by this division as a service to school districts. Interagency cooperation with Job Service North Dakota is maintained for the General Aptitude Test Battery in order to provide schools the opportunity to use this instrument for planning educational and vocational course selections.

2. Objectives

   a. To collect statewide data enabling statewide averages on achievement subtests to be shared with districts for local comparisons.

   b. To enable schools to use different tests and thereby compare aspects of discrepancy between achievement and ability on aptitude tests.

   c. To increase the technical understanding of test scores, their interpretation and application to academic remediation or course selection.

3. Activities

   a. Coordinate statewide test registration with local school districts and major test publishers.

   b. Compile state averages from all subtests of four major Achievement Tests, to maintain scores so year by year comparisons can be made and to interpret results either through writing articles or through presenting results in oral form.

c. Survey schools to find need for General Aptitude Test Battery Training and coordinate the training with the Job Service personnel.

B. Evaluation

1. Summary

In the fall of 1984, over 45 percent of all North Dakota students were tested during the Statewide Fall Testing Program. Over 60 percent were tested in grades 3, 5, 7, 9, and 11. The total tested was 53,656 out of 118,231 enrolled. Typically, the division responds to over 100 phone calls during the time of fall testing to aid with problems associated with testing.

2. Trends

Aachievement scores for grades 3 to 11 have increased in the last five years. Critics of testing have maintained there is a discrepancy between what is taught and what is tested. Most schools now own their test booklets rather than rent them.

3. Problems

a. Test publishers have had some problem either filling orders correctly or in having administrative and technical manuals ready at the time new test booklets are marketed.

b. There is a lack of understanding about the use and meaning of test scores.

V. Collect Dropout Data

A. Function/Responsibility

1. Description

Information is collected from schools on a dropout form concerning the identification, age, residence and reason for dropping out from school.

2. Objectives

   a. To facilitate the collection of accurate and timely data on school dropouts.

   b. To disseminate information on dropout statistics to local schools and other interested agencies.

3. Activities

   a. Coordinate the collection of data from schools through distribution of an appropriate form and request for information.

   b. Organize data into categories for analysis by age, sex, region, and reason for dropping out.

   c. Disseminate through written or oral communication, the data on school dropouts.

B. Evaluation

1. Summary

Data was collected on 457 dropouts in grades 9-12 but, the fall report form listed 806 dropouts, so only 57 percent were reported to this division.

2. Trends

A smaller percentage of dropouts has been reported to this division in the last five years.

3. Problems

   a. Timely reporting of dropouts and reentering students.

   b. More accurate data should be available so that a statewide compilation of data could be better analyzed.

VI. Direct and Coordinate Chemical Health Programs

A. Function/Responsibility

1. Description

   Working with the North Dakota Department of Health, Highway, and Human Services, the Department of Public Instruction administers a program of alcohol and substance abuse prevention which involves interagency mini-grants to schools or agencies for the purpose of fostering a community approach to chemical health.

2. Objectives

   a. To create awareness of the program to schools and communities.

   b. To develop an understanding of the importance of school policies and communitywide programs to potential applicants.

   c. To create awareness of current research and practices in the area of project development.

   d. To develop procedures to aid in needs assessment, related activities, and evaluation of efforts made in addressing the problem.

   e. To study available curriuclum and act as a resource for schools in search of advice in selecting curriculum.

3. Activities

   a. Disseminate information about the program guidelines and procedures to school districts or other agencies.

   b. Conduct informative workshops to help local committees develop a project proposal.

   c. Provide technical assistance in project design.

   d. Monitor projects, collect data and write an evaluation report based upon each cycle of project operation.

B. Evaluation

1. Summary

Information was mailed to all public and nonpublic administrators in the state. Two workshops were held to disseminate more information and to aid in completing a proposal for project funds. One hundred ninety-seven people representing 63 applicants or committees attended the intial training workshops.

2. Trends

There is increasing interest in addressing the problem of alcohol/substance abuse prevention in communities as communities appear to be supporting the schools in this initial effort.

3. Problems

With the hope of a three-year cycle with renewal of funded projects, the amount of money available ($105,000 per year) may be insufficient to both maintain projects for renewal and fund new projects for initial operation.

C. Resources

1. Chemical Health Interagency Committee Minutes
2. Chemical Health Workshop participants
3. Governor's Committee on Education and Employment Minutes
4. State Achievement Test Score Averages
5. SAT and ACT Statewide Average Scores
6. Annual Dropout Data
7. North Dakota Guidance Director
8. North Dakota School Counselor Approval Standards
9. Student Rights and Responsibilities Booklet
10. Guidance Needs Assessment Booklet

INFORMATION AND RESEARCH

I. Forms Approval

A. Function/Responsibility

1. Description

Coordinate the production of forms for data collection by Department of Public Instruction staff.

2. Objective

a. To ensure that data collection forms meet Department of Public Instruction requirements.

b. To ensure that data collection forms meet State Forms Management requirements.

3. Activities

a. Restrict the collection of duplicate data items and require that other files containing needed information be accessed.

b. Coordinate the developemnt of forms with the State Forms Management office.

c. Assist in the identification of the data elements and design of forms.

d. Advise schools on forms which need to be completed. (Data Forms Calendar).

B. Evaluation

1. Summary

A more professional design of the forms will result in a more pleasing appearance and an improved completion rate, which will also have better control of data being collected.

2. Trends

A more formal procedure should lead to the elimination of the collection of duplicate data and place a greater reliance on existing data.

3. Problems

The additional step in securing a state form number results in a delay in making the forms available for printing. Authority is needed to eliminate unapproved data collection activities by staff members.

II. Provide Technical Support to Department of Public Instruction Staff

A. Function/Responsibility

1. Description

Provide technical assistance to the Department of Public Instruction staff in the utilization of data processing.

2. Objective

a. Teach the staff to use data to comply with state statutes, approval, certification, and foundation aid.

b. Train staff in the use of microcomputers in the areas of hardware and software.

c. Provide data/reports needed by staff in performing their duties.

3. Activities

a. Provide technical assistance in the development and use of programs on microcomputers (spreadsheets, data base, word processing, graphics, and telecommunications).

b. Do the necessary programming to obtain computer reports.

c. Provide technical assistance to staff with the operations of main frame systems.

B. Evaluation

1. Summary

Numerous reports are provided on a regular and as needed basis. Reports for special requests are completed using software language such as SAS, DYL280, Tellegraph, and Mapper. Department of Public Instruction staff are beginning to set up data bases, spreadsheets, etc.

2. Trends

Greater demands are being noticed for the use of regular and specialized reports. More of the staff will be utilizing data processing technology.

3. Problems

Provide the necessary staff to respond to the increased use of data processing.

III. Data Collection Processing/Verification

A. Function/Responsibility

1. Description

Collect, process, and verify data required by statute.

2. Objective

a. Prepare data collection documents and instructions.

b. Collect the data required by statute.

c. Process the data.

d. Verify the data for accuracy and completeness.

e. Test systems to assure quality control.

3. Activities

a. Meet with appropriate staff to determine needs and prepare instruction manuals for the collection of enrollment, personnel, financial and other data from school districts.

b. Review and update data collection forms.

c. Review, revise, or design computer systems for establishing or updating computer files, and processing the data for utilization by staff members.

d. Establish procedures and controls for logging in, visual editing, and processing of data collection forms.

e. Communicate with school system personnel concerning clarification and/or problem areas.

f. Review validation reports and enter corrections.

g. Review and update computer programs used to process the data.

h. Prepare the data in a form so that it can be utilized to determine statutory compliance, and for statistical purposes.

B. Evaluation

1. Summary

Data is annually collected from all approved elementary and secondary educational institutions. Legislation was passed in 1985 which provides for the withholding of foundation payments from public school districts if data is not received in a timely manner.

2. Trends

Strive to collect data elements only once and improve collection procedures through the implementation of technological advances.

3. Problems

Incomplete data and failure to follow instructions are the two most critical problems affecting the quality of data collected. Another problem is the inability to identify and collect data from nonapproved institutions which provide instructional services to school age children.

IV. Coordinate Department of Public Instruction Activities with Central Data Processing

A. Function/Responsibility

1. Description

Coordinate data processing activities with Central Data Processing as provided by statute.

2. Objective

Consult with Central Data Processing in the design, implementation and maintenance of computer systems.

3. Activities

a. Maintain a liaison relationship with Central Data Processing.
b. Develop the criteria needed for systems design, programming and reporting.
c. Verify test data from new or revised programs.
d. Provide for the ongoing operation of the systems.
e. Establish control procedures and monitor use of the systems.

B. Evaluation

1. Summary

The Department currently has ten major systems at Central Data Processing which can be interfaced with one another to enhance reporting activities. For example, in one instance, eleven different data files were interfaced to create a single report.

2. Trends

Work with Central Data Processing to develop more efficient methods of data entry. Provide more direct links to data maintained on the control computer.

3. Problems

Keeping up with new technology.

V. Data Analysis and Reporting

A. Function/Responsibility

1. Description

Analyze the data collected and prepare the necessary reports as required or requested.

2. Objectives

   a. Compile and prepare a number of standard and special interest reports for dissemination, including those for the federal government.

   b. Provide a reference source on education related data.

3. Activities

   a. Define and develop computer programs necessary to extract information from computer files for reporting purposes.

   b. Aggregate and format data for publications.

   c. Prepare reports as required by statute for department use as well as consumption by the general public.

   d. Compile data to respond to special requests from legislators, reporters, and the public.

   e. Provide data to the federal government, National Education Association and other national agencies as requested.

   f. Provide data for calculation of foundation aid, program approval and other administrative purposes.

B. Evaluation

1. Summary

Several reports are generated daily in response to standing and special requests. The following publications were prepared and distributed annually: Educational Directory, School Finance

Facts, and Administrative and Instructional Personnel. In addition, a variety of special interest single purpose reports are prepared and distributed such as the North Dakota Educational Facts and the School District Data publications.

2. Trends

There appears to be a need for additional publications and analysis.

3. Problems

Additional staffing is needed so that additional and more thorough analysis can be performed.

VI. Provide Technical Assistance to Education Personnel

A. Function/Responsibility

1. Description

Provide technical services to school staffs in the utilization of computer technology for administrative and instructional purposes.

2. Objectives

a. Provide assistance in use of computer technology for instructional purposes.

b. To provide assistance in use of computer technology for administrative purposes.

3. Activities

a. Respond to questions concerning the use of microcomputers.

b. Prepare recommendations for software and hardware to fit educational needs.

c. Identify software which meets educational needs.

d. Conduct training seminars and workshops for school personnel.

e. Coordinate the cooperative purchase of microcomputers and peripheral devices for school systems.

f. Set up a bulletin board system to familiarize school personnel with use of telecommunications.

B. Evaluation

1. Summary

Several workshops were conducted on the utilization of technology in schools. There has become an increased awareness of technology applications in schools. Numerous surveys were conducted to assess the extent of the use and type of technology available in schools.

2. Trends

As technology becomes less expensive and more user friendly, we are seeing greater implementation of technology in schools.

3. Problems

a. There is a reluctance on the part of school personnel to accept technology.

b. If the state is going to provide effective leadership in the implementation of technology, a full-time person should be employed to provide direction in this area.

c. Efforts should be expended to assure the compatability of equipment and software to facilitate communications and use.

VII. Provide General Information Services

A. Function/Responsibility

1. Description

Respond to numerous requests for information that is not contained in regular reports.

2. Objectives

Provide research analysis and reports to legislators and the general public.

3. Activities

   a. Do specialized reports in response to questions.
   b. Respond directly to numerous telephone requests by reporters, legislators, and others.
   c. Prepare simulations for "what if" questions posed by legislators and others.
   d. Make presentations to the general public and testify at legislative hearings.

B. Evaluation

1. Summary

An increasing number of reports are compiled in response to requests by legislators and the general public which include analysis of the data.

2. Trends

The demand for this type of service is expected to increase.

3. Problems

Due to the increasing number of requests it is becoming increasingly more difficult to respond to requests in a timely manner without additional staffing.

VIII. Technological Applications

A. Function/Responsibility

1. Description

Provide direction in the use of communication technology for instruction and data handling.

2. Objectives

   a. Learn about the use of telecommunication.

   b. Serve as a resource to schools searching for ways to enhance instructional delivery systems.

3. Activities

   a. Identify and/or prepare articles describing the use of technology for instruction.

   b. Meet with interested groups to facilitate movement in the application of technology.

B. Evaluation

1. Summary

This area of responsibility was added in March 1985. Thus we have been attempting to learn as much as we can about the use of interactive radio, television, teleconferencing, and satellites.

2. Trends

The use of telecommunications to expand educating oppurtunities for students in rural North Dakota schools definitely has great potential.

3. Problems

   a. Staffing to direct and facilitate activities in this area is needed if we are to be successful.

   b. The identification of and availability of resources will be a problem in our depressed economy.

CHAPTER 1 COMPENSATORY EDUCATION

I. Staff Development

A. Function/Responsibility

1. Description

To assure that all schools/districts receiving Chapter 1 funding are providing adequate and effective staff developments.

2. Objectives

   a. To identify those school districts receiving Chapter 1 funds.
   b. To review staff development activities for effectiveness.
   c. To provide effective inservice for Chapter 1 teachers in order that they will meet accreditation standards.
   d. To provide effective inservice pertaining to reading teachers and to professional development for Chapter 1 teacher aides.

3. Activities

   a. Review the list of districts and their respective levels of funding for Chapter 1.
   b. Identify administrators and teachers being paid by Chapter 1.
   c. Note districts which are providing inservice/staff development specifically for Chapter 1 administrators and teachers.
   d. Assess inservice content.
   e. Provide additional inservice for those administrators and teachers.
   f. Provide inservice for those administrators, teachers, and aides who receive little inservice/staff development from their districts.
   g. Evaluate effectiveness of the activities.

B. Evaluation

1. Summary

   a. The Chapter 1 Summer Institute was initiated during 1984 and continued in 1985.

   b. Eight regional spring workshops were held in 1985.

   c. Inservice has been provided to county superintendents as they have assumed a greater role in monitoring districts.

2. Trends

   a. The Summer Institute will be continued.

   b. The regional workshops may be expanded to two-day workshops in each region, based upon the recommendation of the federal program review panel.

   c. More inservice will be provided to staffs in local districts to address specific identified needs of reading teachers/ Chapter 1 teachers and aides.

3. Problems

   a. Difficulties

      Time constraints appear to be one problem. Finding consultants/specialists to provide the inservice is another problem.

   b. Work Remaining

      Since very little inservice has been done in the past several years, there is a great need to provide this service.

   c. Short- and Long-Range Plans

      Short-range plans include planning and holding the spring regional workshops and the Summer Institute during the spring and summer of 1986. Long-range plans include the continuation of the workshops and the Institute each year, as well as additional inservice/staff development for Chapter 1 administrators, teachers, county superintendents, and teacher aides.

II. Technical Assistance

A. Function/Responsibility

1. Description

Provide technical assistance to school districts as outlined in federal guidelines for Chapter 1.

2. Objectives

a. To assist school districts with the identification of educationally deprived students.

b. To assist school districts with the identification of migratory students.

c. To assist administrators in developing Chapter 1 applications.

d. To provide technical assistance to school districts as they work to meet the state and federal guidelines for Chapter 1.

e. To provide technical assistance to county superintendents as they monitor school districts.

3. Activities

a. Hold workshops during which assessment, evaluation, student identification, state and federal guidelines are explained at length.

b. Answer telephone inquiries regarding Chapter 1.

c. Provide on-site assistance to both county superintendents and administrators as they complete forms, review programs, and evaluate the effectiveness of Chapter 1 projects.

B. Evaluation

1. Summary

   a. More technical assistance has been provided during the past year to county superintendents and administrators; both groups have requested continued assistance and also additional assistance in specific areas listed in 3a.

2. Trends

   a. This function will increase, since the federal government is suggesting more specific written guidelines be given. The administrators and county superintendents will need assistance in interpreting and in implementing the changes.

3. Problems

   a. Difficulties

      Decreased travel as requested/mandated on the state level may curb travel plans for state Chapter 1 staff. Increased numbers of questions will necessitate additional travel and assistance.

   b. Work Remaining

      Since this is a continuous process, the work must be done each year.

   c. Short- and Long-Range Plans

      Short-range plans include continued assistance as requested. Long-range plans include revising and updating the Chapter 1 state guidelines and providing technical assistance to those requesting it.

III. Initiative to Improve the Quality of Chapter 1

A. Function/Responsibility

1. Description

To share with each Chapter 1 project the secretary's initiative and to assist the LEA in completing the process.

2. Objectives

- a. To identify currently operating Chapter 1 projects that are usually successful in meeting the educational needs of identified students.
- b. To synthesize and disseminate information about these projects; and,
- c. To provide technical assistance to improve the quality of Chapter 1 projects.

3. Activities

- a. Notices are sent to all districts regarding the project.
- b. Applications will be submitted to the Department of Public Instruction by December 30, 1985.
- c. The Department of Public Instruction will submit nominations to the United States Department of Education by January 15, 1986.
- d. Notification of awards, March 15, 1986.

B. Evaluation

1. Summary

Four of the nine submitted last year to the secretary were awarded and recognized nationally as having exemplary Chapter 1 projects.

2. Trends

The four exemplary projects shared their success at the Chapter 1 Summer Institute. This activity will encourage others to apply this year.

3. Problems

   a. Providing appropriate training in the time frame.

   b. Long-Range Plans

      Chapter 1 will be involved each year as long as the secretary offers the initiative.

IV. Leadership

A. Function/Responsibility

1. Description

Provide leadership to school districts in the areas of reading and language arts.

2. Objectives

   a. To provide materials and strategies to administrators, county superintendents, teachers and teacher aides on the use of the newspaper in the classrooms.

   b. To provide materials and strategies to administrators, teachers, and aides regarding statewide reading month held each April.

   c. To provide materials and strategies on parent involvement in Chapter 1 and in reading.

3. Activities

   a. Work with the North Dakota Newspaper Association, the IRA, and the North Dakota Reading Association to plan, prepare, and distribute information on newspapers in the classroom.

b. Work with the IRA and the North Dakota Reading Association to plan, prepare, and distribute information regarding statewide reading month.

c. Encourage administrators and teachers to participate in activities to promote reading in their respective schools and classrooms.

d. Serve as a liaison between the Department of Public Instruction and the IRA/NDRA on matters pertaining to reading/language arts.

B. Evaluation

1. Summary

This activity has moved from elementary education into Chapter 1. Increasing numbers of people are becoming involved in Newspaper in Education Week and in Reading Month activities.

2. Trends

It is anticipated that these activities will continue to expand.

3. Problems

a. Difficulties

No significant problems noted.

b. Work Remaining

Since this is an ongoing function, the work must be completed each year.

c. Short- and Long-Range Plans

Short-range plans call for materials to be distributed during the spring of 1986. Long-range plans include expanding the program to include more junior high and high school teachers and administrators.

V. Reading Credential

A. Function/Responsibility

1. Description

Issue reading credentials to qualified applicants, as outlined in "The Accreditation Standards for Elementary, Junior High and High Schools."

2. Objectives

a. To assure that all Chapter 1/basic skills teachers meet the qualifications for the elementary or secondary reading credential.

b. To issue the reading credential to applicants who qualify for the consultant/supervisor credential.

c. To communicate with state colleges and universities regarding teacher preparation, certification, and credentialing.

3. Activities

a. Review applications, transcripts, and letters for coursework applicable toward the reading credential requirements.

b. Issue reading credentials to qualified persons.

c. Write letters to applicants citing deficiencies.

d. Issue letters each fall to teachers who are teaching in Chapter 1, but are not qualified.

e. Issue letters each fall to people whose reading credentials will expire the following September.

B. Evaluation

1. Summary

More stringent accreditation requirements have resulted in more people seeking the reading credential. There has been increased cooperation and coordination between the elementary education and Chapter 1 offices, resulting in better communication regarding Chapter 1 teachers.

Approximately 600 transcripts have been reviewed; 124 reading credentials were issued; 185 reading credentials were renewed; 132 people met the coursework requriements.

The reading credential responsibility has been moved from the elementary education office to the Chapter 1 office.

2. Trends

It is anticipated that the requirements will be maintained at the current levels. As the requirements are updated, they will be revised to include additional relevant courses.

3. Problems

   a. Some teachers and administrators have been reluctant to recognize the value of having qualified teachers in the basic skills/reading programs.
   b. Approximately 270 reading credential applications are pending. These people have not completed the coursework requirements. There is periodic revision of the reading credential requirements and the accreditation standards. Communication with colleges and universities is ongoing.
   c. Short-Range Plans: Revise reading credential requirements during 1985-86. Long-Range plans: All teachers in basic skills programs should have the reading credentials commensurate with their levels of certification and preparation.

All colleges and universities will be encouraged to offer reading courses that will meet the requirements as set by the Chapter 1 and elementary education units.

C. Resources

1. Records of all Department meetings are retained. Records of unit meetings are retained for a limited period of time.
2. Evaluation data
3. Chapter 1 personnel data
4. The North Dakota Chapter 1 ECIA Evaluation Report, Fiscal Year 1984
5. Materials developed for Newspaper in Education Week and Statewide Reading Month
6. State Chapter 1 Guidelines

VI. Staff Development

A. Function/Responsibility

1. Description

   To assure that all servable concentrations of migrant children receive adequate services within the constraints of federal funding.

2. Objectives

   a. To identify areas that have servable concentrations and contact the best suited school system to consider the application process.

   b. To work with the LEA administration and board of education to select a program director and staff.

3. Activities

   a. Advise, recommend and evaluate LEA inservice. Set minimum requirements.

b. Plan, select and conduct state level inservice on a timely basis.

c. Conduct state meetings with LEA directors as required.

d. Determine through monitoring, final reports, and Department of Education program visitations, overall program effectiveness.

B. Evaluation

1. Summary

a. The Chapter 1 Migrant Education office conducts annual program evaluations.

b. The Chapter 1 state office provides inservice for selected staff on an as required basis.

c. The state encourages districts to allow LEA staff to attend meetings that are beneficial to professional and program improvement.

2. Trends

a. The annual Spring Training Conference will be continued.

b. The expansion of staff attending the Spring Conference may be expanded.

c. Additional help is always available from the state upon request by the LEA.

3. Problems

a. Inadequate funding may soon be a problem.

b. Efforts are continually under way to seek new sources and make maximum use of those that presently are available.

C. Resources

1. Records of meetings with LEA directors.

2. Evaluation data

3. Other Chapter 1 statistical data.
4. An annual Chapter 1 evaluation report.
5. Articles for publication in various media publications.
6. Chapter 1 migrant education guidelines.

FINANCE AND REORGANIZATION

I. Foundation Aid Distribution

A. Function/Responsibility

1. Description

Distribution of foundation aid to school districts as approved by the legislature.

2. Objective

a. To insure that school districts receive the proper payments based on the statutes and appropriation.

3. Activities

a. To review and develop data collection forms for collecting average daily membership and fall enrollments used for determining entitlements.

b. To respond and work with the ligislature on education legislation.

c. Presentations to legislature, school boards, school administrators and general public regarding educational finance.

B. Evaluation

1. Summary

Increase requests from public and legislature for inservice and information on educational funding and costs of education and audits of foundation aid payments.

2. Trends

Demands will increase because of declining enrollments and weak economy.

3. Problems

Keeping up with new technology and getting school district financial reports computerized.

II. School District Financial Reporting and Budgeting

A. Function/Responsibility

1. Description

   Collect financial data from all school districts, multidistrict special education units and multidistrict vocational education centers annually.

2. Objective

   a. Improve reporting forms

   b. Uniform reporting

3. Activities

   a. Develop financial report forms.

   b. Develop budget forms.

   c. Develop tax levy forms.

   d. Compile financial data for the legislature.

   e. Provide technical assistance to school districts.

   f. Provide inservice training for school districts.

B. Evaluation

1. Summary

   Uniform accounting system is in place and inservice is a continuing process.

2. Trends

   There appears to be a continuing need for inservice because of personnel changes in school districts.

3. Problems

   Having the time and the funding to provide adequate inservice training.

III. Reorganization

A. Function/Responsibility

1. Description

To assist local school districts in the area of annexation, dissolution and reorganization.

2. Objective

a. To assist local school districts in the areas of annexation, dissolution and reorganization as provided for in statute.

b. To work with State Board of Public School Education in processing petitions and plans on holding hearings on requests.

3. Activities

a. Provide assistance to county superintendents.

b. Provide assistance to county reorganization committees.

c. Arrange for all hearings for State Board of Public School Education.

d. Work with the legislature in legislative changes.

B. Evaluation

1. Summary

To assure that all requests for changes in school district boundaries are given consideration as provided for in state statute.

2. Trends

There appears to be more requests to change school district boundaries as enrollments decline in many rural schools.

3. Problems

Shortage of staff to work with legal challenges of State Board decisions.

IV. School Construction

A. Function/Responsibility

1. Description

To review all school construction plans to meet statutory codes.

2. Objective

To work with school boards and architects in developing construction plans. Review for code requriements.

3. Activities

a. To review and approve school construction plans submitted to the Superintendent of Public Instruction.

b. Handle state school construction fund applications, loan payments, and approvals by the State Board.

B. Evaluation

1. Summary

Prepare annual financial report for State Board of Public School Education and work with State Treasurer in getting the highest interest rate possible from investments.

2. Trends

Bond issues are hard to pass and the demand for loans is low.

3. Problems

A very limited amount of money available for loans.

SPECIAL EDUCATION

I. Prescribe Regulative Guidelines, and Procedures on the Education of the Handicapped

A. Function/Responsibility

1. Description

   To prescribe regulations, guidelines, and procedures under which school districts and state operated/supported programs must identify and evaluate handicapped children, ages 0-21, and provide appropriate instruction and related services to handicapped children ages 3-21.

2. Objectives

   a. To distribute current regulations, guidelines, and procedures to school district personnel and personnel in state operated/supported programs.

   b. To provide technical assistance to school personnel as needed in the interpretation and implementation of procedures to all handicapped children.

   c. To wirte and revise curriculum guidelines in each of the areas of exceptionality to reflect current programming trends in the field.

3. Activities

   a. Presented and distributed Guide I at Fall Administrator's Conference.

   b. Conducted new director inservice at which time guidelines were disseminated.

   c. Conducted workshop in the application of the ecological approach to a classroom setting in planning a total program for students with behavior and achievement problems.

d. Conducted study institutes regarding a revised Guide XI--Identification and Assessment of Students With Specific Learning Disabilities for program coordinators and teachers of students with specific learning disabilities.

e. Conducted workshop to teach and practice the informal process in which two sides involved in a special education dispute are given an opportunity through an impartial third party called a mediator, to resolve their differences and find a solution satisfactory to all sides.

f. Conducted two seminars on P.L. 94-142 regulations in the identification and placement of handicapped children and an update of case law related to these issues.

g. Developed curriculum guides in areas of preschool and specific learning disabilities and a parents guide to special education.

B. Evaluation

1. Summary

a. To evaluate the effectiveness of local programs through site visitations and program monitoring each school year.

b. To determine through annual reporting and monitoring, if students are receiving the required education and related services.

c. To determine whether local needs assessment and other input form local personnel are addressed through inservice training.

2. Trends

Pointed out an ongoing need to update personnel in the regulations of P.L. 94-142 as interpreted by the courts.

3. Problems

   Time and state personnel constraints in carrying out activities in all areas of technical assistance and writing curriculum guidelines.

II. Assist School Districts in the Inauguration, Administration, and Development of Special Education Programs

A. Function/Responsibility

1. Description

   To assist school districts in the inauguration, administration, and development of special education programs.

2. Objectives

   a. To provide technical assistance to school personnel in initiating new programs.
   b. To develop service delivery alternatives for handicapped students.
   c. To plan appropriate programs to meet the needs of preschool handicapped students, emotionally disturbed students, secondary SLD students, and trainable and profoundly retarded children with physical and other accompanying handicaps.
   d. To plan a strategy for sharing the programming responsibilities with regular education for students who have learning problems but do not qualify for special education.
   e. To develop effective parental involvement in the special education process.

3. Activities

   a. Conducted a needs assessment containing both written and interview components of the infant development and preschool handicapped programs.

b. Provided technical assistance to established preschool programs and to parent groups, agencies, and school personnel in areas of the state who were in the planning/development stages of providing services.

c. Provided for the development and distribution of program planning guides for the preschool handicapped and infant development programs.

d. Conducted workshops on using assessment information to plan educational experiences for young handicapped children.

e. Conducted two inservice sessions for teachers of emotionally disturbed students which focused on three major topics: 1) broad issues in the field, 2) a procedure to analyze the unique needs of each emotionally disturbed student, and 3) an update on attempts to serve this population of students.

f. Conducted a workshop on microcomputers and their use with emotionally disturbed students. Participants had to combine their present skills in analyzing the unique needs of students with knowledge and skills in the use of computer assisted instruction and apply these skills to the process of curriculum design for emotionally disturbed students.

g. Conducted a workshop in the interdisciplinary team diagnosis of deaf/blind children to demonstrate the needs for and benefits of team planning in meeting the unique needs of deaf/blind-severely multihandicapped children.

h. Conducted a workshop in specific learning disabilities which focused on local program planning and decision making regarding SLD services. Guidelines and requirements were reviewed and discussed.

i. Conducted two workshops for school administrators on the role of regular education and special education in working with students who have learning problems but do not qualify for a categorical program.

B. Evaluation

1. Summary

a. To evaluate the appropriateness of local programs through site visitations and program monitoring each school year.

b. To determine through the annual program application and monitoring, if students are receiving the required education and related services.

c. To determine whether local needs assessment and other input from local personnel are addressed through inservice training.

2. Trends

In the area of least restrictive environment (LRE) little or no indication that instructional alternative settings had been considered prior to placement of handicapped children.

The fall continuum of educational programming is not available in all areas of the state for handicapped children.

3. Problems

Local program personnel and program dollars are not available.

III. Compliance Monitoring

A. Function/Responsibility

1. Description

To monitor the compliance of local programs with federal and state laws regarding procedures to identify, evaluate, and place handicapped children in public schools and state operated/supported programs.

2. Objectives

   a. To review and approve the annual program plan application from each multidistrict special education unit and state operated/supported program as required by P.L. 94-142 and P.L. 89-313. This plan must demonstrate compliance to federal and state statutes for the education of handicapped children.

   b. To conduct compliance monitoring of 15 multidistrict and state operated/supported programs each school year.

   c. To design and receive annual performance and financial data from LEAs.

   d. To summarize areas of concern in compliance monitoring reports to determine statewide compliance and major programming issues.

3. Activities

   a. To collect and analyze data received from LEAs in the areas of full time equivalent special education staff and related services personnel; handicapped served, evaluated for the first time or dismissed during the year; LRE placement; severity of the handicap; special education and related services provided to each student; and dollars expended for special education--state, federal, and local funds.

   b. Conduct monitoring of each local or multidistrict unit at least every three years to not only determine the degree of compliance with state and federal regulations in special education, but also to assist in program improvement. The monitoring process includes the evaluation of: 1) the effectiveness of procedures undertaken to identify, locate, and evaluate handicapped children; 2) implementation of IEPs; and 3) compliance of procedures for placing handicapped children in private schools, and placement of handicapped children to assure the requirements of least restictive environment are met.

c. To annually review and approve program applications before releasing state and federal funds.

d. At the close of each year, the areas of concern listed in the monitoring reports are summarized. The information is representative of the entire state's needs and is extremely valuable in describing the statewide status of P.L. 94-142 compliance and major programming issues.

B. Evaluation

1. Summary

a. All administrative units demonstrate compliance with P.L. 94-142 and state law by approval of the annual application.

b. A follow-up of recommendations in the program monitoring reports for each multidistrict, single district, or state operated/supported program is conducted by SEA staff to assure movement toward total compliance.

2. Trends

Summaries of monitoring reports indicate the least restrictive environment (LRE) to be a primary compliance issue. There is little evidence that program alternative settings have been considered in the IEP placement decisions.

3. Problems

   a. Availability of a broad continuum of services across the state make the LRE issue a difficult one to solve.

   b. There is a great need for trained personnel to work in rural areas.

   c. Some relief of the local tax burden for special education is necessary for the state to proceed to full programming.

   d. The state special education office must have more personnel to assist in the area of compliance monitoring and monitoring follow-up in the form of technical assistance to special education units for the monitoring system to be effective in the area of program improvement.

IV. Development and Use of Federal Funds

A. Function/Responsibility

1. Description

To apply for, receive, administer, and coordinate the use of federal funds to develop and improve services for handicapped children.

2. Objectives

   a. To assist multidistrict special education units, single district, and state operated/supported programs in submitting application for P.L. 94-142, P.L. 89-313, and other federal funds designed for the handicapped.

   b. To meet the submission requirements--annual program plan--in order to receive funds under Part B of the Education of the Handicapped Act (P.L. 94-142) for any fiscal year.

c. To assess and prioritize state programming needs for the potential submission of a federal grant to the United States Department of Education to assist the state in planning, development, or the provision of a direct service in a priority need area.

3. Activities

a. Annually conducted workshops for spceial education units and state operated/supported program personnel on the LEA application for federal funds.

b. Gathered statewide input to assess program needs in order to establish priority areas for planning and program development. Input is gathered from the Title VI-B Advisory Committee, the North Dakota Special Education Study Council, local education agency application and annual reports, and the Comprehensive System of Personnel Development (CSPD) section of the Title VI-B State Plan which receives statewide input through public hearings and distribution to a variety of state agencies and parent groups.

c. Wrote and submitted grant proposals which were funded in the areas of: 1) seocndary transition form school to adult life, 2) preschool (SIG), 3) deaf/blind-multihandicapped, 4) preservice education of teachers of the severely handicapped, and 5) Very Special Arts Festival Program. These grants funded state level personnel for administration and technical assistance to LEAs and also provided some local grant dollars to assist in the providion of direct student services and inservice and preservice training.

B. Evaluation

1. Summary

The special education unit was reasonably successful at securing federal fund assistance in identified priority areas.

2. Trends

The federal fund availability is becoming more scarce and a greater dependence on state funds is imminent.

3. Problems

Shortage of federal and state funds for program planning and development.

V. Development and Implementation of Interagency Cooperative Agreements

A. Function/Responsibility

1. Description

To cooperatively develop and implement interagency cooperative agreements with appropriate public and private agencies including the Director of Institutions, the State Department of Human Services, the State Department of Health, and the State Board for Vocational Education, for the purposes of maximizing available state resources in fulfilling the education of handicapped children.

2. Objectives

a. To annually review and revise existing interagency cooperative agreements to assure the purpose of the agreement meets the state's needs.

b. To establish an interagency planning task force to facilitate greater interagency collaboration and maximize the use of resources available to handicapped children.

c. To develop an interagency agreement to clarify the responsibilities of the infant development and preschool handicapped programs.

3. Activities

a. Developed a resource document summarizing pertinent programs for the handicapped, their purposes, target populations, a contact office and phone numbers.

b. The interagency planning task force identified a need for an interagency agreement to facilitate the transition of secondary school handicapped students to adult services. A state planning grant was written and funded having been initiated following the development of an interagency agreement between the State Board for Vocational Education; the Division of Developmental Disabilities, and Vocational Rehabilitation of the Department of Human Services; and the Department of Public Instruction.

c. Another federal grant was written and received in the area of preschool development following an interagency agreement with the Department of Health, the Department of Human Services, and the Department of Public Instruction.

d. All interagency agreements are reviewed at least annually.

B. Evaluation

1. Summary

To report through annual data collections, the number of handicapped children receiving education and related services.

2. Trends

There is a financial and programmatic incentive to provide services in a collaborative way. The SEA and LEA are able to utilize their available funds in a more effective and efficient manner.

3. Problems

   With the shortage of state dollars, each agency is very protective of program monies which makes collaboration difficult.

VI. Establishing Standards and Providing for the Approval of Schools, Teachers, Facilities, and Equipment Concerned With the Education of Handicapped Children

A. Function/Responsibility

1. Description

   To establish standards and to provide for the approval of schools, teachers, facilities, and equipment concerned with the education of handicapped children.

2. Objectives

   a. To establish, review, and revise standards for schools, teachers, and equipment concerned with the education of handicapped children.

   b. To work cooperatively with the Certification Unit of the Department of Public Instruction to establish and review standards for certification and credentialing of special education personnel.

   c. To work cooperatively with the School Construction Unit of the Department of Public Instruction to establish and review standards for approval of new construction of schools and/or facilities in which handicapped children are to be educated.

   d. To develop and revise guidelines for the use of state and federal funds for the purchase of equipment to be used with the handicapped.

e. To determine on an annual basis the demand for professional personnel to assist in recruitment.

3. Activities

a. Reviewed and revised procedures with the Certification Unit for certification and credentialing of special personnel in all areas.

b. Reviewed and approved school construction plans when identified special education rooms were contained in the blueprints.

c. Provided technical assistance to special education units in regard to purchases of equipment in the areas of equipment use and appropriate expenditure of state and federal dollars.

d. Produced and distributed a recruitment document and videotape to recruit personnel into special education.

B. Evaluation

1. Summary

a. Determine through program monitoring if the credential requirements are sufficient to meet the needs of the handicapped children being served by personnel. This determiniation would be made by reviewing the appropriateness of a student's IEP with the unique educational needs of the student.

b. Expenditure of state and federal dollars for equipment is reviewed in the program applications and annual financial budgets and reports.

2. Trends

   a. Credentialing in certain low-incidence handicapping areas needs to be reviewed as there are greater numbers of severely multiply handicapped students being served in the public schools.

   b. Building accessability in old school plants is beginning to pose problems for rural, remote districts where new construction is not feasible.

3. Problems

   Availability of appropriately trained personnel or the incentives to recruit trained personnel to work in rural areas.

VII. Provide Leadership to Liaison and Advisory Committees

A. Function/Responsibility

1. Description

   To participate and provide leadership to liaison and advisory committees, soliciting their advice and cooperation in the establishment of policy and in the coordination and development of special education programs.

2. Objectives

   a. To see that advisory groups are maintained to provide needed input for policy developemnt and the coordination and development of special education programs.

   b. To provide any necessary advisory group as provided in regulation or as a condition of the receipt of a federal grant.

   c. To assure that each advisory group has representation from appropriate input sources--persons and agencies.

d. To report to the State Superintendent the recommendations of the liaison and advisory committees for the handicapped.

3. Activities

a. Met with Title VI-B Advisory Committee eight times during the biennium. The committee reviewed statewide needs, personnel recruitment, preservice and inservice education for teachers, reviewed proposed changes in credential standards, evaluated the Comprehensive System of Personnel Development (CSPD), and the North Dakota State Plan.

b. Met every other month with the North Dakota Special Education Study Council. The organization is composed of directors of special education units and directors of education from the state operated/supported programs. The NDSESC provided input on local program trends, status of current personnel and future recruitment needs, preservice and inservice needs, proposed changes in special education credential standards, and the Title VI-B State Plan.

c. Three federal grants also required steering committees as a condition of the grant application. These committees are narrowly focused but provide valuable input to the Department of Public Instruction in the grant areas.

d. Individual contacts with special interest parent groups are necessary and valuable in maintaining a positive working relationship--several of these contacts are made each biennium.

e. Several contacts are made by the advisory groups each year with the State Superintendent. Contacts are formal and informal. The Title VI-B Advisory Committee submits an annual report to the Superintendent for inclusion in the Special Education Annual Report.

B. Evaluation

1. Summary

   a. The Special Education Unit reports recommendations of the liaison and advisory committees in the annual report.

   b. All public comments received in public hearings are recorded and printed in the Title VI-B State Plan.

2. Trends

   This valuable input source must continue to grow and expand in order to broaden the base of support for handicapped programming.

3. Problems

   Gathering input in this manner is very time consuming.

APPendix

56186-1-U

STATE OF NORTH DAKOTA

DEPARTMENT OF PUBLIC INSTRUCTION

THE BIENNIAL REPORT

July 1, 1983 to June 30, 1985

APPENDIX

Financial Data and Cost of Education

by District

NORTH DAKOTA
CENTENNIAL

Dr. Wayne G. Sanstead
SUPERINTENDENT OF PUBLIC INSTRUCTION

TOTAL OPERATING REVENUE AND EXPENDITURES BY SCHOOL DISTRICT FOR THE 1983-85 BIENNIUM
